40V Cordless Product Line

Pull the trigger for instant start with constant no-fade power and long run time. Cleaner, quieter, and free from the hassles of gasoline or corded power, Oregon Cordless Tools are engineered to work the way you want, when you want. With the 40V Max* Lithium-Ion battery platform, you have all the power and run time you need to get the job done.

THE OREGON ADVANTAGE:

- Ergonomically designed. Light and optimal balance for less fatigue
- Low noise and easy to use
- Hassle free with low maintenance
- High performance to tackle the toughest jobs
- Versatile battery and charger platform works with all tools
- A full comprehensive line allows you to complete all the jobs you need done—from tree and hedge trimming to grass cutting, leaf blowing and general yard cleanup

See pages 8–31

120V Professional Series™

The Oregon 120V Professional Series was developed specifically with the professional landscaper in mind. The platform combines cutting-edge technologies to finally offer the power and durability of traditional tools with all the advantages of battery power. With the ability to run a full day of real commercial work with minimal, if any, need for a fresh battery, this equipment provides the muscle needed to finish the job.

THE OREGON ADVANTAGE:

- Battery capacity for a full day's work
- Efficient brushless electric power to match gas
- Smart controller to manage tool performance – automatically
- IP56 weather-ready rating to withstand life in the outdoors rain or shine
- Integrated dashboards communicate charge level and equipment diagnostics
- Advanced noise and vibration damping technology integrated into all tools
- Robust build quality to endure real professional-grade use

See pages 32–41

40V* MAX LITHIUM-ION

Oregon® Cordless Tool System

INSTANT START
- No Pull Cords
- No Warm-Up Required
- No Gas-Oil Mixing

COMFORT AND CONTROL
- Ergonomic Design
- Light-Weight and Balanced
- Low Vibration

LOW NOISE
- Significantly Quieter than Gas-Powered Motors
- Silent Between Cuts/Trimming
- Start Early and Work Late

ZERO EMISSIONS
- Environmentally Friendly
- No Gas Fumes

LESS DOWN TIME
- Fewer Repairs Needed (Compared to Gas Engines)

*Fully charged battery voltage measured without a workload is 40 volts. Nominal voltage is 36 or 37 depending on battery used.

PowerNow™ Lithium Ion Battery Packs

The Oregon® battery platform provides all the power you need to get the job done. Our PowerNow premium cell technology ensures a long run time. Superior construction makes all our batteries rugged and durable.

PREMIUM CELL TECHNOLOGY
Light-weight premium cells combine reliable performance & energy capacity.

CONSTANT NO-FADE POWER
Maintain constant power through discharge.

RETAINS CHARGE
Retains a charge even after months of storage.

CONSISTENT CAPACITY
Charge maintenance and full discharge is not necessary to retain consistent capacity throughout the life of the battery (no memory effect).

Cordless Multi-Attachment System

A versatile and powerful system designed for homeowners wanting to save time and money. The Oregon® Multi-Attachment System puts you in charge — choose only the attachments you need and build a customized system for you and your yard. The Oregon attachments work seamlessly with the Powerhead, and the brushless motor delivers sustainable power. Within seconds, you can switch from pruning your trees to trimming the grass around your flower bed.

1 Powerhead

6 Attachments

POWERFUL

- Brushless motor delivers more power and enhanced torque for higher efficiency
- Plenty of power to trim and edge a large yard
- Consistent lithium ion performance

EFFICIENT

- A single power source — no need to maintain multiple gas engines
- Use any Oregon 40V MAX* battery

VERSATILE

- One system that uses your choice of Oregon interchangeable attachments
- Seamlessly switch from high-volume jobs to precision work
- Swap out one tool for another within seconds

STORABLE

- Takes up less space in your garage or shed
- Fits easily in a truck bed or cargo space
- Lighter weight makes it easy to move

PH600 Multi-Attachment
Powerhead

OREGON

CS300 Chainsaw

40V MAX LITHIUM-ION

6.0 Ah = up to 600 cuts
4.0 Ah = up to 400 cuts
2.6 Ah = up to 250 cuts
*In 2"-3" material.

The Oregon® chainsaw starts instantly and easily cuts through trees and tree limbs. The brushless motor delivers a powerful combination of speed and torque, and our premium 40V MAX* battery ensures zero emissions. Sharpen the chain in seconds with the built-in PowerSharp® system.

OREGON	Description
572627	Chainsaw CS300 - Tool Only 40V MAX* chainsaw, 16" (40 cm) guide bar, PowerSharp chain
572626	Chainsaw Kit CS300 - E6 2.6 Ah battery, standard charger
572625	Chainsaw Kit CS300 - A6 4.0 Ah battery, standard charger
586622	Chainsaw Kit CS300 - R7 6.0 Ah battery, rapid charger

HIGH-PERFORMANCE
The chainsaw's innovative brushless motor delivers high power and torque. You can quickly and easily adjust the chain with the tool-less tensioner.

ONBOARD POWERSHARP
Sharpen on the saw, and on the job, in seconds.™

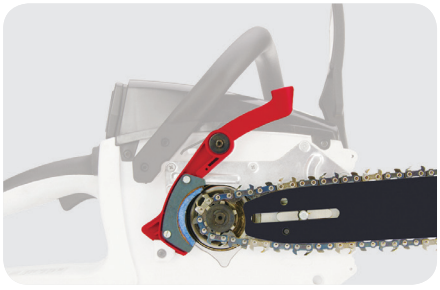
ERGONOMICALLY DESIGNED
Weighing only 12 lbs, the chainsaw is designed to distribute weight evenly for easy handling.

SPECIFICATIONS
- 16" (40 cm) bar length.
- Automatic oiler with 4.1 oz tank capacity.
- No load chain speed 2796 fpm.
- Only 12 lbs (with battery).

PowerSharp Sharpening System

With the built-in PowerSharp sharpening system, there's no more downtime due to dull chain. Simply pull the PowerSharp lever for 3–5 seconds and the chain works like new. PowerSharp: sharpen on the saw, on the job, in seconds.

(see pages 136-137 of the FOR section of the catalog for more detail)



LM300 Lawn Mower

40V MAX LITHIUM-ION

6.0 Ah = up to 7000 ft²
4.0 Ah = up to 5000 ft²
*Works with all Oregon batteries

The LM300 cuts large grass areas quickly and efficiently. The instant start and 6 adjustable cutting positions allow you to work in every season and on every type of lawn. The brushless motor, battery, and debris bag give you the power and capacity to clear your yard easily and efficiently.

OREGON	Description
591083	Lawn Mower LM300 - Tool only
591082	Lawn Mower Kit LM300- A6 4.0 Ah battery, standard charger
591081	Lawn Mower Kit LM300 - R7 6.0 Ah battery, rapid charger

GREAT FOR SMALL TO MEDIUM YARDS

The LM300 starts instantly and makes cutting time more enjoyable. The brushless motor offers a combination of high-torque and efficiency, offering a quality cut and long run time (up to 7000 ft² with a full battery charge).

LIGHT-WEIGHT/OPTIMAL BALANCE

The LM300 is light-weight (only 35.9 lbs with battery) and perfect for mowing around flower beds.

SPECIFICATIONS

- Brushless motor
- 16" (40 cm) cutting width
- 13.2 gal (1.4 bushel) debris bag
- 35.9 lbs with battery
- 6 Cutting positions

16" (40 cm) cutting width

Easily adjust cutting height

13.2 gal debris bag

NEW LM400 Lawn Mower

40V MAX LITHIUM-ION

6.0 Ah = up to 10,000 ft²
4.0 Ah = up to 7,000 ft²
* With two batteries
Works with all Oregon batteries

Vertical Storage Position

Oregon's new LM400 Lawn Mower possesses the power capacity to cut any residential yard. The LM400's tough steel deck gives it the muscular look of a gas mower — without emissions and excess noise. The LM400 can run on only one battery, but it has the capacity for two — which the convenience of extended run time. The LM400 has a vertical storage position, so it will take up minimal space in your garage.

OREGON	Description
591080	Lawn Mower LM400 - Tool only
591079	Lawn Mower Kit LM400 - A6 4.0 Ah battery, standard charger
591078	Lawn Mower Kit LM400 - R7 6.0 Ah battery, rapid charger
591077	Lawn Mower Kit LM400 - X7 Two 4.0 Ah batteries, rapid charger

HIGH PERFORMANCE

Cut more grass with fewer passes. The LM400's brushless motor delivers enhanced torque that allows you to cut high grass and tough vegetation on rough terrain. The LM400's 20" cutting diameter offers a wider cut for larger yards.

SPECIFICATIONS

- Brushless motor
- Steel deck
- 20" (51 cm) cutting width
- 15.9 lbs with one battery
- Vertical storage position
- Dual battery for extended run times
- 6 cutting positions
- Bagging / rear discharge / side discharge

20" (51 cm) cutting width

Dual battery: Operates with 1 or 2 batteries

Side discharge

BL300 Hand-Held Blower

40V MAX LITHIUM-ION

6.0 Ah = up to 120 min.

* When running on the lowest trigger setting, 22 min on full trigger, 12 min on turbo button

4.0 Ah = up to 90 min.

* When running on lowest trigger setting 15 min. on full trigger 8 min. on turbo button

Large areas of leaves and debris can be easily cleared away with the Oregon® Cordless Blower. The combination of superior air volume, (up to 507 cfm) and speed (up to 131.5 mph) make this the ultimate debris-clearing machine. The cordless blower's low decibel rating, ergonomics, and portablity make it an ideal tool for all-day jobs.

OREGON	Description
572619	Blower BL300 – Tool Only
572621	Blower Kit BL300 - A6 4.0 Ah battery, standard charger
586646	Blower Kit BL300 - R7 6.0 Ah battery, rapid charger

LOW NOISE

The BL300 offers a powerful, low noise solution to clean-up and debris removal. With only 64.6 dB (bystander measure) on Turbo mode, the BL300 allows you to get the job done, without bothering your neighbors.

HIGH-PERFORMANCE

The innovative brushless motor and axial fan offer a powerful combination of performance and efficiency. The variable speed trigger allows the user to stay in complete control by only using the power required by the job. The Cordless Blower delivers up to 507 cfm of air per hour.

ERGONOMICALLY DESIGNED

The Cordless Blower is designed for extended use. The comfortable handle and shoulder strap make it ideal for large areas.

SPECIFICATIONS

- Only 8.9 lbs (with battery).
- Superior air volume (up to 507 cfm of air per hour).
- Exceptional air speed (up to 131.5 mph).
- Variable speed trigger.

Well balanced

Convenient built-in holes (strap included)

Turbo button and variable speed trigger

ST275-GSL Trimmer/Edger

40V MAX LITHIUM-ION

6.0 Ah = approx. 45–60 min.
4.0 Ah = up to 30-40 min.
2.6 Ah = up to 20-30 min.
*Depending on material being cut and user technique

Cut through tough vegetation and beautify your landscape; the Trimmer/Edger's patented gear drive technology allow you to do both.

OREGON	Description
582152	Trimmer / Edger ST275 - Tool Only With Gator SpeedLoad trimmer head
590498	Trimmer / Edger Kit ST275 - E6 2.6 Ah battery pack, standard charger
581207	Trimmer / Edger Kit ST275 - A6 4.0 Ah battery pack, standard charger
586726	Trimmer / Edger Kit ST275 - R7 6.0 Ah battery pack, rapid charger

2-IN-1 TRIMMER / EDGER
Switch quickly from timmer to edger.

HIGH TORQUE AND POWER
Patent gear drive technology provides high performance and torque to cut through thick vegetation. The variable throttle allows the user to maintain control.
US patent numbers 6,301,788 and 6,014,812 used under license.

ERGONOMICALLY DESIGNED
- Designed for comfort and extended use.
- Sling included to help reduce operator fatigue.

SPECIFICATIONS
- Only 9.4 lbs (with battery).
- 13" cutting diameter
- 6250 rpm no-load cutting speed.
- Gator® SpeedLoadTM trimmer head

Gator SpeedLoad Head

FAST. Fastest loading system ever. Reduce the whole process from 5 minutes to a few seconds.

EASY. Open the head. Place the disk. Close the head.

DURABLE. Long lasting heat-treated disk, twice as long as standards lines.

PS250 Pole Saw

40V MAX LITHIUM-ION

6.0 Ah = up to 750 cuts
4.0 Ah = up to 500 cuts
2.6 Ah = up to 325 cuts
*In 2" - 3" material

The Oregon® Pole Saw gives you precision, power, and a telescoping reach for all trimmming and pruning jobs. The shaft allows up to 14'-15' of access, while the premium battery pack and mid-mount motor provide you with the longevity and comfort for a long day's work.

OREGON	Description
563456	Pole Saw PS250 - Tool Only 40V MAX* pole saw, 8" (20 cm) guide bar, Microlite™ narrow kerf chain
563455	Pole Saw Kit PS250 - E6 2.6 Ah battery, standard charger
563454	Pole Saw Kit PS250 - A6 4.0 Ah battery, standard charger
586642	Pole Saw Kit PS250 - R7 6.0 Ah battery, rapid charger

EXTENDABLE REACH
Extend up to 10'2" (3.1 mm) for a reach of up to 14'-15' (4.5m) from the ground level.**

MID-MOUNT MOTOR
The mid-mount motor places the pole saw's weight (and size) between your hands. This reduces the size of the cutting head — making it easier to reach hard-to-reach-cuts, and reduces the weight at the end of the pole — improving ergonomics and reducing fatique.

ERGONOMICALLY DESIGNED
In addition to the mid-mount motor, the pole saw weighs only 13.5 lbs with the battery, which means better balance and less fatigue. A shoulder strap is included for additional comfort.

SPECIFICATIONS
- Only 13.5 lbs (with battery).
- Chain speed: 2817 fpm.
- 3/8" Microlite narrow kerf 90PX chain.
- 8" (20 cm) bar.

*** Based on estimate for a 5'10" (1.8 m) individual operating at a 60 degree angle + / - 18 degrees.*

Slim, compact head

Mid-mount motor

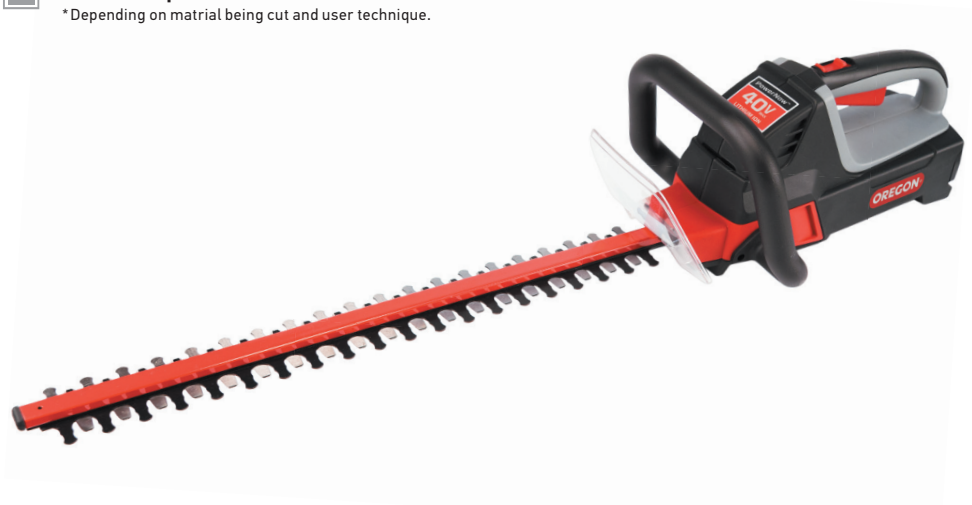
Adjustable collar

Branch hook

HT250 Hedge Trimmer

40V MAX LITHIUM-ION

6.0 Ah = up to 150 min.
4.0 Ah = up to 100 min.
2.6 Ah = up to 60 min.
*Depending on matrial being cut and user technique.



The Oregon® Hedge Trimmer is light enough for you to tackle tall and wide hedges as well as rows of smaller hedges. The laser-cut blades will cut neat and precise formations while maintaining the health of the plants.

OREGON	Description
551275	Hedge Trimmer HT250 - Tool Only
558812	Hedge Trimmer Kit HT250 - E6 2.6 Ah battery, standard charger
585212	Hedge Trimmer Kit HT250 - A6 4.0 Ah battery, standard charger
567040	Hedge Trimmer Kit HT250 - A7 4.0 Ah Battery, Rapid Charger

26" (60 CM) LASER-CUT BLADES

Laser-cut blades mean cleaner cuts and healthier plants, while the low noise (74 dB) offers a combination of superior performance and operator comfort.

ERGONOMICALLY DESIGNED

Large, comfortable handles. Dual action design for low vibration.

SPECIFICATIONS

- Only 9.8 lbs (with battery).
- 2750 strokes per minute maximum cutting speed.
- Cuts up to a 3/4" branch.
- Variable speed trigger.

Premium Blade Technology

Engineered with premium blade technology to outlast the competition. Rugged and durable, the Oregon HT250 Hedge Trimmer's blades are perfect for trimming and sculpting.

WL275 Portable Light

40V MAX LITHIUM-ION

6.0 Ah = approx. 36 hrs. on LOW
6.0 Ah = approx. 18 hrs. on HIGH
AC Power Cord = Continuous run time

Battery not included. Works with any Oregon Cordless 40V MAX battery pack.

The Oregon® Portable Light keeps work sites illuminated well after the sun sets. Our unique power options give you the flexibility to choose between the included AC power cord or inserting an Oregon PowerNow™ Battery Pack.

OREGON	Description
581611	LED Portable Light WL275 - Tool Only

HIGH-PERFORMANCE
1091 Lumens / 12 hours on HIGH
584 Lumens / 24 hours on LOW

PORTABLE
Use the provided AC power cord or go portable with any Oregon Cordless Tool System Battery Pack.

DURABLE AND CONVENIENT
The durable fame and multiple angle adjustments offer ideal work site performance.

Multiple adjustments for 90˚+ light angle options

** Fully charged battery voltage measured without a workload is 40 volts. Nominal voltage is 36 or 37 depending on battery used.*

Tool Bag

The Tool Bag is designed to protect, carry, and store an Oregon chainsaw or blower with accessories.

- Internal lining and outside pocket is water and oil resistant
- Rugged construction resists abrasion and wear
- Extra-large, wide-mouth opening for easy access and visibility
- 7 internal and 2 external pockets neatly organize your battery, charger, and other accessories
- 27" L x 12" W x 12" H (68.6 cm x 30.5 cm x 30.5 cm)
- Comfortable fitting and light weight

OREGON	Description

Corded Chainsaws

CS1500
The only self-sharpening corded electric chainsaw on the market

CS1400

Oregon's high-power, 15 amp CS1500 chainsaw is the only corded electric chainsaw on the market with a chain that can sharpen itself. The CS1500 has all the traditional conveniences of an electric saw — instant start with the pull of a trigger, minimal maintenance, low noise and silent between cuts — and takes it one step further by incorporating the built-in PowerSharp® chain sharpening system.

15 amp CS1400 chainsaw offer all the benefit of the CS1500 except that the PowerSharp system is replaced by an Oregon ControlCut high performance chain. + 33% longer semi Chisel cutters, suitable for all-day cutting. Low vibration, kick-back reduction. CS1400 is available with a 16" guide bar

OREGON	Description
603352	Self-Sharpening Electric Chainsaw, Model CS1500 Includes: chainsaw, 18" guide bar, and PowerSharp chain. Fully assembled
603353	Self-Sharpening Electric Chainsaw, Model CS1500 Includes: chainsaw, 18" guide bar, and PowerSharp chain. Shorter box, semi-assembled
603348	Electric Chainsaw, Model CS1400 Includes : chainsaw, 16" guide bar, and ControlCut chain. Short box, semi-assembled

INSTANT START
- No pull cords
- No warm up
- No gas-oil mixing
- No emissions

LOW NOISE
- Much quieter than a gas saw
- Silent between cuts

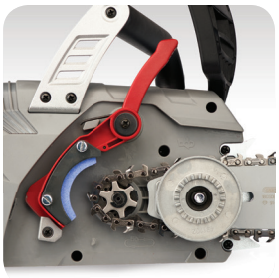
ERGONOMIC DESIGN
- Light-weight and balanced
- Low vibration
- Over-mold comfort handle

SPECIFICATIONS
- Bar length: CS1500: 18" (45cm); CS1400: 16" (40cm)
- CS1500: PowerSharp chain, 3/8 in. Low Profile™ with .050" gauge
- CS1400: ControlCut 91PXL056G chain, 3/8 in. with .050 gauge
- Automatic oiler with view-through window
- 15 amp rating
- 120 Volt ~ 60 Hz
- No load chain speed 2888 FPM
- Weighs 12.9 lbs (5,85 kg)

PowerSharp Sharpening System

With the built-in PowerSharp Sharpening System, there's no more downtime due to dull chain. Simply pull the PowerSharp lever for 3 – 5 seconds and the chain works like new. With PowerSharp, you can sharpen on the saw, on the job, in seconds®.

(see pages 144-145 of the FOR section of the catalog for more detail)



PowerSharp® Saw Chain for CS250, CS300 & CS1500

The Oregon PowerSharp® sharpening system means no more downtime due to dull chain. PowerSharp allows you to sharpen on the saw, on the job, in seconds®.

- Sharpens in 3 – 5 seconds
- No extra tools needed for sharpening
- 10 – 20 sharpenings per chain
- 3/8" Low Profile™ / .050" gauge

ST275 Quick Load Replacement Trimmer Head

This quick loading trimmer head was designed specifically for use with the Oregon® ST275 Trimmer/Edger. The head has many exclusive features to improve run time, reduce noise, and improve cutting performance.

- Comes loaded with .080" Oregon Platinum Gatorline™
- Easy line loading without taking apart the head
- Bump knob is designed to reduce accidental bumping, feeding line only when you need it
- Spool holds up to 12 ft. (30.5 cm) of .080" trimmer line

OREGON	Description
564849	ST275 quick loading replacement trimmer head with line Bump feed, easy load, 2 line.

.080" Platinum Gatorline™ Trimmer Line

Platinum Gatorline solves many of the problems of traditional trimmer line. The armored exterior is more resistant to breakage and also shields a highly flexible co-polymer core for outstanding durability.

- Consistent line diameter
- Armored exterior
- Flexible core
- SuperTwist®

Outdoor Power Equipment

120V Professional Series™

THIS IS REAL POWER

Many cordless products have been labeled professional-grade, but cordless power has never measured up to the performance of traditional, commercial gas equipment—until now. The new Oregon 120V Professional Series is engineered with up to 15% more power than gas-fueled equipment—driving more productivity than ever before.

Introducing Oregon Professional Series—The next evolution of battery technology.

Professional Grade Cordless Equipment
Finally, there's a line of professional-grade tools that offer all the benefits of battery, without sacrificing power, performance, or durability.

Quietly Powerful
Engineered from the ground up with low noise in mind, these tools have been designed so your work can be seen and not heard.

More Power and Torque
Engineered to offer up to 15% more power than gas-fueled equipment.

Weather Ready
With an IP56 rating, water and dust seals on electrical connections and components mean these tools are ready to work, rain or shine.

Increased Productivity
Efficient power offers extended run times with no refueling stops, while ultra-quiet operation allows early start times at noise-sensitive sites.

Commercial-Grade Durability
Tested tough to endure the rigours of professional use.

BL120VX Leaf Blower

Built to get the job done quickly and quietly with an amazing max-bystander-noise-rating of 59dB(A) for noise-restricted sites, the zero-emission BL120VX was engineered with the professional in mind. With a variable speed trigger, fatigue-reducing throttle lock and a blow force rating of 22N, you're ready for real work.

The Oregon® Family of Log Splitters

The Choice of Pros

A full range of splitting force and features to take on any job.

25-TON

30-TON EXtendSplit*

37-TON

KINETIC

Our Log Splitter Family

A log splitter for every job

Whether you are a weekend warrior or a production professional we have a log splitter to fit your needs.

Versatile

Easy-to-use, easy to transport, we designed our log splitter to ensure you can get the job done.

Strong

A full range of splitting force from 25-Ton splitter to 37-Ton, designed with ergonomic positions and built to last.

Exclusive Convenience

The new Oregon 30-Ton Log Splitter features EXtend Split™ - an exclusive design feature that gives the operator a larger work area. Extend Split offers an improved and more comfortable cutting experience that can't be found anywhere else.

FEATURES

- Fast cycle times for increased productivity
- Built-in log cradle design makes splitting wood easier by keeping log in place for hands-free operation
- Ergonomically positioned auto return valve for increased operator comfort and efficient splitting
- Boxed tongue with handle, designed for strength and maneuverability
- 8" (20.3 cm) 10" (25.4 cm) tall wedge has larger splitting surface
- Integrated stripper plates remove stuck logs from wedge upon return
- Solid-steel foot plate for increased strength

25-TON

SPECIFICATIONS

- Tonnage: 25-Ton
- Wedge: 8" (20.3 cm) wedge
- Cycle time: 13 seconds
- Operation options: horizontal and vertical
- Log capacity: 24.5" (62.2 cm)
- Hydraulic capacity: 6.5 gallons (24.6 L)
- Tank Capacity: 5 gallons (18.9 L)
- Pump performance: 2-stage, 13 GPM pump
- Working height: 31.5" (80 cm)
- Weight: 595 lbs (270 kg)
- 3,100 PSI hydraulic control valve with auto-return.

208cc

OREGON	Description
614407	25-Ton Log Splitter - NEW

Features

LOG SPLITTING FORCE

1. Auto-return valve speeds up the log splitting process.
2. Ergonomically positioned valve placement for increased operator comfort.
3. 4.5" X 24" (11.4 X 61 cm) cylinder capable of producing 25-tons of splitting force, makes this our most popular tonnage for splitting most logs.
4. The efficient 8" (20.3 cm) wedge is also 4-way wedge compatible.
5. High-strengh U.S. steel beam with interlocking foot plate designed for increased strength and durabilty.

BUILT TO LAST

6. Integrated stripper plates and log cradle for rigidity; capable of removing stuck logs and holding logs secure for hands-free splitting.
7. 2-stage 13 GPM pump for faster production.
8. 6.5-gallon (24.6 L) hydraulic capacity allows plenty of room for fluid to keep flowing and stay cool.

VERSATILE & PORTABLE

9. 4.80" x 8.0" (12.3 cm x 20.30 cm) 45 MPH tires DOT certified.
10. Horizontal-shaft engine opposite side of operator.
11. Boxed tongue with rotating ground stand and handle gives solid support during splitting.
12. Optimized trailer tow height.

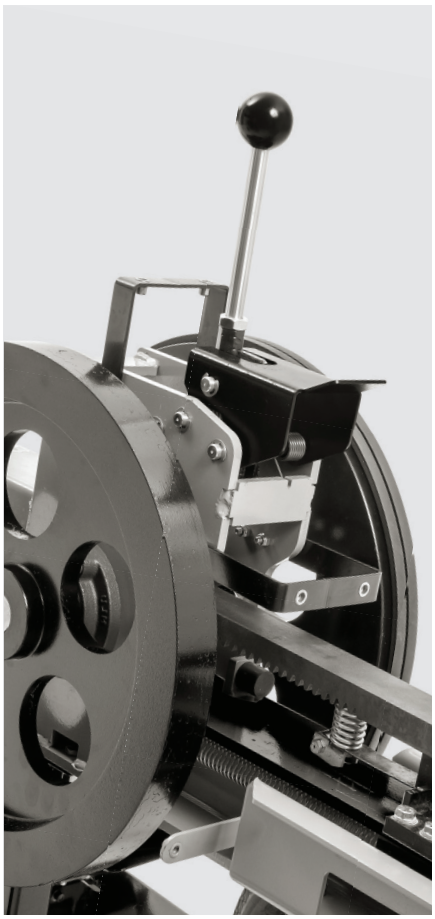
10. Horizontal shaft engine opposite side of operator.
11. Boxed tongue with rotating utility jack and handle designed for strength during splitting.

Log Splitters - Kinetic



SPLIT WOOD 6X FASTER* WITH KINETIC POWER

Kinetic Advantages

Save Time & Money

Kinetic splitters consume less fuel than hydraulic splitters because the power requirements on the engine are less.

Clean Operation

No hydraulic fluid, cylinders, pumps, hoses, fittings, or filters eliminates hydraulic leaks and maintenance.

Work Efficiently

The precision wedge splits clean, creating less wood-waste debris.

How It Works

Precision balanced, 70-pound flywheels spin at 325 PMs to create and store kinetic energy.

As the flywheels turn, the pinion gear spins on the same shaft. When the control handle moves forward, the rack presses onto the pinion gear.

The rack and push plate power forward at high speed, pushing the log through the wedge. This burst of energy adds high speed to the splitting action versus a much slower 20 to 40 ton hydraulic log splitter. As a result, most logs are split in 2 or 3 seconds instead of more than 13 seconds with a hydraulic splitter.

*Compared with hydraulic log splitters

SPECIFICATIONS

- Kinetic log splitter
- Wedge: 6" (15.24 cm) wedge
- Cycle time: 2 seconds
- Operation options: horizontal
- Log capacity: 24" (61 cm)
- Weight: 640 lbs (290.3 kg)

ENGINE OPTIONS

All EPA approved

Kohler SH265

196cc

OREGON	Description
581738 (shown)	Kinetic Log Splitter (Kohler)

Features

WORK SMARTER WITH LESS FATIGUE

1. Virtually eliminates kick-back with patent-pending handle design with torsion springs that absorb energy when a stall occurs.
2. Reduced operator fatigue due to no unnecessary motion.
3. Work from either side of the log splitter with the convenient two-handed operation.

HEAVY-DUTY WORK TABLE

4. Minimize snags when you bring a log back for re-splitting. The work surface is smooth and flush with the beam.
5. Split more logs with less debris. The log splitter's wide slots reduce build-up that could jam the push plate assembly.
6. The 32" wide work table allows easy access to rounds and re-splits from either side.

VERSATILE & PORTABLE

7. Easily move the log splitter around your work site with the welded, table-mounted handles.
8. Tow it on the highway with the 2" ball coupler and safety chains, 45 MPH DOT certified tires.
9. Load and unload easily with the stow-away retractable tongue.

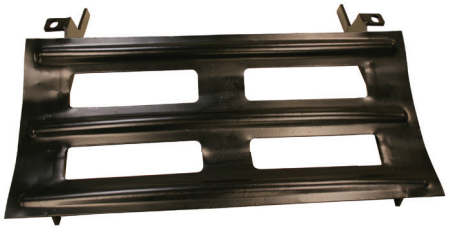
BUILT FOR YEARS OF COMMERCIAL USE

10. Work efficiently. The precision wedge splits clean, creating less wood-waste debris in high-volume applications and can be sharpened to maintain edge in the future.
11. The heavy-duty stand centered under the table supports years of commercial use.
12. The precision, heat-treated, steel alloy rack and pinion gear system is proudly made in the USA.
13. The durable, high-strength steel drive system components are manufactured for heavy commercial use.

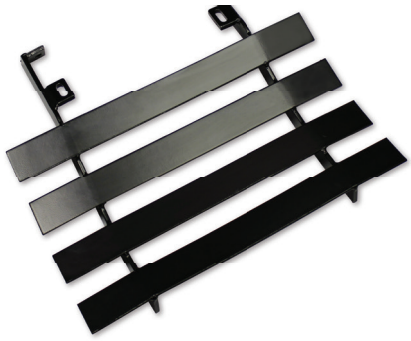
Log Splitters - Accessories

Log Splitter Catcher

Log catchers keep work at a consistent height, reducing strain and fatigue on the operator and to help keep the immediate work-space in order. Built of heavy-gauge steel, these attachments are designed to be durable and easily installed.



OREGON	Description
S40200600	Log Catcher Fits:
	22-Ton Use with Oregon S402022HO/HOEX or S402022KO/KOEX 22-Ton Log Splitters (serial numbers starting with A through H, ending in 6 or lower, or any unit with serial ending in: 3, 4, 5.)
	28-Ton Use with Oregon S402028HO/HOEX or S402028KO/KOEX 28-Ton Log Splitters (serial numbers 1G1110552 and smaller)



OREGON	Description
564068	Log Catcher Fits:
	22-Ton Use with Oregon S402022 Log Splitter (serial numbers starting with J, K, or L and ending in 6 or higher)
	28-Ton Use with Oregon S402028 Log Splitter (serial number 1G1110553 and larger)

OREGON	Description
581194	Log Catcher Fits:
	25-Ton Use with Oregon 614407 Log Splitter
	28-Ton Use with Oregon 596879 Log Splitter
	28-Ton **ExtendSplit™** Use with Oregon 596280 (Honda) or Oregon 596279 (Kohler) Log Splitters
	30-Ton **ExtendSplit™** Use with Oregon 614426 Log Splitter
	35-Ton Use with Oregon 596282 (Honda) or Oregon 596281 (Kohler) Log Splitters
	37-Ton Use with Oregon 614692 Log Splitter

4-Way wedge

Log catchers keep work at a consistent height, reducing strain and fatigue on the operator and to help keep the immediate work-space in order. Built of heavy-gauge steel, these attachments are designed to be durable and easily installed.

OREGON	Description
S40201200	4-Way Wedge Fits:
	22-Ton Use with Oregon S402022HO/HOEX or Oregon S402022KO/KOEX Log Splitters (serial numbers starting with A through H, ending in 6 or lower, or any unit with serial ending in: 3, 4, or 5)
	28-Ton Use with Oregon S402028HO/HOEX or Oregon S402028KO/KOEX Log Splitters (serial numbers 1G1110552 and smaller)
564066	4-Way Wedge Fits:
	28-Ton Use with Oregon S402028HO/HOEX or Oregon S402028KO/KOEX Log Splitters (serial numbers 1G1110553 and larger)

OREGON	Description
605808	4-Way Wedge Fits:
	28-Ton Use with Oregon 596879 or 596280 (Honda) or 596279 (Kohler) Log Splitters
	28-Ton **ExtendSplit™** Use with Oregon 596879 or 596280 (Honda) or 596279 (Kohler) Log Splitters
	35-Ton Use with Oregon 596282 (Honda) or 596281 (Kohler) Log Splitters
	25-Ton Use with Oregon 614407 Log Splitter
	30-Ton **ExtendSplit™** Use with Oregon 614426 Log Splitter
	37-Ton Use with Oregon 614692 Log Splitter

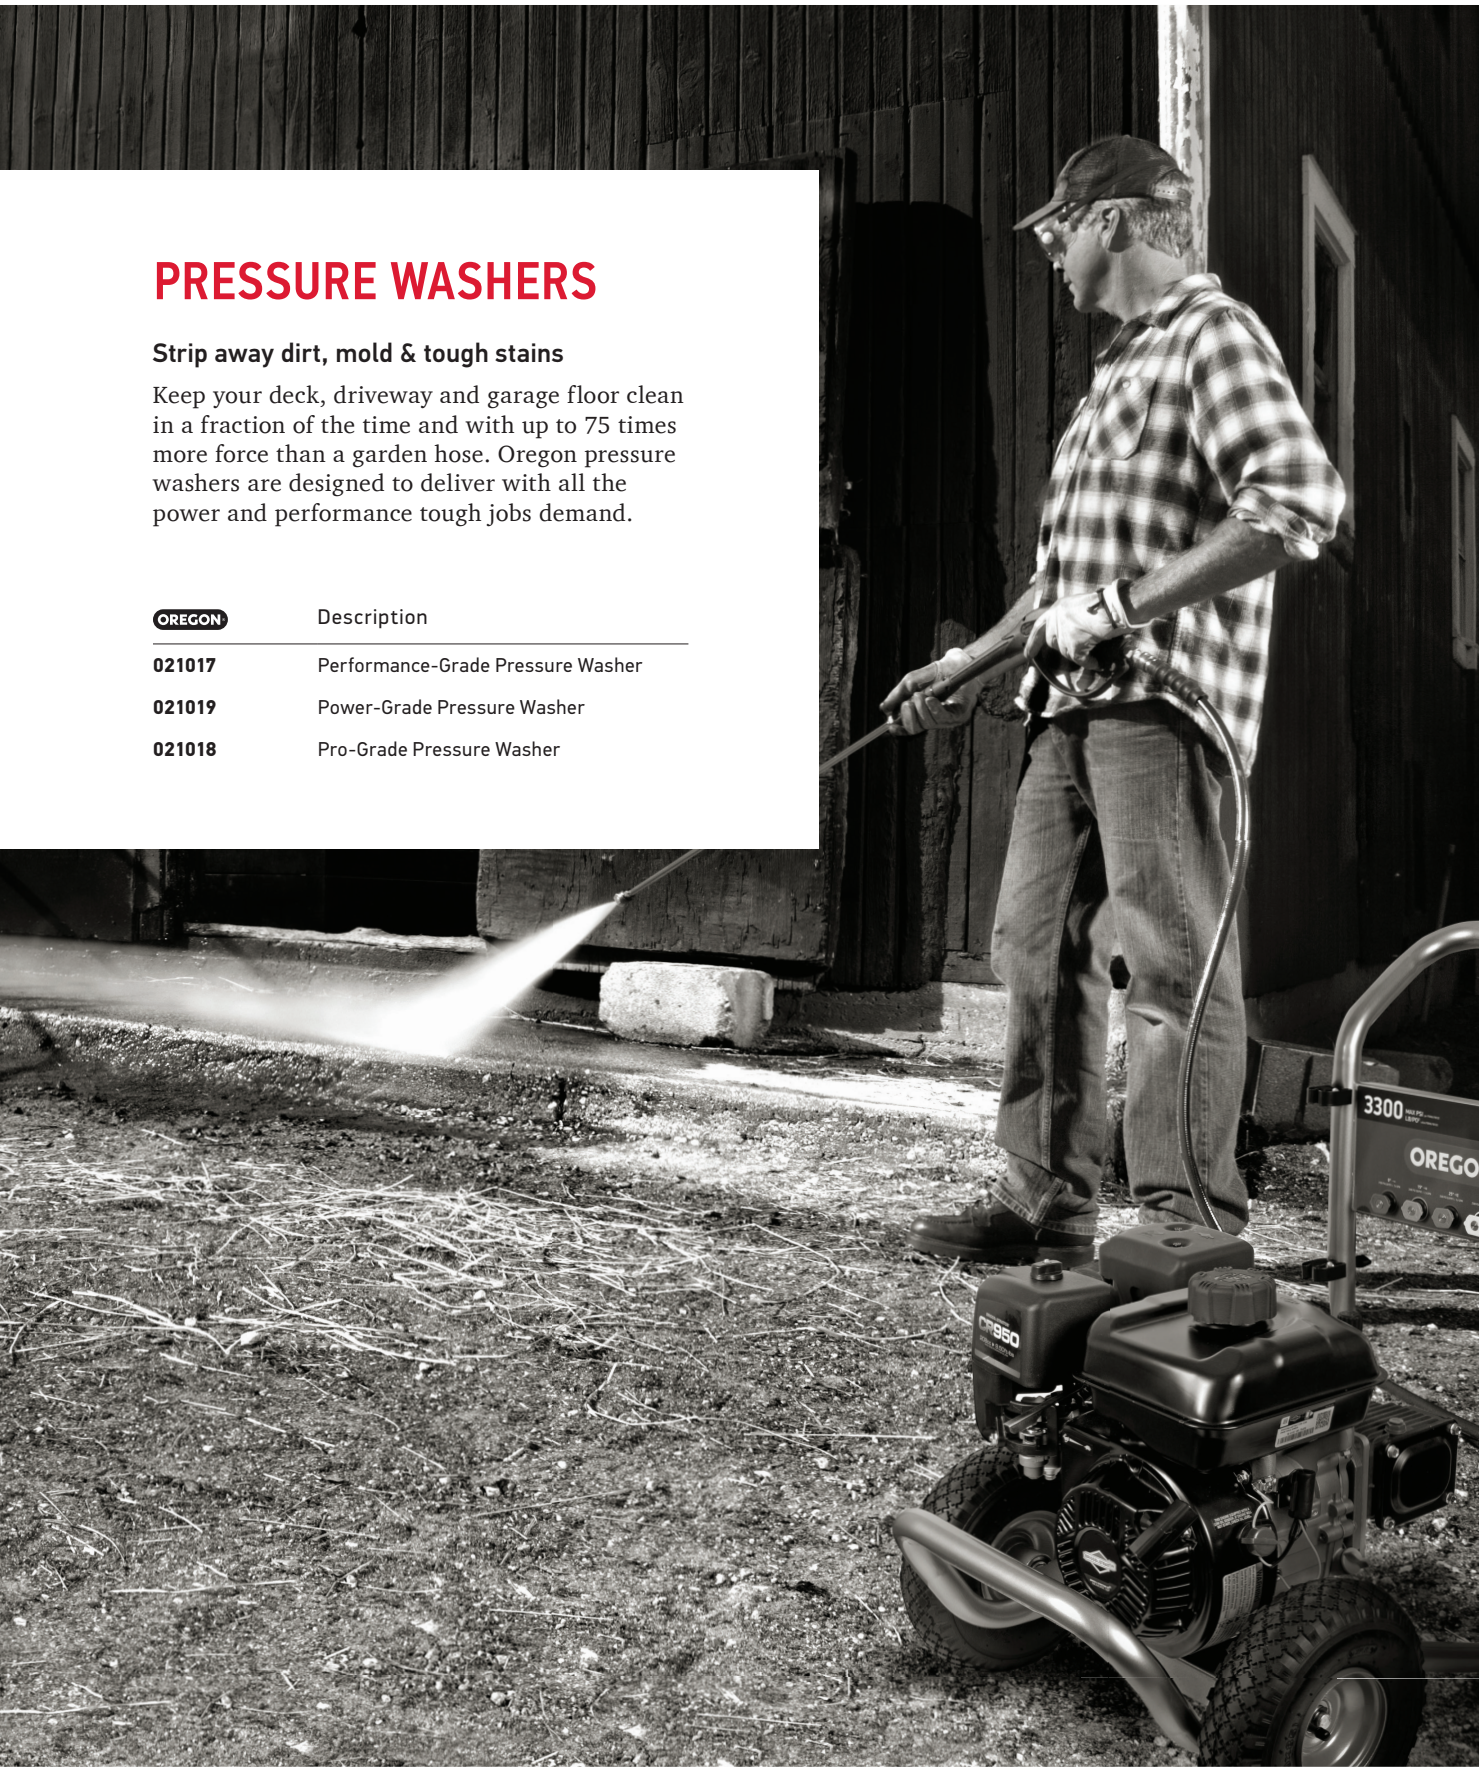
OREGON	Description
592361	4-Way Wedge Fits:
	22-Ton Use with Oregon S402022 Log Splitter (serial numbers starting with J, K, or L and ending in 6 or higher)

PRESSURE WASHERS

Strip away dirt, mold & tough stains

Keep your deck, driveway and garage floor clean in a fraction of the time and with up to 75 times more force than a garden hose. Oregon pressure washers are designed to deliver with all the power and performance tough jobs demand.

OREGON	Description
021017	Performance-Grade Pressure Washer
021019	Power-Grade Pressure Washer
021018	Pro-Grade Pressure Washer



Performance-Grade

Model 021017

Designed for user convenience and performance optimized for most standard household tasks including general cleaning of garage floors, fences, sidewalks, vehicles and patio furniture.

+ Engine never requires an oil change
+ Maintenance-free axial cam pump is designed for simple, easy starts
+ Fold-down handle allows the unit to be stowed quickly and neatly
+ Detergent Injection System siphons cleaning solution into water stream

Power-Grade

Model 021019

Built to deliver the power and durability required for more demanding household tasks including paint preparation, oil stain removal and cleaning of driveways, siding and second stories.

+ Consistent power for tougher tasks
+ Heavy-duty, performance matched axial cam pump
+ Durable welded steel frame stands up to the demands of heavy-duty, high-volume use
+ Detergent Injection System siphons cleaning solution into water stream

Pro-Grade

Model 021018

Engineered to provide all the power and durability required to tackle tough tasks, like paint preparation. With adjustable water pressure this unit is also ready for light-duty tasks like vehicle cleaning.

+ OHV gas engine delivers more power for tougher tasks
+ High performance triplex pump features an adjustable pressure regulator for variable output velocity (PSI)
+ Durable welded steel frame to withstand the demands of heavy-duty, high-volume use
+ Detergent Injection System siphons cleaning solution into water stream

	Performance-Grade 021017	Power-Grade 021019	Pro-Grade 021018
Max Velocity Output	2800 PSI	3100 PSI	3300 PSI
Max Volume Output	2.1 GPM	2.7 GPM	2.5 GPM
Area of Work / 10 minutes	120 ft^2	150 ft^2	150 ft^2
Engine	Briggs & Stratton® 725EXi Series™ 163cc	Honda® GC190 187cc	Briggs & Stratton® CR950 Series 208cc
Quick-Connect Tips	0°, 15°, 40°, Soap	0°, 15°, 25°, 40°, Soap	0°, 15°, 25°, 40°, Soap
Hose Length	25 ft.	30 ft.	30 ft.

ANSI Information

Customer Safety Information: Important

To dealers: For customer safety, this is a must read.
This insert covers provisions of the safety standard, "ANSI (American National Standards Institute) B175.1". It describes requirements that are designed to reduce the risk of injury due to kickback from chainsaws sold in the United States. Kickback is a rapid upward and backward motion of the chainsaw. It happens when the moving saw chain, near the upper part of the tip of the guide bar, contacts an object—for example, a log or a branch. The ANSI standard contains test methods. And these methods check the kickback potential for chainsaws and replacement saw chain.

To help you keep your customers safe, we have included an Oregon Saw Chain Classification Chart. It helps you choose the right replacement saw chains. And, it helps maintain compliance with the ANSI standard.

Chainsaws and the ANSI standard
The ANSI standard divides all gasoline powered chainsaws into two groups:

- Below 3.8 cubic inch displacement (62 cc)
- 3.8 cubic inch displacement (62 cc) and above

According to the ANSI standard, chainsaws below 3.8 cubic inch displacement (62 cc), have to meet low kickback performance requirements (paragraph 5.11.2.1). The manufacturer is required to mark these chainsaws. These chainsaws are required to be durably marked in a lasting manner to identify at least one replacement bar-and-chain combination that has been evaluated with that chainsaw power head and that will provide low kickback performance.

Chainsaws that have 3.8 cubic inch displacement (62 cc) and above, can follow ANSI low kickback provisions. But they are not required to do so. Chainsaws that don't meet the low kickback performance requirements need identification. Specifically, a warning, such as the following:

WARNING: This chainsaw is capable of severe kickback that could result in serious injury to the user. Do not operate this chainsaw unless you have extraordinary cutting needs and experience and specialized training for dealing with kickback. Chainsaws with significantly reduced kickback potential are available.

Replacement saw chain and the ANSI standard
When you replace the saw chain on chainsaws below 3.8 cubic inch displacement (62 cc), you have to use a low kickback chain of the proper pitch, gauge, and drive link count. That keeps the chainsaw in compliance with the low kickback provisions of the ANSI standard. Oregon provides replacement saw chain and we label it according to the ANSI standard. See the green highlighted chain types in the saw chain classification chart included. These are low kickback. The yellow highlighted chain types are not low kickback. These should be used only by people with experience and specialized training for dealing with kickback.

Green label chain is low kickback chain

The green label reads:

ATTENTION: READ THIS
WARNING: This saw chain met the kickback performance requirements of ANSI B175.1-2012 when tested according to the provisions of ANSI B175.1-2012. Low kickback saw chain meets the kickback performance requirements of CSA Standard Z62.3.

Yellow label chain does not comply with the low kickback requirements of the standard

The yellow label reads:

ATTENTION: READ THIS
WARNING: The saw chain in this package may be capable of kickback that could result in serious injury to the chainsaw operator or bystanders. Do not use this saw chain unless you have experience and specialized training for dealing with kickback. Saw chain with reduced kickback potential is available.

Replacement guide bars and the ANSI standard
The ANSI standard states:
Because of differences in replacement guide bars, the following guidelines shall be considered to determine kickback energy:

A. Sprocket nose guide bars with the same effective length, the same number of sprocket nose teeth, the same nose radius, and the same pitch may be considered to have the equivalent kickback energy.
B. A hard-nose guide bar having the same effective bar length, and the same or smaller nose radius as a sprocket-nose bar, may be considered to have equivalent or less kickback energy than the sprocket nose bar.
C. Kickback energy of all guide bars may be considered to be less for smaller nose radius sizes.

When replacing guide bars, in order to maintain approximately the same kickback energy of a chainsaw, the nose size (radius), or number of teeth in a sprocket nose bar, of the replacement bar should be equal to or smaller than the original equipment nose – with the same bar length.

Oregon® Saw Chain Classification Chart

Low kickback saw chain

Part numbers of Oregon saw chain that follow the ANSI low kickback standard (paragraph 5.11.2.4) are listed below. Packages of Oregon low kickback saw chain carry this authorized UL Classification Marking:

LOW KICKBACK SAW CHAIN IN ACCORDANCE WITH ANSI/OPEI B175.1-2012, PARAGRAPH 5.11.2.4 AND WITH CSA Z62.3
This saw chain met the kickback performance requirements of ANSI B175.1-2012 when tested according to the provisions of ANSI B175.1-2012. Low kickback saw chain meets the kickback performance requirements of CSA Standard Z62.3.

Saw Chain Pitch	Part Numbers by Gauge .043"	.050"	.058"	.063"

Dealer Responsibilities

Dealers, use extra caution if your customer wants:
Cutting chain that does not meet the low kickback provisions of the ANSI standard, or any replacement guide bar with a nose radius larger than the original-equipment nose.

Oregon urges you — and all of our dealers — to advise these customers that this choice brings added risk of injury. Note also, that customers can buy the chains and bars that meet ANSI low kickback performance requirements. In accordance with ANSI, dealers should advise customers not to use yellow label chain if they do not have experience or specialized training for dealing with kickback.

Oregon chain package labeling
Boxes of Oregon chain are identified on the outside. We identify them using a green or a yellow label. Oregon preprints loop boxes and sheets of labels with the required ANSI kickback information. These preprinted loop boxes and labels are packed inside reel boxes of Oregon chain. Dealers must pack loops of chain into the loop box that has the corresponding green or yellow ANSI information. If you are not using a preprinted loop box, then apply the corresponding green or yellow label to either: the chain, the saw's guide bar or the invoice at the time of sale. Extra boxes and labels are available through your Oregon distributor.

Dealer expertise
You can help your customers stay safe and get the job done right. As you learn more, you'll know exactly which products are right for the job. Getting familiar with the chainsaw fit-up information in this catalog is a good first step.

The fit-up and application information in this catalog are based on data pulled from a variety of sources.
This guide can help you choose products that are right for your customer. But a note of caution — it is possible that some of the information provided contains errors. That's because it's not possible to account for variations in cutting conditions. Or, for how people might use these products from region to region. Dealers should confirm all data and information provided herein. Oregon disclaims all responsibility for any errors contained in this catalog. All dealers are urged to become as knowledgeable as possible about:

- Local conditions and customer needs
- Kickback, and how you can help limit your customers' exposure to injury
- Issues specific to Oregon products, including our end-use symbols, Intenz® guide bars and Guard Mate® bar-nose tip guards, as seen in these pages

Important Information

Choosing Oregon® Products – Important Information

Guard Mate® Bar-nose tip guards

Some chainsaws include a bar-nose tip guard as original equipment (including Echo, Homelite and Ryobi models). Be aware that while some Oregon replacement bars and bar noses have holes for mounting a Guard Mate tip guard, most bars and bar noses do not.

WARNING: Some chainsaws come with bar-nose tip guards. Removing the bar-nose tip guard increases the risk of kickback. The operator, or bystanders, could be seriously hurt. If you replace the bar or the bar nose, make the right choice. Choose bars and bar noses with holes to mount a bar-nose tip guard. And follow the manufacturer's instructions.

Selection and Installation of Oregon Intenz® Guide Bars

Intenz guide bars have our patented Intenz chain tensioning mechanism built right into the bar itself. You can read and follow the information about Intenz guide bars in this section.

Replacing the bar on saws equipped with an Intenz guide bar

Chainsaws originally equipped with an Intenz guide bar do not have a "bar adjustment mechanism" for tensioning the chain. Chainsaws which have been adapted to take an Intenz guide bar have had the bar adjustment mechanism removed. Since these saws have no bar adjustment pin, always replace an Intenz guide bar with another Intenz guide bar. That way, you maintain the saw's ability to properly tension the saw chain.

Replacing a standard bar with an Intenz guide bar

An Intenz bar can be fitted to any chainsaw with a compatible motor mount pattern. If the saw has a bar adjustment mechanism, the mechanism must be removed.

WARNING: Do not use standard-type non-Intenz guide bars on chainsaws without a bar-adjustment mechanism. Be sure to tension the chain correctly. A loose chain can jump off the bar and seriously injure the operator and bystanders. You cannot maintain chain tension on a non Intenz guide bar without the mechanical stop from the saw's bar-adjustment mechanism.

Oregon Maintenance and Safety Manual

More information on the safe and effective use of Oregon saw chain, guide bars and sprockets is available in our Oregon Maintenance and Safety Manual. Oregon urges you, and all of our dealers to read and follow the instructions in this manual. We recommend that our dealers urge their customers to do the same.

Oregon Maintenance and Safety Manuals are printed in English, French, and Spanish and available from your authorized Oregon distributor, or by contacting Oregon directly.

PRODUCT FAMILIES

Oregon® understands that the needs of woodcutters – professionals and novices – are as diverse as the terrains and environments in which they work.

We have organized our saw chains into product families with key characteristics that different users will value. These product families will help ensure that you choose the right chain based on your everyday needs — helping to make understanding the differences between our chains effortless.

PROFESSIONAL USERS

Loggers, arborists, orchardists, millwrights, forestry workers, and other highly skilled woodcutters require products designed for the demands of their tough professions. Oregon makes products that are strong and durable, with state-of-the-art features that promote a long lifespan and make the products easier to use.

Oregon has developed product families designed for all professional woodcutters. They range from bars and chain that provide more control in the cut to precision cutting systems for the most experienced users. We also make specialty products for the toughest conditions and ripping chain used in saw mills.

PowerCut™
SpeedCut™
VersaCut™
ControlCut™
DuraCut™
RipCut™

OCCASIONAL USERS

If you only use chainsaws occasionally, Oregon makes several products to meet your needs.

Oregon's occasional user products are perfect for trimming trees, cutting firewood, and maintaining your property.

These bars and chain are easy to use and easy to maintain, featuring technology that reduces kickback.

AdvanceCut™
PowerSharp®
Single Rivet (guide bars only)

Detailed information about each product family can be found on these pages:

Saw Chain → FOR 110–155
Guide Bars → FOR 156–187

A. The bar-and-chain application tables are organized by chainsaw brand names, shown in alphabetical order

B. Saws less than 3.8 cubic inches (62cc) are shown with a green triangle . Low kickback performance requirements in the ANSI standard apply to these saw models

C. Saws 3.8 cubic inches and larger are shown with a yellow triangle . Low kickback performance requirements in the ANSI standard do not apply to these saw models

D. Saw models are listed and further broken down into groups, with each saw model group having its own set of recommended bar-chain applications. Note: Saws made for use with multiple pitches of chain will be listed in more than one saw-model group

E. The bar-chain applications for each group of saw models are organized in sections, with each section headed by one pitch, one gauge and the recommended chain(s) having that pitch and gauge. There are multiple sections of applications for most saw-model groups depending on how many chain gauges, or other product variables apply to each group

F. Spur sprockets and rim systems can vary by tooth count. The common drive sprocket tooth count is shown

G. Where applicable, Intenz or Narrow Kerf saw chain and guide bars applications are grouped and show under the chainsaw model numbers

H. Footnotes at the bottom of the pages provide references to other areas of the catalog where tools, safety, packaged, and speciatly products are found

I. PowerSharp systems are available for some OEM saw models

See our guides for chainsaws with a **green triangle** on pages FOR 2–3

See our guides for chainsaws with a **yellow triangle** on pages FOR 2–3

Saw chain complies with low kickback performance requirements (FOR 2–3)

Saw chain does not comply with low kickback performance requirements (FOR 2–3)

H

For information on our PowerSharp Kits see pages FOR 144–145

Ordering Oregon Saw Chain

Chain Packaging & Saw Chain Ordering

Note: Dealers must provide customers with the correct-color label, or loop box (green or yellow) with each sale of each chain part number. Sufficient ANSI labels or printed loop boxes are provided in the original factory reel shippers containing Oregon chains. Below are additional loop boxes that may be ordered. See FOR 2–3 for full details on correct labeling of chain sales.

Package Type	OREGON	Description
Loop Packaging	**591063**	Loop Carton 25-pack (Yellow ANSI), Black
	591062	Loop Carton 25-pack (Green ANSI), Black
	591061	Loop Carton 25-pack (Green ANSI), Grey

Ordering Oregon Chain

Overview of Packaging Changes

Product Families and Package Colors
We have redesigned our packaging to help you identify the products that are right for you. We created three tiers of user-friendly product families, differentiated by color, to simplify your selection process.

PROFESSIONAL USERS	OCCASIONAL USERS	BASIC PRODUCTS
PowerCut™ SpeedCut™ VersaCut™ ControlCut™ DuraCut™ RipCut™	AdvanceCut™ PowerSharp®	Single rivet guide bars Accessories

Professional Users will see premium features designed for their jobs in black packaging.

Occasional Users can find products with features geared specifically for them in gray packaging.

Basic Products are identified by white packaging.

Package Materials and Durability
You'll notice a real improvement in our packaging; we've used higher quality materials and superior construction for better durability.

Clear Communication and User-Friendly Layout
You can identify and choose the right product through the following:

- Product family
- Part number
- OEM chainsaw fit up
- Product information
- Window for product visibility
- Bar motor mount exposed for easy identification
- Areas to write product information

Guide Bar & Saw Chain Combos

Oregon® Guide Bar & Chain Combos by Motor Mount Number

Our updated line-up of Oregon bar and chain combos puts many of our most popular products together in attractive packaging for ease of selection and increased sales. The new visual graphic style we are introducing on the display packaged loop line-up is carried over into our refreshed guide bar & chain combo offering. The complete Oregon merchandising program lets you move guide bars and chains out of your back room and into your showroom.

SpeedCut™ Nano Cutting System

80 TXL Saw Chain, .325" Low Profile™ Guide Bar, Sprocket

LEAD THE CHARGE

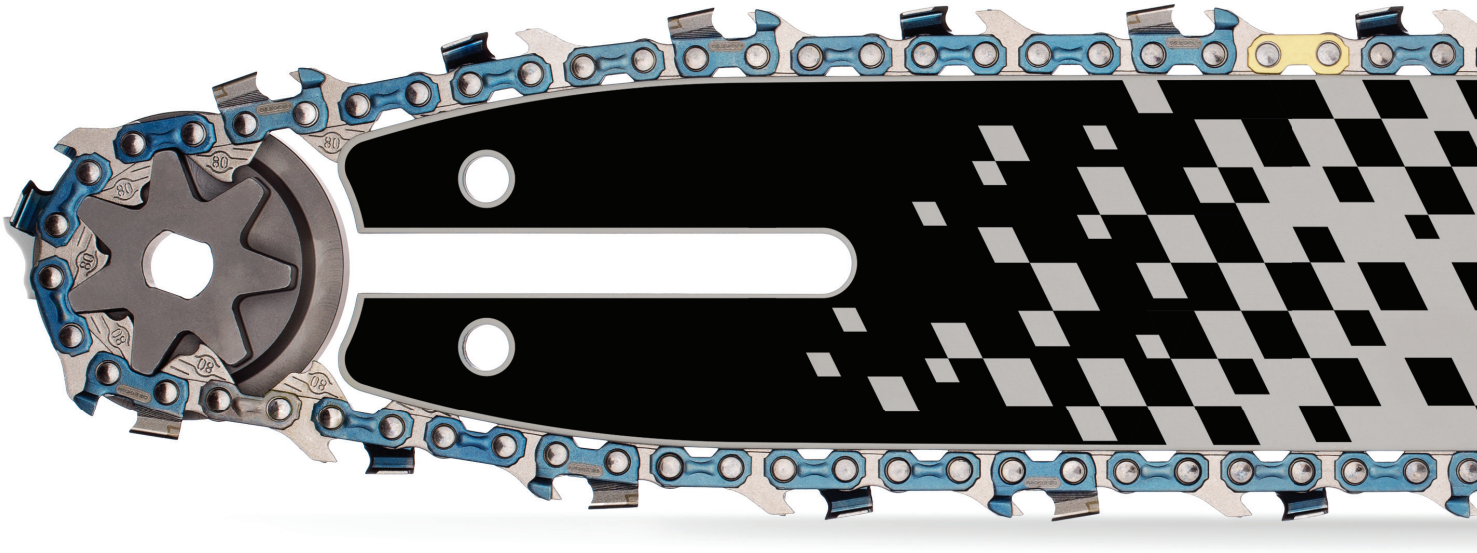
Whether you're pruning or topping, your work demands you have the right tools for the job. Work smarter and get the most from your saw with the latest innovation in cutting from Oregon.

Introducing Oregon SpeedCut™ Nano, an all-new .325" Low Profile™ cutting system specifically engineered to optimize performance on battery-powered and compact light-weight gas chainsaws (20–38 cc).

ALL-NEW SYSTEM

SpeedCut™ Nano has been engineered from the ground up with maximum efficiency in mind. Built to optimize saw performance, SpeedCut Nano meets the demands of tree care professionals like no other system on the market.

SpeedCut Nano is the first ever .325" Low Profile™ cutting system. By sizing the chain to better match the specific power range of battery-powered and compact light-weight gas-powered saws, we've maximized the chain's efficiency for improved performance.



Saw Chain

LONGER RUN TIME
The unique design of SpeedCut Nano 80TXL increases saw cutting efficiency by as much as 20% in bucking and 90% in boring.* So you can spend more time working, and less time recharging or refueling.

INCREASED SPEED
New patented-shape, Nano cutters are designed to maximize cutting speed, empowering compact saws to take on big projects. Oregon's multi-axis factory grind creates a razor sharp edge, providing exceptional cutting performance right out of the box.

SMOOTH CUTS
With a clean entry, SpeedCut Nano pulls effortlessly through the cut – nearly eliminating cutting chatter. Oregon's Micro-Chisel® cutter stays sharp in tough conditions while providing a precision surface quality professionals expect.

UNSTOPPABLE PERFORMANCE
Because SpeedCut Nano has been designed for the specific power range of today's battery and compact gas saws, you won't be left stalled in the cut.

Guide Bar

Power through the day with a guide bar engineered specifically for 80TXL saw chain. Designed for professionals, the high-strength body and performance-driven nose components are constructed to exacting tolerances. When the job demands accurate cuts with unmatched speed and endurance to run all-day without downtime, professionals choose SpeedCut Nano.

80TXL must be used together with the corresponding guide bar and sprocket and is not compatible with other existing cutting systems

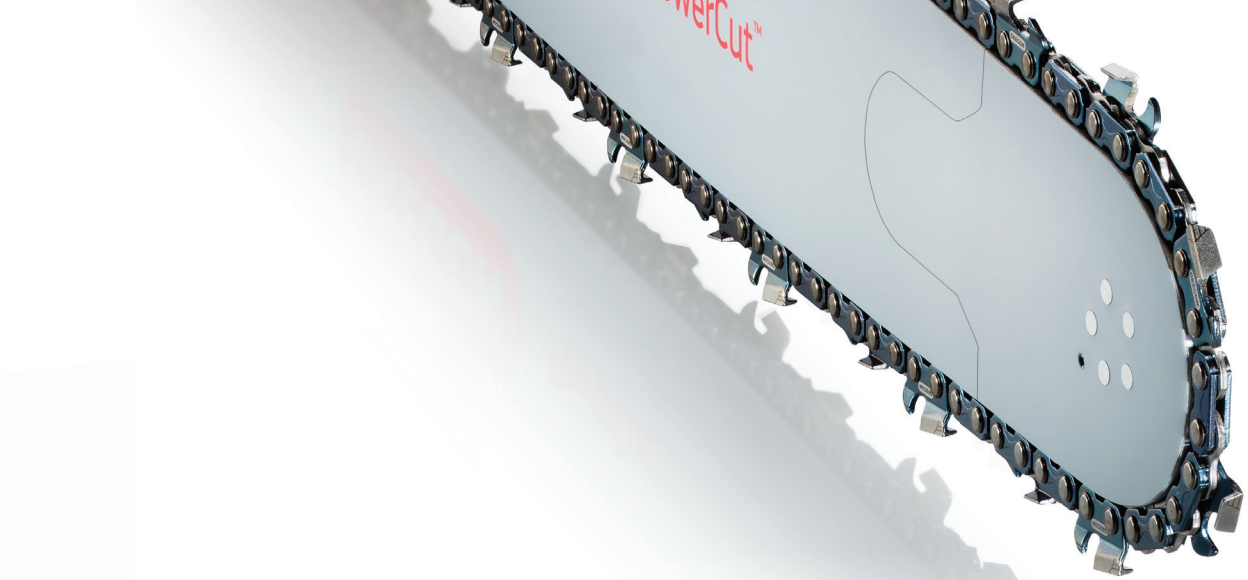
PowerCut™ 70-Series EXL

An Evolution to the Popular LGX 3/8" Professional Saw Chain

REPUTATIONS ARE BUILT WITH EVERY CUT



Keep Your Edge

With every cut, your reputation is on the line. That's why we've spent generations engineering the sharpest, fastest professional cutting systems in the world. Day in and day out, the PowerCut 70-Series EXL full chisel cutters help you power through timber with speed, efficiency, and precision.

Designed to maximize every cut, our proprietary cutter technology gives users a sharper, more durable cutting edge that provides increased cutting performance with less effort. We're constantly raising the bar, pushing ourselves to exceed the demands of the professionals who rely on us to make the job feel less like work.

Advantages

- Multi-axis grind technology for superior performance, sharpness, and consistency
- Reshaped cutter powers through timber with speed, efficiency, and precision
- Designed to reduce the force applied by the operator
- Engineered to utilize the power of today's professional saws
- LubriTec™ keeps your saw chain and guide bar oiled for less friction and longer life
- Gold Loop Start Indicator makes sharpening easier with start and stop identification

Oregon Features – Lubrication

LubriTec™
OILING SYSTEM

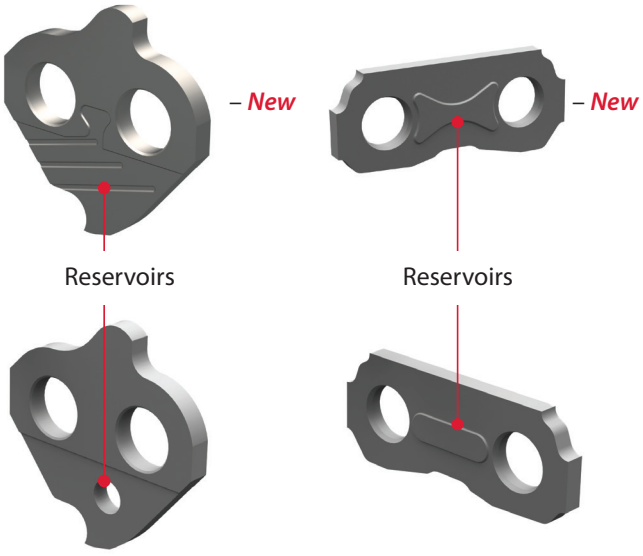
You want tools to work smarter and last longer. We designed LubriTec to deliver the best possible lubrication for your saw chain. Keeping lubrication where it's needed most means a longer lasting saw chain and guide bar and less down time. Here's how it works:

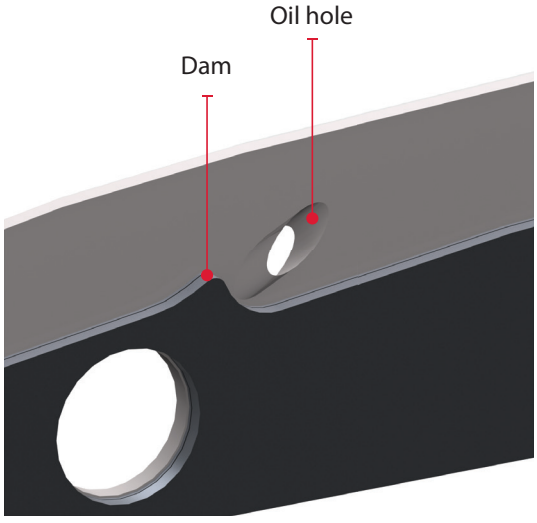
LubriTec for the Chain*

- Lubricant is held inside LubriTec reservoirs
- Oil flows freely into and around the saw chain parts and the guide bar. Oil is held in the high-friction zone where the saw chain and guide bar groove walls make contact.
- The presence of lubricant lowers friction during the start-up period before the saw's oiling system reaches its peak function
- LubriTec strengthens the saw chain tie straps and reduces their tendency to flex during operation, making a more stable and durable saw chain

LubriTec for the Guide Bar*

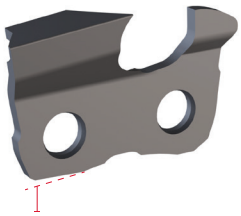
- Our LubriTec guide bar dam is cleverly designed to keep lubricant where it's needed most. It looks like a small barrier and is found in the bottom of the guide bar's groove, just behind the oil hole. It both increases available oil and reduces oil hole plugging. Resulting in better overall lubrication.
- The LubriTec angled oil hole virtually eliminates guide bar oil hole plugging. The oil hole slopes up toward the top of the guide bar and forward toward the nose. It's approximately 40% smaller in diameter than a standard hole, increasing velocity as oil enters the guide bar. It also helps clear sawdust and debris away from the hole during operation.





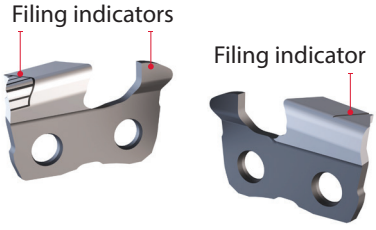
*Combination of features will vary by chain and bar products

Oregon Features – Saw Chain



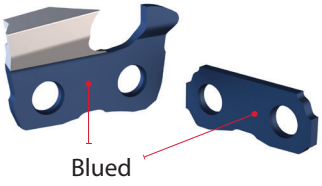
Low Vibration

Less vibration equals more comfort. We wanted to lessen vibration-induced white finger (VWF), so we created a small space between the saw chain and the guide bar. A lot of the energy gets dissipated by the saw chain, acting as a shock absorber. It never reaches the guide bar, the saw — or most important — the operator. Our low vibration design reduces vibrations by 25% or more.



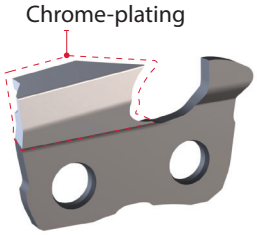
Filing Indicators

Your sharpening made easier and more accurate. Special filing marks show the best top-plate angle. Lines make it easier for filing the correct top-plate angle and help maintain equal cutter lengths. Filing indicators show you when cutters have reached the end of their life. Cutters should not be sharpened beyond the line.



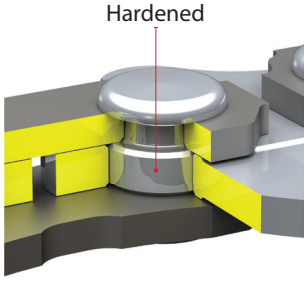
Blued Components

Our Blued Components give you high-quality resistance to corrosion with the presence of protective oil. A precise and controlled tempering process results in a blue surface, designating our best-in-class saw chain.



Chrome-Plated Cutters

Your chain stays sharper, longer. Oregon electroplates a layer of industrial hard chrome to all our saw chain cutters. Chrome delivers a harder surface and better wear resistance. So you spend more time cutting and less time filing or grinding the chain.



Hardened Rivets

For a longer working saw chain, Oregon induction hardens and quenches all saw chain rivets, delivering a high-quality, load-bearing surface that resists wear and improves strength. Less wear and chain stretch means fewer chain tension adjustments.

Chain Cutter Sequence Terminology

Standard

Semi-skip

Skip

Why Choose “Semi-Skip” or “Skip” Sequence Chain?

Consumer users of chainsaws will probably never need to use a semi-skip or skip sequence chain. However, professional or commercial chainsaw operators who use their saws frequently and who use longer bars may prefer a semi-skip or skip chain for these reasons:

- Fewer cutters to sharpen makes sharpening faster and r
- Greater clearance for better chip flow – the larger the wood being cut and the longer the bar used, the more important good chip flow becomes
- The type of wood being cut and other factors will affect the choice of the chain type and chain sequence, but with the full-size 3/8" pitch and .404" pitch chains, preferred by professional and commercial operators who use longer bars, the following general guidelines will be useful

Bar Length considerations for semi-skip and skip chain:

Chain Sequence	Recommended Bar Lengths
Standard	Up to 24" (60 cm)
Semi-Skip (Square Ground only)	24" to 32" (60 – 80 cm)
Skip	32" and longer (80 cm+)

Product Families

Oregon understands that the needs of woodcutters – professionals and novices – are as diverse as the terrains and environments in which they work.

We have organized our saw chains into product families with key characteristics that different users will value. These product families will help ensure that you choose the right chain based on your everyday needs — helping to make understanding the differences between our chains effortless.

To help easily identify our tiers of products, packaging is differentiated by color. Product within families meeting the needs of occasional users will be indicated by gray packaging. Product families targeted at demanding professional users will be indicated by black packaging.

Chain for High-Performance Saws

PowerCut™
The ultimate saw chain for loggers and skilled forest workers who use high performance saws. Full chisel cutters power through timber with speed, efficiency, and precision.

SpeedCut™
Faster, cutting performance for wood-cutting professionals who use mid-size saws under 55cc. Narrow kerf system requires less power to cut through high volumes of wood quickly and easily.

VersaCut™
Designed for landowners and tree-cutting professionals who require a multi-purpose, high performing saw chain. Uses cutters designed for maximum durability and versatility.

ControlCut™
Ideal for wood cutting professionals looking for a fully featured cutting system that delivers smooth cutting and reduced kickback. Easy to maintain saw chain, with a forgiving sharpening profile.

DuraCut™
Made for woodcutters working in abrasive and tough environments. Advanced plating process with extra layers of chrome extends sharpness up to three times longer than conventional saw chain.

RipCut™
Created specifically for chain-type sawmills. Produces smooth ripping cuts with supreme efficiency to make precise boards and planks.

Chain with Reliable Performance

AdvanceCut™
Perfect for homeowners cutting trees on their property and for landscape professionals who occasionally cut wood. User-friendly because of the low kickback designs.

PowerCut™

Highly-experienced loggers and skilled forest workers require precision, power, and speed to get through a hard day's work.

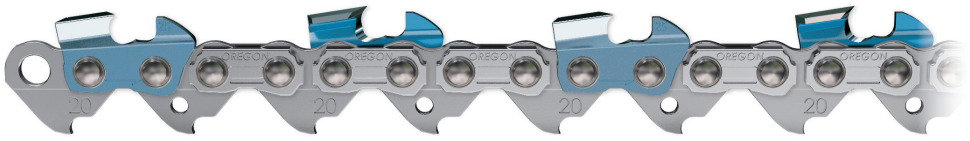
Oregon's PowerCut saw chain possesses all of those qualities. PowerCut uses full chisel cutters that cut quickly through timber with precise cuts. Available in two cutting styles: traditional round ground and square ground options for more efficient cutting when logging the largest timber.

If you require top performance during a long day of logging, then PowerCut is the right cutting system for you.

• Speed • Power • Precision

PowerCut™

20, 21, 22 LGX NEW



The all-new 20-Series LGX has been engineered to harness the power of today's high-performance saws. Blued, full-chisel cutters and advanced LubriTec™ oiling features mean this chain is ready to work as hard as you are.

Features and Benefits

- LubriTec keeps your saw chain and guide bar oiled, for less friction and longer life
- Blued Cutters deliver high-quality protection against corrosion
- Top-Plate Filing Indicators makes accurate sharpening easy
- Our exclusive OCS-01 Steel delivers greater durability

SpeedCut™

Whether you're an arborist or a firewood cutter, high volumes of wood require speed, efficiency, and a strong performing saw chain to get the job done right. Oregon's SpeedCut exemplifies the efficiency, speed, and top performance of the entire SpeedCut cutting system.

SpeedCut is easy to use because it uses a narrow kerf cutting system and is easy to maintain. Narrow kerf requires less power than other cutting systems, making more efficient cuts that allows you to finish the job quickly and easily. Professionals will appreciate SpeedCut's unbeatable performance, and will love how easy it is to maintain.

• Efficiency • Fast • Easy

Narrow Kerf

95 TXL

Work faster, sharper, easier, with a more efficient saw chain. Ideal for arborists and property owners who want top performance. 95TXL is for saws up to 55 cc. (Replaces 95VPX.) Oregon® SpeedCut 95TXL narrow kerf cutting systems are more efficient, needing less power from the saw than standard cutting systems. Low-vibration, Micro Chisel cutters have small-radius working corners for excellent performance and easy maintenance. Get a faster, easier cuts with a reshaped cutting surface. A sharper, more durable cutting edge from a new precision grind and optimized cutting angle. Always use SpeedCut narrow kerf chain in combination with SpeedCut or other narrow kerf bars.

Features and Benefits

- LubriTec™ keeps your saw chain and guide bar oiled, for less friction and longer life
- Blued Cutters deliver high-quality protection against corrosion
- Expanded Top-Plate Filing Indicators and depth gauge Filing Indicators area make accurate sharpening easier
- Gold Loop Start Indicator makes sharpening easier with start and stop identification

SpeedCut™ Nano

Whether you're pruning or topping, your work demands you have the right tools for the job. Work smarter and get the most from your saw with the latest innovation in cutting from Oregon.

Introducing Oregon SpeedCut™ Nano, an all-new .325" Low Profile™ cutting system specifically engineered to optimize performance on battery-powered and compact light-weight gas chainsaws (20–38 cc).

• Speed • Runtime • Smooth

80TXL must be used together with the corresponding guide bar and sprocket and is **not compatible with other existing cutting systems.**

80 TXL NEW

SpeedCut™ Nano has been engineered from the ground up with maximum efficiency in mind. Built to optimize saw performance, SpeedCut Nano meets the demands of tree care professionals like no other system on the market. SpeedCut Nano is the first ever .325" Low Profile™ cutting system. By sizing the chain to better match the specific power range of battery-powered and compact light-weight gas-powered saws, we've maximized the chain's efficiency for improved performance.

Features and Benefits

VersaCut™

Arborists, landscapers, and loggers have encountered every type of tree, shrub, stump, limb, and twig. If it's outdoors and made of wood, you've probably cut or maintained it.

Oregon's VersaCut was designed for you. VersaCut delivers both versatility and durability. The semi-chisel and Micro Chisel® cutters makes sure you stay sharp longer for all-day cutting.

VersaCut is also easy to maintain; and it stays sharp longer in a variety of cutting conditions.

Clean wood or dirty wood, frozen or green, VersaCut is the smart choice for tree professionals.

• Easy • Durable • Versatile

VersaCut

91 VXL

91VXL is a high-performance, Low Profile™ chain. It's ideal for professional arborists and orchardists who use light-weight chain-saws. Cutter top-plates are 33% longer than standard 91 cutters. Low vibration, semi-chisel cutters provide an aggressive cutting edge with a forgiving sharpening profile and good stay-sharp.

Features and Benefits

- LubriTec™ keeps your saw chain and guide bar oiled, for less friction and longer life

ControlCut™

If you own or maintain a property, you will inevitably manage a lot of smaller jobs. They add up fast. Oregon's ControlCut saw chain is ideal for all light-duty work, because it gives you a smooth cut every single time and it's easy to maintain.

ControlCut has the longevity for bigger jobs, too. ControlCut's semi-chisel and Micro Chisel® cutting styles are ideal for property owners who need to cut the occasional tree limb, as well as experienced landscapers and orchardists who cut trees for a living.

ControlCut is low maintenance, and it stays sharper so you get jobs done quickly and easily.

• Smooth • Controlled • Forgiving

ControlCut™

25 AP

Get your smallest jobs done just right. 25AP is light-weight, smooth chain, ideal for pruning — our Micro Chisel® cutters have small-radius working corners for excellent performance, and they are easy to maintain. The 25AP is small and light-weight, making it easy to use and maneuver.

DuraCut™ (formerly MultiCut™)

Woodcutters face challenging environments all the time. Fire-damaged trees can be unstable and require extra care. Trees in sandy environments, like desert ironwood, are notoriously tough on saw chains.

Oregon's DuraCut is made for these environments. DuraCut has an advanced plating process with extra layers of chrome that allows you to cut up to three times longer than conventional saw chain.

Working a site with standard filing tools? No problem. You can use your usual files to sharpen the chain and get back to work. DuraCut is the durable solution for your toughest woodcutting jobs.

• Durable • Tough

DuraCut™

M91 VXL

Work longer in dirty conditions with this more durable version of our aggressive 91VXL chain; cuts up to 3 times longer. 91VXL is a high-performance Low Profile™ chain. Low vibration, semi-chisel cutters provide an aggressive cutting edge with a forgiving sharpening profile. Maintain with standard maintenance tools.

Features and Benefits

- Extra heavy-duty chrome and an advanced plating process enables exceptional durability and stay-sharp
- LubriTec™ keeps your saw chain and guide bar oiled, for less friction and longer life
- Blued Cutters deliver high-quality protection against corrosion

RipCut™

Any saw mill worker will tell you that ripping chain is different from all other saw chains. You need a special kind of chain for ripping cuts, the kind that transforms raw timber into the boards and planks used in homes and businesses. Oregon's RipCut is designed specifically for chain-type sawmills, producing smooth cuts with supreme efficiency.

RipCut's precise ripping cuts give you a smooth surface every time you cut parallel to the wood grain. RipCut isn't recommended for handheld use, but that suits experienced millwrights just fine.

• Ripping • Smooth

RipCut™

72, 73, 75 RD

Specially made for ripping — making cuts parallel to the wood grain. 72, 73, 75 RD has a special ripping application grind for making dimensional boards and planks from larger timbers. For use on chain-type sawmills. Not recommended for handheld use.

Features and Benefits

- LubriTec™ keeps your saw chain and guide bar oiled, for less friction and longer life

Sculptor™

Carvers require precision cutting tools to transform wood of different shapes and sizes into works of art. Sculptor was designed with carvers and precise detail work in mind. Sculptor's Micro Chisel cutters give you the freedom to create fine detail and finishing work.

Sculptor is also easy to maintain and light-weight for optimum maneuverability. It is the perfect tool for carvers, pruners, and any other user who values extra-fine cutting.

25 A

25 F

25A – For users with bars with a nose radius of 12 mm or less designed for carving. Micro Chisel® cutters have small-radius working corners to give you excellent performance with easy maintenance. Small size and light weight make 25A easy to use and maneuver.

25F – For users with bars with a nose radius of 12 mm or less designed for carving. The "full-house" sequencing makes 25F the preferred chain of some carvers cutting fine detail and finishing work. Micro Chisel cutters have small-radius working corners to give you excellent performance with easy maintenance. Small size and light weight make the 25F easy to use and maneuver.

AdvanceCut™

Homeowners need a chainsaw within arm's reach for occasional yardwork and even storm-damaged trees. You also need a saw chain advanced enough to tackle tough jobs, but user-friendly enough and forgiving for occasional use.

Oregon's AdvanceCut was created for "DIY" homeowners because of its solid performance and reliable durability.

Low kickback design makes AdvanceCut an ideal – and dependable – choice for maintaining your property's trees. AdvanceCut is an essential tool for the discerning homeowner.

• Dependable • Advanced

AdvanceCut™

90 PX

Maintain your trees with ease. 90PX offers higher chain efficiency, ideal for small, low-powered saws great for homeowners and landscapers (replaces 90SG). Our narrow kerf cutting systems increase efficiency. They need less power from the saw than standard cutting systems. The narrow .043" gauge reduces the weight of the bar and chain by roughly 15%. Low-vibration, low kickback Chamfer Chisel™ cutters' twin cutting corners offer outstanding performance. They are durable, easy to maintain and forgiving, comparable to round-cornered chains. Bumper drive link paired with depth gauge design, offers reduced kickback with strong performance. Always use with guide bars designed for narrow kerf saw chain.

Features and Benefits

- LubriTec™ keeps your saw chain and guide bar oiled, for less friction and longer life

PowerSharp®

Occasional saw chain users sometimes spend too much time using hand files to sharpen dull chain, or they lose an afternoon taking it to a dealer for professional sharpening. Fumbling an inexact sharpening is a thing of the past with PowerSharp. PowerSharp takes saw chain from dull to sharp in as little as three seconds.

PowerSharp is also ideal for professional users who want greater productivity on the job. Professionals get precise and knife-sharp edges quickly and easily – every time.

• Fast • Easy • Precise

Sharpens On the Saw, On the Job, In Seconds™

PowerSharp® is an easy-to-use, precision sharpening system that gives chainsaw users the power to sharpen their chain in a matter of seconds with a simple attachment. Patent-pending features make PowerSharp a major advance over other sharpening methods.

Easy to Use

PowerSharp is a system that includes the PowerSharp chain, the PowerSharp guide bar, and the PowerSharp bar-mount sharpener. Together, they work to make sharpening simple and easy.

Attach

When the chain dulls, simply attach the bar-mount sharpener to the PowerSharp guide bar. Twin guide holes in the tip of the bar make perfect alignment fool proof.

Sharpen

Press the tip of the sharpener to a solid surface for 3 – 5 seconds.

Cut

And it's back to the job, working faster with less effort.

PowerSharp®

91 PS

Now you can sharpen fast, easy, and on the saw with the PowerSharp system. Includes the 91PS PowerSharp saw chain; a guide bar designed for PowerSharp; and the PowerSharp bar-mount sharpener. Sharpen the 91PS chain in a flash. Go from dull to sharp in just three seconds with this easy-to-use, precision sharpening system. Stays sharp three times longer than 91PX saw chain.

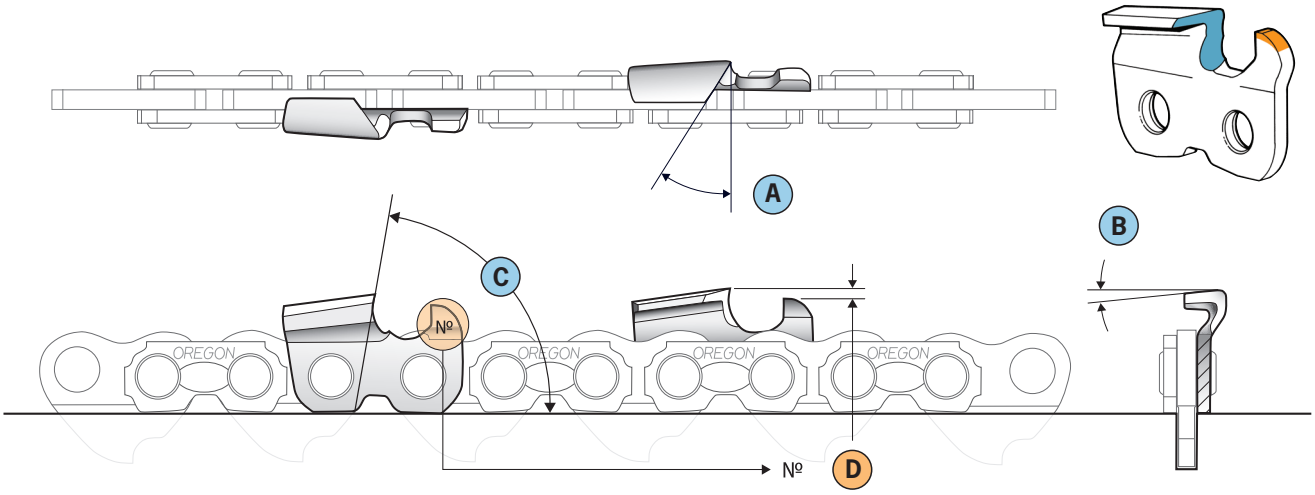
*Please note. On matters of safety or suitability for saw chain NOT manufactured by Oregon, this chart offers no information or comment. Please read and follow all the notes below to use this chart properly.

Notes:

- This chart is meant to help those who want to replace other brands of saw chain with a comparable Oregon chain.
- Many saw chains are interchangeable in terms of their fit-up. But interchanging certain types of chains might not be right for some users. Stay safe. Be certain that the chain you choose is right for both the use, and for your level of experience.
- You can learn more about compliance. Find out about the low kickback performance requirements of ANSI B175.1-2012, or about other safety issues as they pertain to any Carlton, Stihl, or Windsor chain. See the documents on saw chain safety provided by those companies.
- This chart should not be used to replace Oregon saw chain with any other brand of chain. Doing so is a misuse of this chart and those who do so assume any and all risks associated with such misuse.
- Chain part numbers printed in *red italics* are now obsolete. Contact your authorized Oregon distributor for availability.

Saw Chain

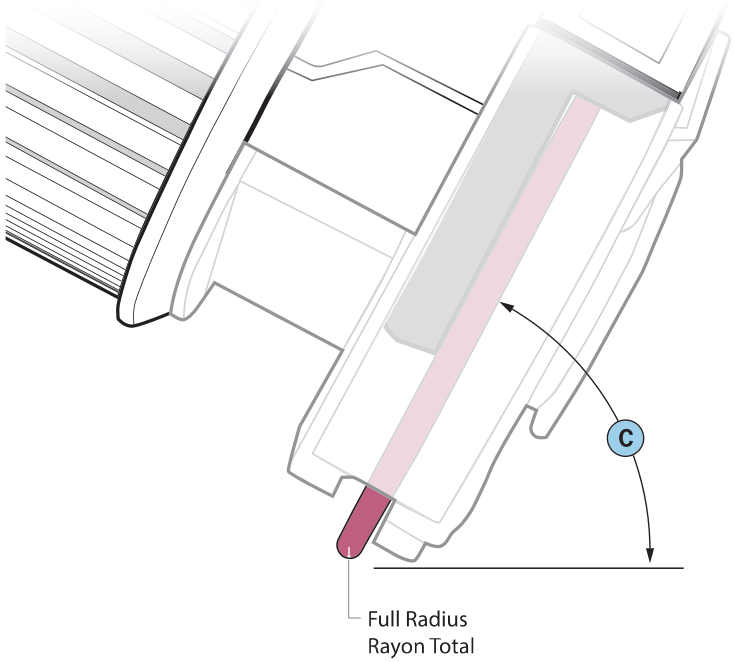
Sharpening Geometry



25 = .025"
30 = .030"
50 = .050"
60 = .060"

Sharpening geometry is universal for all chain types.
See "Filing Angles" or "Grinding Angles" chart on the following pages for recommended A, B, C, or D sharpening or grinding angles by chain type.

Universal Grinding Wheel Dressing



Saw chain complies with low kickback performance requirements (FOR 2–3)
Saw chain does not comply with low kickback performance requirements (FOR 2–3)
Chain part numbers printed in *red italics* have been obsoleted. Contact your authorized Oregon distributor for availability.

❶ When using an Oregon® file guide, ALWAYS hold it level, 0-degrees flat on the Top Plate.
❷ Oregon Depth Gauge File (flat file) P/N 12211 must be purchased separately for use with Oregon Depth Gauge Tools.
❸ Square Ground Filing: A 15° cutting edge is the result when the file is held at 45° top-plate angle and 45° down angle.

Saw Chain

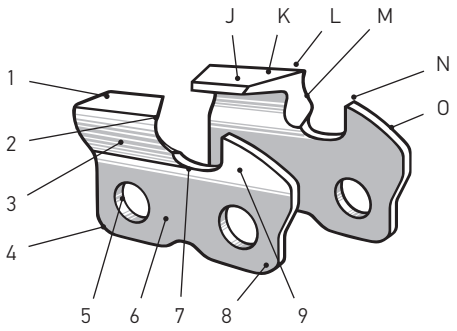
Properly Sharpened Cutter

Cutter features

1. Top Plate
2. Square or Round Working Corner
3. Side Plate
4. Heel
5. Rivet Hole
6. Chassis
7. Gullet
8. Toe
9. Depth Gauge

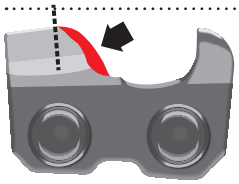


Sharpened Cutters have:

J. Correct angle on top plate (degree of angle depends on chain type)
K. Razor-edge on top plate (no light should reflect from this edge)
L. Slightly protruding "hook" or point (curve on non-chisel chain)
M. Razor-edge (with no nicks) on side plate
N. Top of depth gauge at correct height below top plate
O. Front of depth gauge rounded off

Filing Errors

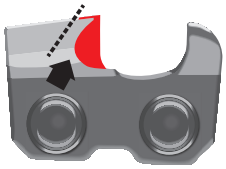
Backslope on side plate cutting edge – cutter won't feed into wood



Cause
File held too high

Solution
Refile cutters to recommended angle

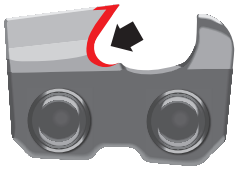
Too-thin top plate causes rapid dulling



Cause
File handle held too low

Solution
Refile properly, at recommended angle

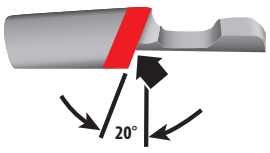
To much hook in side plate cutting edge – cutters grab, cut rough



Cause
File held too low or file is too small

Solution
Refile to recommended angle with right size file

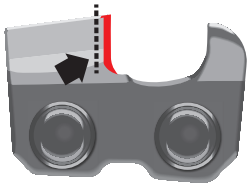
Top plate angle less than recommended – slow cutting, excess wear on chain and bar



Cause
File held at less than recommended angle

Solution
Refile at correct angle

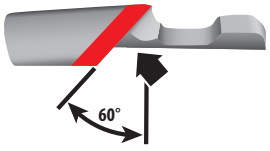
Flat top plate cutting angle – chain won't feed into wood, won't cut



Cause
File handle held too high

Solution
Refile properly at recommended angle

Top plate angle more than recommended – side plate cutting edge is thin and dulls rapidly

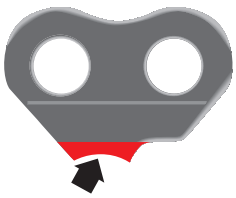


Cause
File held at more than recommended angle

Solution
Refile at correct angle

Drive Link Wear

Rounded concave bottom

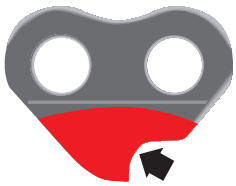


Cause
Shallow grove on bar tip

Solution
Regroove bar tip. Bar may need replacing

Note
Applies to DuraCut™ bars only

Scars on sides

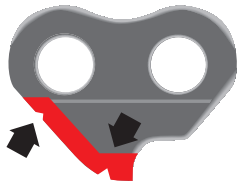


Cause
Loose chain jumping off bar

Solution
Adjust chain tension. Replace bent drive links or replace chain. Refile at correct angle

Drive Link Wear

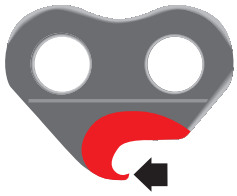
Nicked bottom or back



Cause
Cutting with loose chain, or wrong pitch sprocket

Solution
Adjust chain tension. Install correct sprocket. File off burrs. Replace damaged drive links or replace chain

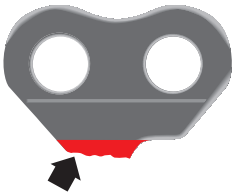
Front point turned up



Cause
Drive links bottoming in sprocket. Sprocket worn

Solution
Replace sprocket. Sharpen tangs. Check for burrs

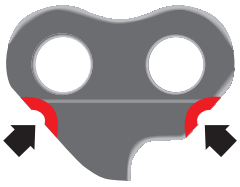
Battered and broken bottom



Cause
Chain jumped bar. Spur sprocket hit drive links

Solution
Replace damaged drive links, sharpen tangs with round file or replace chain. Remove burrs

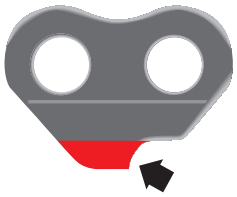
Front or back peened



Cause
Wrong pitch sprocket or pro-longed chain chatter

Solution
Replace sprocket. Adjust chain tension. Chain may be damaged beyond repair

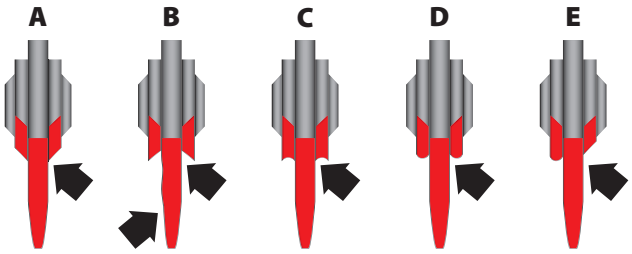
Sides worn round at bottom



Cause
Chain wobbled in bar groove. Uneven cutters or worn bar rails

Solution
Rework bar rails and groove. Correct chain filing

Excess wear on bottom of all chain parts



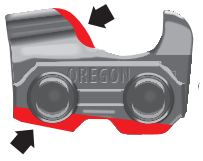
A. Open bar groove B. Severe abrasion and wobbly chain on thin bar rails
C. Rails not flat D. Wobbly chain – rails too thick E. One rail too thin or soft

Cause
Uneven filing, worn bar rails cause chain to wobble

Solution
File chain properly. Recondition bar rails or replace bar. Replace chain if necessary

Cutter and Tie Strap Wear

Excessive heel wear on cutters and tie straps



Causes
1. Blunt top plate filing
2. Forcing dull chain to cut
3. Lack of lubrication
4. Low depth gauge settings
5. Forcing chain to cut frozen wood

Solution
File cutters properly. Don't force dull chain to cut. Use oil freely

Light damage on cutting edges of top and/or side plates

Cause
Excessive pressure on dull or misfiled cutters. Common during winter

Solution
File chain correctly. Use oil freely

Cutter and Tie Strap Wear

Edges burred and notch peened on tie straps

Cause
Chain chatter due to loose chain tension and improper filing

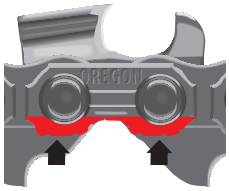
Solution
Correct chain tension. Refile chain properly. Replace sprocket if badly worn

Peened notch in tie strap causing tight joints and broken drive links

Cause
Chain run on badly worn spur sprocket or wrong pitch sprocket

Solution
Replace worn sprocket. Chain may need replacing

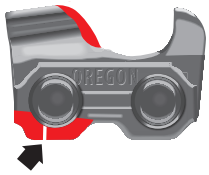
Peening on bottom of cutters and tie strap – causes tight joints



Cause
Loose chain tension. Result of dull cutters and forcing dull chain into wood

Solution
Keep proper tension. Keep cutters sharp. Chain may need replacing

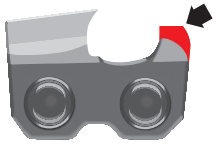
Cracks under rear rivet holes on cutters and opposing tie straps



Cause
Excessive pressure on dull or misfiled cutters – common during winter

Solution
File chain correctly. Use oil freely

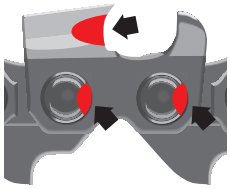
Blunt depth gauge causes rough cutting



Cause
Uneven filing

Solution
Use correct depth gauge jointer to lower gauges evenly

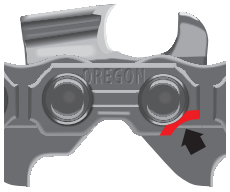
Severe damage on either side of top and/or side plates



Cause
Cutters hit abrasive materials

Solution
File cutters to remove all damage

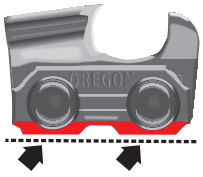
Peening on front corner of cutters and intermediate tie straps – causes tight joints



Cause
Chain striking bar entry. Sprocket too small or loose chain tension

Solution
Use proper bar and sprocket. Adjust chain tension correctly

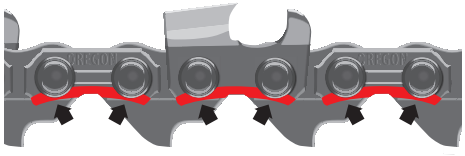
Excessive wear on bottom of cutters and tie straps



Cause
Depth gauges too high. Cutting edge cannot get into wood

Solution
Lower depth gauges to proper setting. Keep cutters filed correctly

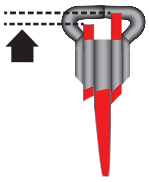
Concave wear on bottom of cutters – connecting tie straps



Causes
Chain tension too tight
Normal wear from undercutting (cutting with top of bar)

Solution
Adjust chain tension Reduce cutting with top of bar

Uneven depth gauge height. Chain won't cut straight.



Cause
Improperly filed depth gauge

Solution
Round off front corner to maintain original shape

Professional

Loggers, arborists, orchardists, millwrights, forestry workers, and other highly skilled woodcutters require guide bars designed for the demands of their tough professions. Oregon® makes guide bars that are strong, durable, and reliable, and our state-of-the-art LubriTec oiling system promotes a long lifespan.

SpeedCut™

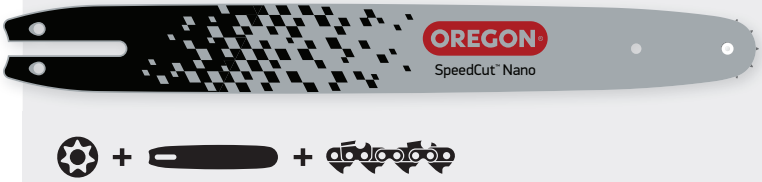
For professionals who cut high volumes of wood. Narrow kerf. Durable and efficient. The lighter weight helps reduce operator fatigue.

VersaCut™

For professionals (like arborists) who cut with a variety of applications. Versatile and durable. The lighter weight helps reduce operator fatigue.

ControlCut™

For users who require smooth and controlled cuts. Smaller radius nose reduces kickback. The lighter weight helps reduce operator fatigue.



SpeedCut™ Nano

The .325" Low Profile™ **cutting system** specifically engineered to optimize performance on battery-powered and compact light-weight gas chainsaws (20–38 cc).

PowerCut™

For loggers and other users who require a tough, heavy-use tool. The chrome-moly body helps reduce wear and promotes a longer lifespan.

DuraCut™

Made for challenging cutting environments. Stellite nose and chrome-moly body promotes ultra high-wear resistance.

Occasional User

Homeowners and other occasional users prize simplicity and reliability for yard work. You need a tool that can cut a stubborn tree or make that Saturday set aside for yardwork pleasant and satisfying. Oregon® guide bars like the Advance-Cut and Single Rivet were designed with occasional users in mind.

Oregon guide bars are safe, simple to use, light-weight, and provide added value by saving you money.

AdvanceCut

AdvanceCut™

For experienced homeowners, as well as farmers and firewood cutters. Multi-rivet nose, light-weight, and maneuverable.

Single Rivet

For homeowners who only have an occasional need to use a chainsaw. The single-rivet, smaller-radius noses helps reduce kickback.

Guide Bars

Choose the Right Guide Bar for Your Saw

For safety and performance, it's essential that you choose the right guide bar. From electric and small gas to the largest professional powerheads, Oregon has the bar you need - beginning with 8" up to 42". Oregon offers you the broadest selection of guide bars in the industry. Use the chart below to help you choose the right guide bar for your saw.

Comments:

- In a few cases, where two bars would have the same length in their part numbers but different drive link counts, the letter Z will be used in the bar mount description to distinguish between them (K095 and Z095 for example).
- Chainsaws originally equipped with an Intenz® bar, and saws adapted to take an Intenz® bar, do not have a "bar adjustment pin" for tensioning the chain. Use ONLY an Intenz bar when replacing the guide bar on these saws. See page FOR for important information on Intenz bars.
- PowerCut solid body bars may be stamped with XXX, ZZZ or other letters as they can have different noses installed on the body, thereby changing the part number.
- Guard Mate holes are built into the noses of certain types of Oregon bars and allow the attachment of a Guard Mate tip guard to help reduce the risk of kickback.
- Oregon Sculptor™ carving bar part numbers do not follow the Oregon bar part numbering system.
- Bar types and part numbers printed in *red italics* have been obsoleted. Contact your authorized Oregon distributor for availability.

Top performance comes from pairing the narrow kerf 95TXL saw chain with a specially built narrow kerf guide bar. Light-weight and efficient, the SpeedCut System cuts faster and better on mid-size chainsaws.

SpeedCut Perfect for professionals who cut high volumes of wood. The **narrow kerf system** requires less power so your cuts are much faster. SpeedCut lives up to its name because of its lighter weight, durability, and best-in-class efficiency.

Features and Benefits

- More precise cutting from a stiffer bar
- Provides better balance on smaller saws
- Lighter weight means less fatigue
- Longer life from a hardier rail
- Reduced rail wear rate and more precise cutting via better chain fit-up
- LubriTec™ keeps your chain and guide bar oiled, for less friction and longer life

Recommended Saw Sizes – Up to 2.3 – 4.0 cu. in (38 – 65 cc)

These completely re-designed light-weight professional guide bars are lighter, stronger and longer lasting. Designed for top performance for professional woodcutters.

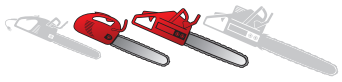
VersaCut Ideal solution for arborists, orchardists, and other professionals who encounter every type of tree, shrub, or limb during their work day. VersaCut has the versatility and durability for your ever-changing environment.

ControlCut Made for the work days when you encounter a dozen small jobs and a few larger ones. ControlCut gives you the freedom to use one tool, rather than two or three. The guide bar's smaller-radius nose reduces kickback for smooth cutting.

Features and Benefits

- More precise cutting from a stiffer bar
- Provides better balance on smaller saws
- Lighter weight means less fatigue
- Longer life from a hardier rail
- Reduced rail wear rate and more precise cutting via better chain fit-up
- LubriTec™ keeps your chain and guide bar oiled, for less friction and longer life

Recommended Saw Sizes – Up to 2.3 – 4.0 cu. in (38 – 65 cc)



Guide Bars – Light-Weight Professional

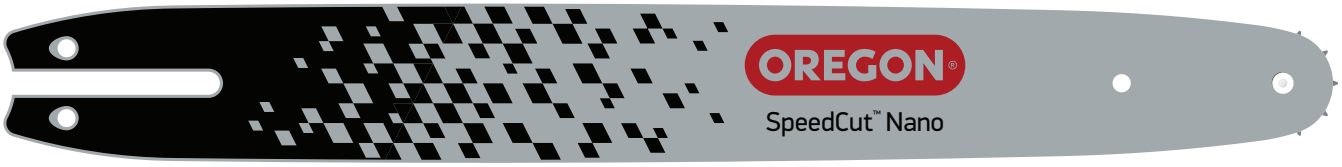
Speed Cut™ Nano



16 4 TXL N A074

Length (in)	Gauge	SpeedCut Nano Guide Bar Code	Nose Alpha Code & Sprocket Tooth Counts	Tail Mounts
10 12 14 **16**	4 = .043"	**TXL** = SpeedCut Nano, System Guide Bar	**N** = 7 Chain Types by Pitch .325" Low Profile 80	**A074** A095

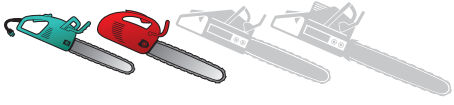
Power through the day with a guide bar engineered specifically for 80TXL saw chain. Designed for professionals, the high-strength body and performance-driven nose components are constructed to exacting tolerances. When the job demands accurate cuts with unmatched speed and endurance to run all-day without downtime, professionals choose SpeedCut Nano.

SpeedCut Nano guide bars must be used together with the corresponding 80TXL saw chain and sprocket and are not compatible with other existing cutting systems.

Features and Benefits

- Longer run time from a uniquely designed SpeedCut Nano 80TXL saw chain which increases saw cutting efficiency by as much as 20% in bucking and 90% in boring*.
- Increased speed allows compact saws to take on big projects
- Smooth cuts and nearly no cutting chatter
- Performance that won't stall in the cut

Recommended Saw Sizes – 2.3 cu. in (20 – 38 cc) — battery-powered and compact light-weight gas chainsaws



*When compared to Oregon 90PX 3/8" Pitch Low-Profile Chain.

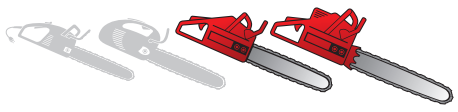
For loggers and other tree-cutting professionals that need heavy-use guide bars. PowerCut's chrome-moly steel body is tough and powerful, enabling you to cut through timber precisely and efficiently. The replaceable sprocket nose reduces the need for new guide bars, giving the PowerCut bar a longer life and greater durability.

Features and Benefits

- Replaceable bar nose, eliminates need to purchase a new bar
- Nose fastens with a single rivet, and is secured by wide, strong, overlapping ears
- Long nose takes most of the abuse. Less wear to the body.
- Much stronger bar with super tough chrome-moly steel. And tough rails with excellent resistance to wearing and chipping.
- LubriTec™ keeps your chain and guide bar oiled, for less friction and longer life

Recommended Saw Sizes – 3.5 cu. in (58 cc) and larger



Comments
PowerCut solid body bars may be stamped with XXX, ZZZ or other letters as they can have different noses installed on the body.

Created for all challenging and abrasive environments, including fire-damaged forests, deserts, or sandy environments, and areas where the wood is unstable and requires extra care. DuraCut has an ultra high-wear resistant stellite nose and chrome-moly steel body to give you a longer-lasting tool for the most punishing environments.

Features and Benefits

- Longer life, ultra high-wear resistant stellite alloy
- Much stronger bar due to super tough, chrome-moly steel, and tough rails with excellent resistance to wear and chipping.
- LubriTec™ keeps your chain and guide bar oiled, for less friction and longer life

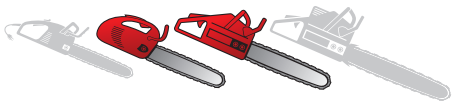
Intenz
T041

An exceptional tool for homeowners who regularly cut trees on their properties or yards, as well as farmers and firewood cutters. AdvanceCut is for experienced users who need power and reliability in challenging yard conditions. The multi-rivet nose gives you durability, and AdvanceCut's maneuverability and light-weight help you get the job done quickly.

Features and Benefits

- Slim symmetrical contour is light-weight, easy to maneuver, and is reversible for longer life
- Available in models with the Intenz tensioning mechanism built into the bar itself
- Multi-rivet nose for long-lasting durability
- LubriTec™ keeps your chain and guide bar oiled, for less friction and longer life

Recommended Saw Sizes – Up to 3.5 cu. in (57 cc)



Narrow Kerf

- Thickness of side laminates is reduced to obtain the advantages of narrow kerf cutting when used in combination with all narrow kerf .325" 95-series chain

For homeowners who only have an occasional need to use a chainsaw — the user who values quality and reliability and is willing to do the tougher yard-work themselves. Single rivet guide bars are safe and maneuverable, with less kickback. They make working on your property quick and easy.

Features and Benefits

- Slim symmetrical contour is light-weight, easy to maneuver, and is reversible for longer life
- Small-radius nose helps reduce kickback.
- Models are available with the Intenz tensioning mechanism built into the bar itself
- Bar mount holes to mount the PowerSharp® bar mount sharpener are available on some models

Recommended Saw Sizes – Electric or gas up to 2.5 cu. in (41 cc)

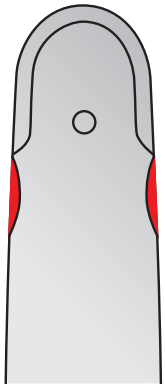
Guide Bars – Troubleshooting

Guide Bar Problems

Chipped rail

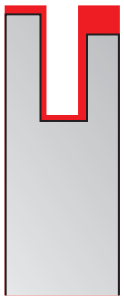


Cause
Chipping of rails behind hard tip. Continual pressure of bar on one area. Dull chain. Loose bar tension

Result
Material chipping out of one or both rails behind the hard tip

Solution
Reverse bar to reduce wear. Replace bar. (This chipping can cause chain damage)

Thin rail and low rail

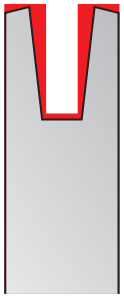


Cause
Chain leaning over, cutting crooked. Forcing dull chain to cut. Damage to cutters on one side of chain

Result
Thin rail on one or both sides of bar. Rail could be blue color in thin area

Solution
Bar cannot be repaired if rail is thin and uneven. Replace it. Make sure chain doesn't continue to lean. If it does, replace with a new chain

Worn bar rails

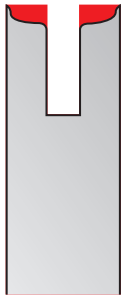


Cause
Worn bar rails are normal for a bar that has been in service for a period of time

Result
Shallow groove

Solution
Replace bar

Wire edge bar rail



Cause
Normal wear caused by pressure of chain on edges of bar rails

Result
Rail edges may chip if wire edge is not removed

Solution
Use a flat file on edge of bar rail to remove wire edge or Bar Rail Dresser #111439

Sprocket Nose Bar Problems

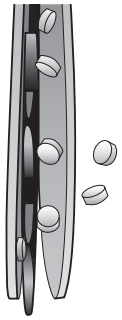
Blue discoloration on bar nose

Cause
Nose was pinched. Friction from revolving sprocket caused heat and area turned blue. Could be lack of lubrication

Result
Entire edge turns blue or only in one or two spots

Solution
If this happens in the nose bearing area the bar is no longer service-able. Replace bar if laminated bar

Spread nose rails and bearing loss



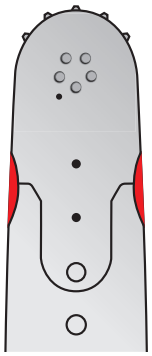
Cause
Chain jumped off bar. Carving with nose. Limb caught nose. Twisting nose. Any operating accident

Result
Spread nose rails and loss of bearings

Solution
Replace bar or replace nose of RSN bar

Sprocket Nose Bar Problems

Chipping at nose connection (replaceable nose)



Cause
Loose chain tension. Continual pressure in this area. Heavy limbing at this point

Result
Chipping at connection of both body and nose assembly

Solution
Replace nose assembly and dress rail of bar and nose to match

Section broken out of sprocket

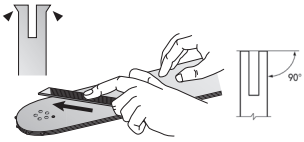
Cause
Irregular operating condition which forced drive link sideways. Throwing the chain when limbing. Chain tension run too loose

Result
Open nose. Broken sprocket. Bearings fall out. One or two broken teeth

Solution
Replace bar nose assembly

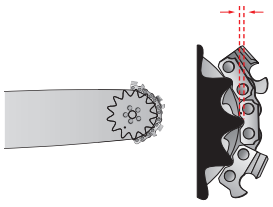
Basic Guide Bar Maintenance Tasks

Chain Tension
Inspect before use and after every hour of use

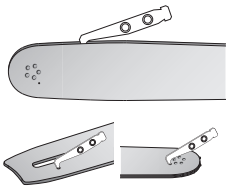


File Bar Edge
File bar edge to 90° weekly or use Bar Rail Dresser #111439

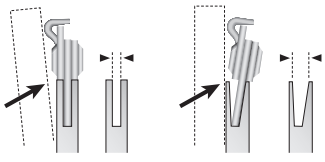
Bar Nose Grease
Turn nose sprocket while pumping grease until whole sprocket has new grease. Do not push dirt into hole



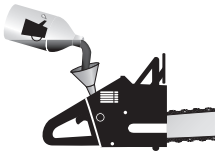
Bar Tip Clearance
On sprocket nose bars, check for clearance around the bar tip between top of rails and the bottom of cutters or tie straps weekly. Replace nose sprockets before cutters or tie straps contact the bar rails



Bar Cleaning
Clean bar channel, grease hole, and oil hole daily



Chain Lean
With chain on the bar, hold a straight-edge against the bar body and against a cutter side plate. A good groove will hold the chain straight, leaving a small gap between the straight edge and bar body. A worn groove will let the chain lean until straightedge is flush with bar body. Replace bar if groove is worn. Check weekly



Chain and Bar Oil
Inspect before use and after every hour of use

Selecting The Right Sprocket

Oregon® offers multiple options for different sprocket needs. The sprocket, chain, and guide bar make up the cutting system. The sprocket is an essential component of this system. The chart below will help you select the right sprocket for your system.

		4	0				8			3		
		.043"	.050"				.058"			.063"		
Good	Spur Sprockets	3/8 low pro	1/4	3/8 low pro	.325	3/8	.325	3/8	.404	.325	3/8	.404
		90	25	91	95 20		21			22		
Better	Pro Spur® Sprockets				95 20	72	21	73	58	22	75	59 27 68
Best	Power Mate® Rim Sprocket System		25		95 20	72	21	73	58	22	75	59 27 68

Power Mate® Rim Sprocket Systems

The most effective sprocket for all types of chainsaw users.

- Extend operational life by maximizing chain and bar groove alignment, while reducing overall costs
- A two-piece design includes a drum with a replaceable rim, allowing the rim to be replaced multiple times before the entire unit is replaced
- Replacement schedule: Every three rims

Attention Dealers: Some Oregon® Power Mate systems have bearings installed, but some do not. Part numbers ending with a number have bearings installed. Part numbers ending with the letter "X" do not. Bearings must be purchased separately for all rim systems having part numbers that end with an X. See the facing page for information on replacement rims. See bearing fit up info starting on page FOR 213–217.

Sprockets

Oregon® Rims

Rims provide the ultimate cutting system performance.

- Smoother cutting and less chain wear than spur sprockets
- Radial port design uses centrifugal force to throw off sawdust and debris
- Wear-depth indicators show when it's time to replace the rim
- Replacement schedule: every two chain loops

SpeedCut™ Nano Sprockets

NOTE: these sprockets must be used with the corresponding SpeedMax Nano guide bar and 80TXL saw chain as a system — they're not compatible with other cutting systems. Refer to the Applications Chart earlier in this section for more details.

610725			SpeedCut Nano	.325" (80) – 7	**Stihl:** MS201T, 200, 193T, 192

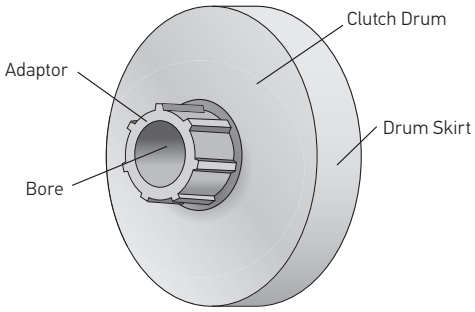
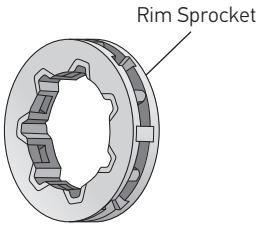
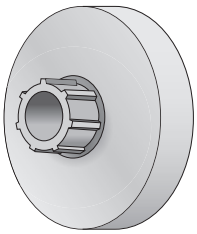
Sprockets — Troubleshooting

Rim & Spur Sprocket Troubleshooting Guide

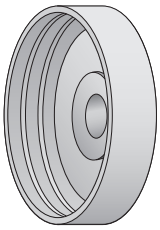




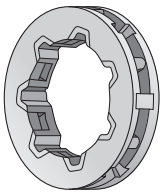
Power Mate® Sprocket
(front view)



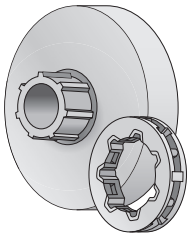
Power Mate Sprocket
(inside view)



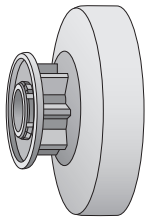
Oregon® Rim



Power Mate Rim Sprocket System

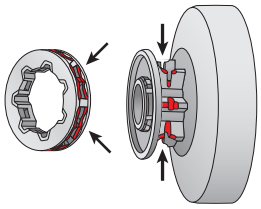


Spur Sprocket

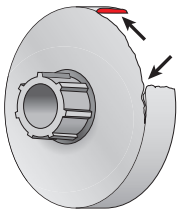


Basic Sprocket Maintenance

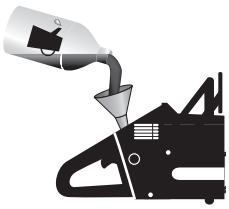
Rims and Spur Sprocket
Visually inspect daily



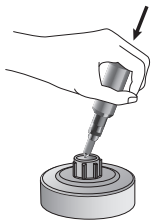
Power Mate Sprockets
Visually inspect daily and before use



Bar and Chain Oil
Fill before use and when reservoir is empty

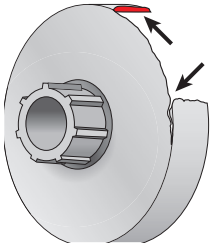


Sprocket Grease
Apply grease to sprocket once a week

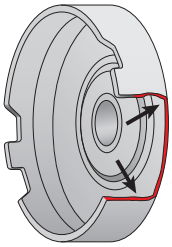


Typical Drum Stress

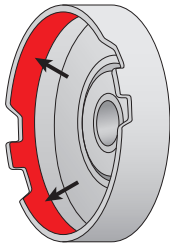
Broken/cracked skirt



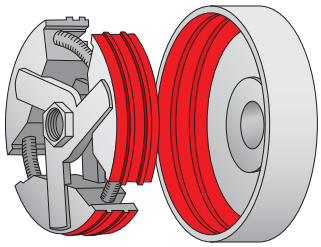
Cracked oil pump lug



Worn inner diameter



Worn clutch, worn inner diameter



Result
Check daily for cracks, splits, or excessive wear in the sprocket clutch drum

Solution
If the drum is cracked, split, or broken, as shown, replace the drum immediately with a new one.

Rim & Spur Sprocket Troubleshooting Guide

Spur Sprocket Damage

Cause
This condition can occur when cutting chain drive links wear through the case-hardened teeth

Result
Cutting chain can be ruined by damaged spurs

Solution
If spur sprocket teeth look like this replace immediately

Rim Damage

Cause
Wear can occur under normal conditions. However, check for excessive rim wear and look for wear on outer diameter

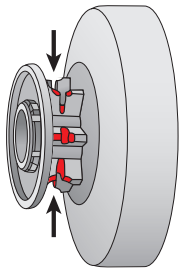
Result
The reduction in diameter can also allow chain drive links to damage the sprocket adaptor

Solution
Replace rim after two chains

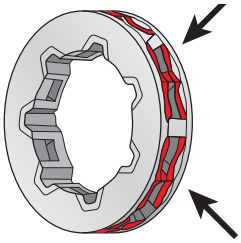
Severe Rim Damage

Solution
Do not fit cutting chain to rims that are severely worn. Serious chain damage will result and the rim may break

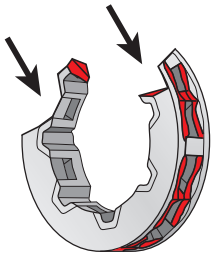
Worn Spur



Outer Wear

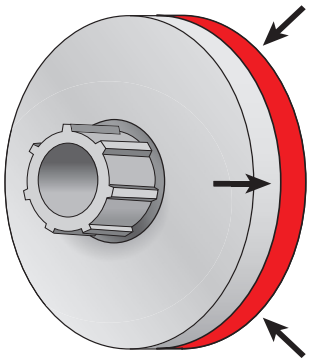


Broken Rim

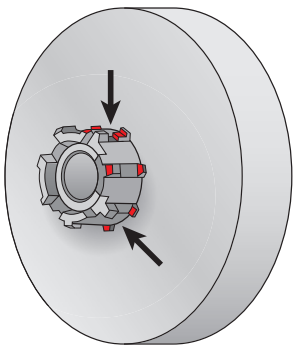


Chain Brake Stress

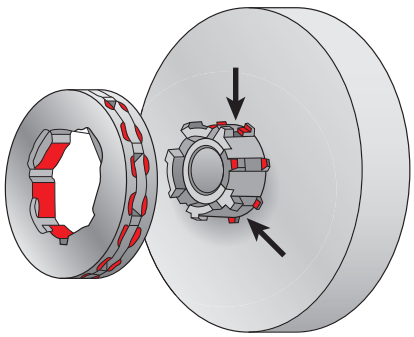
Skirt Wear/Brake Band



Wear/Adaptor Damage



Worn Rim and Adaptor Spline



Result
An overly tightened strap around the drum will cause the strap to rub against the clutch drum which will overheat and soften the metal causing potential drum failure

Solution
If your chainsaw has a chain brake, always check the brake to make sure it stops the rotating chain when activated. Make certain that the brake strap around the drum is not too tight

Tygon fuel lines, Oregon fuel lines and primer bulbs are compatible with up to 10% Ethanol blend fuels unless otherwise stated. Using Ethanol blends higher than 10% may speed deterioration and cause leakage.

OREGON Replaces Description

Oregon® Fuel Line

- Oregon Fuel Line is a specially formulated gas and oil vinyl tubing — made for use with lawnmowers, chainsaws, and snowmobiles
- Maintains air tight seal on fittings — even in extreme temperatures
- Translucent material resists swelling or hardening
- Compare to Tygon®

Color ID™ Files

A new feature to our premium Oregon® Round Files: Color ID.

Color ID is a visual indicator that makes it easier to select the right file straight out of your tool box. Our most popular premium round files are now marked with a distinctive color that denotes the diameter of the file.

You'll find that the Oregon Round Files are the same great product you've come to rely on over the years; we've just added this exclusive feature to help simplify your day.

5/32" Red | 11/64" Dark Blue | 3/16" Light Blue | 7/32" Green

Summary of Changes & Affected Part Numbers

Part Number	Diameter	Color ID™
12-Pack Round Files		
70502	7/32" – 5.5 mm	Green
70503	3/16" – 4.8 mm	Light Blue
70504	5/32" – 4.00 mm	Red
70505	13/64" – 5.2 mm	No Color ID
70511	11/64" – 4.5 mm	Dark Blue
4x3-Pack Round Files		
70502T	7/32" – 5.5 mm	Green
70503T	3/16" – 4.8 mm	Light Blue
70504T	5/32" – 4.0 mm	Red
6-Pack Round Files		
90410	5/16" – 8.0 mm	No color ID

Saw Chain Filing

Oregon® Round Files

Note: See “Filing Angles” in the Saw Chain section’s “Saw Chain Sharpening Chart” for the correct file.

- Superior performance
- Finest steel material
- State-of-the-art production and finishing processes
- Smooth filing action
- Long stay-sharp
- Resists clogging

Oregon Flat Files

Used in combination with an Oregon depth gauge tool.

OREGON	Description	Product Code
12211	6" Flat Depth Gauge File	

- Aggressive cutting design
- Made from the finest steel
- Specially heat-treated for maximum stay-sharp
- Resists clogging
- 6" working length

Depth Gauge Tools

A major factor affecting any saw chain’s level of safety and performance is the depth gauge setting.

Guide Bar & Chain Oil

Specially compounded to provide extra high tackiness and reduce "throw off" even under adverse weather conditions. Provides maximum engine power, low friction and faster cutting time. High film strength prevents wear or scuffing of chain links and guide bars while protecting metal parts against corrosion and rust. Resists build up of deposits such as pitch, sap, or gum.

OREGON	Description	Qty.	Size	Product Code
54-026	Guide Bar & Chain Oil	12	1 quart	
54-059	Guide Bar & Chain Oil	4	1 gallon	

Only One™ Two-Cycle Engine Oil

Only One is a two-cycle engine oil that's easy to use. Only One is a "universal mix" product, meaning no more confusing gas-to-oil mixtures. Just follow the "gallons mixed" information on each package.

- Reduces particulate emissions and oil consumption by at least 50% over standard oil
- Good for all two-cycle engines
- Works with gasohol
- Complies fully with California's Proposition 65 guidelines

700-Series Advantage

The 700-Series Auto Chain Grinders have benefits for both dealers and professional end users seeking an efficient, profitable solution for high-volume chain sharpening.

Labor Cost Savings
Once the learning phase is completed, the machine requires minimal set-up and supervision, freeing up staff for more value-added tasks.

Consistent, High-Quality Grind
Auto chain grinders minimize human involvement, and offer a consistent, standardized, high-quality grind.

FOR DEALERS

Profit Center
With the break even time as short as 58 days, grinding chains with these machines makes chain sharpening profitable.

Increased Foot Traffic
A better-quality grind results in satisfied customers and motivates them to revisit the shop, increasing foot traffic and customer retention.

FOR PROFESSIONALS

Decreased Downtime
For professional end users, having grinders out in the field and sharpening chain in a short time at a better quality increases efficiency and decreases downtime on the actual job.

720-120
All-in-One

- Auto feeding
- Auto grinding
- Air tensioniing
- Auto stopping
- Simultaneous cutter and depth gauge grinding, gullet cleaning
- Digital counter
- Skip tooth grinding (standard: 3/8")
- Stand with air tensioning
- Incremental speed setting

710-120
Standard

- Auto feeding
- Auto grinding
- Auto stopping
- Two-speed setting

Optional Accessories

Chain weight

Accessories

Stand & Air Tensioner

OREGON	Description
700-STND	Stand & Air Tensioner

Included with the 720-120 but is an option on the 710-120

Telescoping Chain Extension

If you have extra long (.404" or 3/4") harvester chains, our telescopic extension is an ideal choice. It accommodates up to 12 ft. chain loops.

590247	Telescopic Chain Extension

Air Tensioner Extension

Shorter chains—smaller than 40 drive links—require this extension to properly engage the tensioning system.

591152	Air Tensioner Extension

Chain Weight

590246	Chain Weight

Vacuum Attachment

Used with any vacuum with a hose diameter of 1-1/8" by assembling behind the grinding wheel. Helps to remove the chain dust created during the grinding process to help prevent build-up and protect the grinder.

602130	Vacuum Attachment

Magnetic Lamp

Attached to any metal surface on the grinder, this 115 V magnetic lamp provides additional light from any angle desired thanks to the long-flexible lamp neck.

602129	Magnetic Lamp

Grinding Wheels

Oregon® makes grinding wheels designed specifically for the 700-Series that are specially formulated to reduce friction and prevent burning. The wheels leave a sharper and cleaner finish on the cutters.

OREGON	Description
5–7/8" Ceramic Grinding Wheels	
OR600-18	1/8" (3.2mm) Wheel Grinds 3/8" Low Profile™, 1/4"
OR600-14	1/4" (6.4mm) Wheel Grinds depth gauge only
OR600-38	3/8" (10 mm) Wheel Grinds 3/4" depth gauge only
OR600-316	3/16" (4.8 mm) Wheel Grinds 0.325", 3/8", .404"
OR600-516	5/16" (7.9 mm) Wheel Grinds 3/4" pitch

Heavy-Duty Chain Breaker & Bar Nose Rivet Driver

Another heavy-weight champion of service tools from Oregon®. This multi-purpose tool breaks all chain pitches, including 3/4", and can also be used to drive out bar nose rivets, including the nose rivets on big 3/4" pitch harvester bars. Heavy-duty materials and top-quality components are used throughout, and replacement parts are available separately to keep this ultimate shop tool in service for a long time. Punches for all chain pitches are included. Anvil for 3/4" pitch chain must be purchased separately.

- 115V or 220V – 1 phase
- 90 duro serrated contact wheel
- Uses premium ceramic 1-1/2" x 48" coated abrasive belts
- Sharpens blades in seconds
- **Drop ship only direct to dealers (USA)**
- **Drop ship only direct to distributors (CAN)**

NOTE: the x400 is designed for sharpening applications of 20 or less blades between grinder "resting" or motor cool-down periods. For sharpening applications of 20 or more blades, Oregon recommends upgrading to the 760.

* USA orders drop ship direct to dealers (in the lower 48 states only); Canadian orders drop ship direct to distributors only

88-021 Heavy-Duty Blade Grinder & Accessories

88-021 **Heavy-Duty Blade Grinder**
A 1-1/2 HP, 1750 RPM motor will sharpen extended cut blades (up to 10" of sharpened edge) and a reversing switch allows for grinding in both directions.
Adjustable light included
Safety switch
Easy height adjustment
12" heavy-duty stone
More HP, more power
Includes Oregon® 88-022 grinding stone
Use with Oregon 88-022, 88-038, or 88-039 replacement grinding stone

Unit requires 29 Amps on startup

88-022 **Grinding Stone, 12" Blue**
12" blue stone for heavy-duty blade grinder
Use with Oregon 88-021 blade grinder
OD: 12", thickness: 1", bore: 7/8"
Rating: 2200 max RPM
36 grit

Shorter life, faster grind

88-038 **Grinding Stone, 12" Red**
12" hardened red stone for heavy-duty blade grinder
Use with Oregon 88-021 blade grinder
OD: 12", thickness: 1", bore: 7/8"
Rating: 2200 max RPM
46 grit

Longer life, slightly slower grind

88-039 **Grinding Stone, 12" Red**
12" hardened red stone for heavy-duty blade grinder
Use with Oregon 88-021 blade grinder
OD: 12", thickness: 1", bore: 7/8"
Rating: 2200 max RPM
30 grit

Shorter life, faster grind

Shop Tools

42-423 **Wireless Tachometer**

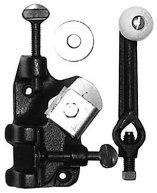
Built-in selector switch to choose 0-5000 RPM low scale or 0-15,000 RPM high scale
RPM readout accurate to within + or - 2%
Solid state electronics
Zener voltage regulator uses 9-volt battery (not included)
Built-in battery check
For all 2-cycle & 4-cycle single cylinder engines

42-450-0 **Roll Pin Punch Set**

Pt. size	Pin Length	Overall Length
1/8"	2"	4"
5/32"	2-1/2"	4-1/2"
3/16"	2-1/2"	4-1/2"
7/32"	3"	5"
1/4"	3-1/2"	5-1/2"
5/16"	4"	6"

42-516 **Valve Refacer**

Clamp designed so that main strain is directed into the machine v-block
May be held in vise or screwed to bench
Black enamel finish



88-400 **Oil Extractor**

Ideal for oil changes on boats, cars, motorcycles, and lawn power equipment
Hand operated vacuum pump mounts on 6 liter container
Extracts fluids from inaccessible or confined areas
Approximately 10 strokes needed to empty most lawn mower engine sumps
Comes with a removable pouring spout for easy disposal
Works great for trapped water

88-405 **Oil & Fuel Extractor**

Fuel and oil removal and transfer system. Remove oil and other fluids into the 48 oz. plastic container using the provided pump and hoses
Also use for fuel transfer between equipment using universal adapter provided
Insert the adapter and pump into fuel opening of machine needing fuel and the transfer hose into the tank with fuel
Pump the handle to start transfer
Quick & simple operation

42-961 **Oil Drain Pan**

10 quart capacity
Resistant to chemicals and solvents
Convenient pouring spouts for disposal
Low profile easily slides under lawn & garden tractors

60 per pack
Priced per pack

Oregon® manual tire changers are designed for time and labor savings. Any wheel can be secured onto the non-skid base plate by simply positioning and tightening the "quick adjust" center post onto the threaded rod. This unique design allows the operator to change small tires and switch wheel sizes or styles very quickly.

67-214 **Tire Changer – Complete**
Designed especially for 4" to 12"
Lug-center or bearing-in hub wheels
(Includes Oregon 67-215, 67-216, & 67-217)

67-215 **Replacement Threaded 12" Rod**
For Oregon 67-214 tire changer.

67-216 **Quick Adjust Center Post**
For Oregon 67-214 tire changer.

67-217 **"Duck Head" Mount/De-Mount Tool**
For Oregon 67-214 tire changer.

SF16 **Sea Foam Motor Treatment – 16 Ounces**
100% pure petroleum product that safely and effectively cleans internal fuel and oil system components, helping your gasoline or diesel engine run cleaner and more efficiently

- Sea Foam is an EPA-registered product
- Will not harm engine components, seals, gaskets, catalytic converters, or oxygen sensors
- Helps liquefy gum & varnish deposits when added to fuels or oils
- As a fuel system additive; cleans fuel injectors, clean carbon, gum, & varnish deposits
- Adds lubricity to fuel
- Stabilizes fuel for 2 years & controls moisture
- As an oil system additive; controls moisture, gum, varnish, & residue deposits

VP Fuel Accessories

VP3051 **Pump, Siphon**
For VP 54-gallon drums
Drop shipped only

VP348 **Spout, Power**
For VP 5-gallon cans
Internal vent tube ensures a smooth & quick pour
Drop shipped only

2-Cycle Engine Oil

54-001

2-Cycle Oil, 50:1 Mix
1-gallon mix
Eight (8) 6-packs per case
Manufactured by Champion Brands LLC
Replaces Champion 4115L
2.56 oz.

54-002

2-Cycle Oil, 50:1 Mix
2-1/2 gallon mix
Eight (8) 6-packs per case
Manufactured by Champion Brands LLC
Replaces Champion 4115J
6.4 oz.

54-005

2-Cycle Oil, 50:1 Mix
5-gallon mix
12 per case
Manufactured by Champion Brands LLC
Replaces Champion 4115K
12.8 oz.

54-006

2-Cycle Oil: 50:1 Mix
50-gallon mix
Manufactured by Champion Brands LLC
Replaces Champion 4683N
1-gallon jug

54-007

2-Cycle Oil, 50:1 Mix
250-gallon mix
Manufactured by Champion Brands LLC
Replaces Champion 4683D
5-gallon jug

40092

Oregon® Only One™, 2-Cycle Engine Oil
1-gallon mix, previously Oregon 54-088-0

- Environmentally friendly, easy to use
- Contains fuel stabilizer
- Reduces particulate emissions & oil consumption by at least 50% over standard oil
- Good for all 2-cycle engines.
- Works with ethanol blended fuels
- Complies fully with California's Proposition 65 guidelines
- Contains 48, 1.8 oz. pillow packs per display case

Synthetic 2-Cycle Engine Oil

VP2901 **2-Cycle Oil, Synthetic – 2.6 oz.**
Fully synthetic 2-cycle oil
Drop shipped only

VP2903 **2-Cycle Oil, Synthetic – 5.2 oz.**
Fully synthetic 2-cycle oil
Drop shipped only

VP2905 **2-Cycle Oil, Synthetic – 12.8 oz.**
Fully synthetic 2-cycle oil
Drop shipped only

4-Cycle Small Engine Oils

VP2911 **4-Cycle Small Engine Oil – 18 oz.**
Premium SAE 30, 4-cycle oil
Drop shipped only

VP2913 **4-Cycle Small Engine Oil – 32 oz.**
Premium SAE 30, 4-cycle oil
Drop shipped only

VP2921 **4-Cycle Synthetic Small Engine Oil – 32 oz.**
Full synthetic SAE 30, 4-cycle oil, 10W–30
Drop shipped only

Air Tool Oil

4067V **Champion Air Tool Oil**
Designed to lubricate pneumatic (air) driven tools of all types.

- Promotes longer tool life
- Contains rust & oxidation inhibiting additives
- Protects during cold & hot temperatures
- 12 per case
- 4 oz. bottle

III

Fuel & Oil Supplies, Storage, & Containment

OREGON Description Product Code

Bar & Chain Oil

Specially compounded to provide extra high tackiness and prevent “throw off” even under adverse weather conditions. Provides maximum engine power, low friction, and faster cutting time. High film-strength prevents wear or scuffing of chain links and bars while protecting metal parts against corrosion and rust. Resist build-up of deposits such as pitch, sap, or gum.

54-026 **Bar & Chain Lube**
1-quart bottle

54-059 **Bar & Chain Lube**
1-gallon bottle

VP2931 **VP Bar & Chain Oil – 32 oz.**
Drop shipped only

VP2933 **VP Bar & Chain Oil – 1 Gallon**
Drop shipped only

Hydraulic Oil

54-063 **SP Antiwear Hydraulic Oil**
Recommended for use in hydraulic systems – especially those designed with close tolerances operating where extremes of pressure, temperature, and pump speed are encountered.
Performance Properties:

- Anti-wear protection for a wide range of hydraulic pumps & components
- Use under severe operating conditions
- Meets the ASTM salt, corrosion, water, rust, & copper strip corrosion tests
- Excellent water separation qualities
- Filterability meets Denison requirements
- Foam control
- Good low temperature properties
- To ensure proper lubrication in all cases consult the operator’s manual
- 2-1/2 gallon bottle

VP2941 **VP Hydraulic Oil – 2.5 Gallons**
Multi-purpose AW46
Drop shipped only

Fuel Stabilizer

4205M **Fuel Stabilizer**
Stabilizes fuel and keeps it fresh, previously Oregon® 42-912-1
Keeps gum and varnish from developing
Use in any 4-cycle, 2-cycle, gas, or diesel engine fuel systems
Promotes easy starts after storage
Convenient easy measure, easy pour bottle
8oz. bottle, 12 per carton

VP2815 **VP Fuel Stabilizer w/Ethanol Shield – 8 oz.**
For all 2 & 4-cycle engines, treats 80 gallons, reduces heat, extends engine life, protect & prevent repairs
Drop shipped only

VP2805 **VP Fuel System Cleaner – 16 oz.**
Treats up to 20 gallons, cleans entire fuel system, restores engine performance, eliminates knocking & pinging, increases fuel mileage
Drop shipped only

VP2825 **VP Power Boost – 16 oz.**
Treats up to 18 gallons, increases horsepower, cleans fuel system, improves combustion, provides "seat-of-the-pants" power boost
Drop shipped only

VP2835 **VP Diesel All-In-One – 24 oz.**
Treats 240 gallons, cleans injectors & pumps, replaces lost lubrication, cleans sludge deposits, biodiesel protection, synthetic fuel catalyst, increase mileage, reduces smoking, increase cetane, disperses water, anti gel
Drop shipped only

VP2855 **VP Octanium™ – 32 oz.**
Octane concentrate, eliminates knocking & pinging, lead substitute, cleans fuel injectors, improves throttle response & acceleration, eliminates gum & varnish build-up, & increases horsepower
Drop shipped only

VP2865 **VP Cetanium Diesel Treatment – 32 oz.**
Cetane concentrate, cleans injectors & pumps, cleans sludge & deposits, biodiesel protection, increases mileage, reduces smoking, & replaces lost lubrication
Drop shipped only

VP Power Wash

VPM10011 **VP PowerWash Super Concentrate Formula**
Packaged in gallons that can be used alone for extremely dirty, muddy, and/or large applications such as off-road vehicles or dirt track cars, as well as to refill Moto Formula spray bottles when diluted with water. **Drop shipped only**

VPM10018 **Case of 4 of VPM10011, Drop Shipped Only**

VPM10025 **VP PowerWash Moto Formula**
Designed for power sports applications such as dirt bikes, ATV's, and UTV's as well as bicycles, including road, mountain and BMX. Great for zero turn and riding lawn mowers.
Drop shipped only

VPM10027 **Case of 12 of VPM10025, Drop Shipped Only**

Hand Cleaner

Permatex fast orange smooth hand cleaner in cream and lotion formulas. Fast orange is the #1 selling, biodegradable, waterless, petroleum solvent-free hand cleaner. It contains no harsh chemicals, mineral oils, or ammonia that can sting cuts and abrasions. Pure, fresh-smelling natural citrus power does the cleaning while aloe, lanolin, glycerin, and jojoba condition and protect skin. Fast orange gently deep cleans the toughest soils. Work great on laundry strains, scuff marks, tile floors, pet odors, and many other household cleaning needs.

F25219 **Fast Orange Hand Cleaner**
- With pumice
- 1-gallon

Grease, High Temperature

4050T **High Temperature Grease**
- Stays put under extreme shock loads
- Very low friction coefficient
- Moisture resistant
- Meets NLGI GC-LB requirements
- Sold in cartons of 10 only
- Priced per each
- Previously 54-020-0
- 14 oz.

Grease Gun

54-021 **Lube 'n Push Pro Grease Gun**
- Features an all-purpose nozzle
- Manufactured from high quality plastic materials
- Oil and grease resistant
- Withstands changes in temperature
- One hand operation
- 1.5 oz. capacity

III

Gear Lubricant

4120H — **Gear Lubricant**
- Multipurpose gear oil
- 1-quart squeeze bottle
- 80-90 WT, gear lube
- Previously 4113H

49-010 — **Gear Lubricant**
- "00" grease
- 9 oz. bottle
- 12 per case

49-015 — **Gear Lubricant**
- "0" grease
- 4-1/2 oz. tube
- 12 tubes per case

Heavy-Duty Penetrant-Lubricant

4244M — **Heavy-Duty Penetrating Lubricant**
Loosens and lubricates even the most rusted bolts.
- Displaces water
- Stops squeaks
- Protects metal surfaces against rust & corrosion
- Removes tar
- Previously 54-015-0
- 9 oz. aerosol can

16PB — **PB Blaster Penetrating Lubricant**
Breaks free rusted joints and frozen parts by removing surface tension.
- Powerful, concentrated penetrating catalyst
- Non-evaporating lubricant
- VOC compliant
- 11 oz. aerosol can

WD-40 Lubricant

WD-40 Smart Straw — now you can use WD-40 to protect, clean, and lubricate thousands of items — without ever losing the straw again.
- Features a permanently attached straw that sprays two ways
- Flip it up for precision stream
- Flip it down for regular spray action

F110054 — **WD–40 Lubricant**
Smart Straw 8 oz. aerosol can

F110078 — **WD–40 Lubricant**
Smart Straw 11 oz. aerosol can

Brake Cleaner

4126P

Brake Cleaner
For disc and ABS brakes
- Removes brake fluid, dirt, & grease
- Removes harmful brake dust
- Improves braking & reduces noise
- Non-flammable
- Can be used to clean electrical components
- Does not contain silicones
- Leaves no residue
- Previously 54-017-0
- 19 oz. aerosol can
- NOT FOR SALE IN CALIFORNIA

4525I

Non-Chlorinated Brake Cleaner
Cleans brake, clutch parts, and CV joints
- Removes brake fluid, grease, & oil
- Degreases instantly
- Leaves no residue
- Previously 4125I
- 15 oz. aerosol can

III

Battery Terminal Care

42-005

Battery Terminal Protector Spray
Fights battery corrosion.
- Prolongs battery life
- 10 oz. can

42-007

Battery Cleaner Spray
Penetrates, loosens, and neutralizes all acid corrosion deposits.
- Assures maximum current flow
- 16 oz. can

OREGON | Description | Product Code

Permatex Sealant & Threadlocker

F80022 **Permatex Blue RTV Silicone GSK**

The original Permatex Blue

- Will not foul oxygen sensors
- Replaces almost any cut gasket
- Makes reliable “formed-in-place” gaskets that resist cracking, shrinking, & migrating
- Coats pre-cut gaskets to increase reliability
- Temperature range -65° F to 500° F (-54° C to 260° C) intermittent
- Resists auto & shop fluids
- First generation 1970-1980 gasket maker
- 3 oz.

F82180 **Permatex Ultra Black Silicone**

Fast-curing formula

- Sensor safe, low odor, & noncorrosive
- Meets performance specs of OE silicone gaskets
- Retains high flexibility, oil resistance properties through use of patented adhesion system
- Temperature range -65º F to 500º F (-54° C to 260° C) intermittent
- Resists auto & shop fluids and vibration
- 3 oz.

F29208 **Permatex Right Stuff® Cartridge**

Return equipment to service immediately when you make leak-proof gaskets in just one minute with the Right Stuff

- Latest elastomeric rubber gasket technology is blowout resistant
- Outperforms pre-cut gaskets
- Temperature range -75° F to 450° F (-59° C to 232° C) continuous, 500° F (260° C) intermittent
- Resists ATF, coolant, oil, & other shop fluids
- Protects against leaks caused by vibration & thermal expansion
- Sensor-safe
- 5 oz.

F81158 **Permatex Black RTV Silicone**

General-purpose, black RTV indoor / outdoor sealant

- Seals, bonds, repairs, mends, & secures glass, metal, plastics, fabric, vinyl, weather stripping, & vinyl tops
- Protects & repairs electrical wiring
- May be applied to horizontal or vertical surfaces
- Waterproof & flexible
- Temperature range -75° F to 450° F (-59° C to 232° C)
- Resists oil, water, weather, vibration, & grease
- 3 oz.

III

OREGON | Description | Product Code

Permatex Sealant & Threadlocker

F80050 **Permatex Clear RTV Silicone**

General-purpose, clear RTV indoor / outdoor sealant

- Seals, bonds, repairs, mends & secures glass, metal, plastics, fabric, vinyl, weather stripping, & vinyl tops
- Protects & repairs electrical wiring
- May be applied to horizontal or vertical surfaces
- Waterproof & flexible
- Temperature range -75° F to 400° F (-59° C to 204° C)
- Resists oil, water, weather, vibration, & grease
- 3 oz.

F81160 **Permatex Hi-Temp Red RTV Silicone**

Formulated for hi-temp applications, or heavy-duty use (such as towing, etc.)

- OEM specified
- Replaces almost any cut gasket by making reliable “formed-in-place” gaskets that resist cracking, shrinking, and migrating caused by thermal cycling
- Coats pre-cut gaskets to increase reliability
- Temperature range -65º F to 650º F (-54° C to 343° C) intermittent
- Resists auto and shop fluids
- First generation 1970-1980 gasket maker
- 3 oz.

24010E **Permatex Threadlocker Gel Blue**

The patent-pending GEL TWIST pin-point applicator puts the Threadlocker where you want it: on the part

- Gel formula provides “liquid-reliability” without drips, globs, mess or waste
- All-purpose, medium strength threadlocker
- Ideal for all nut & bolt applications 1/4 inch to 1 inch (6 mm to 25 mm)
- Eliminates need for stocking expensive lock nuts & lock washers
- Locks & seals while preventing parts from loosening due to vibration
- Protects threads from corrosion
- Removable with hand tools for easy disassembly
- .35 oz. / 10 g

F27100 **Permatex Threadlocker Red – 271**

High-strength threadlocker for heavy-duty applications 3/8 inch to 1 inch (10 mm to 25 mm)

- OEM specified
- Especially well-suited for permanently locking studs and press fits
- Adds 3,000 PSI holding power on slip and press fit assemblies
- Replaces set screws and snap rings
- Locks against vibration loosening
- May require heat or special tools for removal
- .20 oz. / 6 ml

F24200 **Permatex Threadlocker Blue – 242**

All-purpose, medium strength threadlocker. Ideal for all nut and bolt applications 1/4" to 3/4" (6 mm to 20 mm)

- OEM specified
- Eliminates need for stocking expensive lock nuts & lock washers
- Locks and seals while preventing parts loosening due to vibration
- Protects threads from corrosion
- Removable with hand tools for easy disassembly
- .20 oz. / 6 ml

OREGON Description Product Code

Gorilla Glue

Gorilla Glue bonds materials other adhesives simply can't—metal, stone, wood, ceramics, foam, glass and much more

- Versatile – ideal for most household fixes & building repairs
- 100% waterproof – does not break down when exposed to outdoor elements
- Easily passes ANSI/HPVA HP-1-2000 Types 1 & 2
- Temperature resistant – once it's dry Gorilla Glue is unaffected by extreme heat or cold
- Sandable, paintable, stainable – invisible glue line makes finishing easy
-

F50002 **Gorilla Glue**
- 2 oz. bottle

F50004 **Gorilla Glue**
- 4 oz. bottle

J-B Weld

F8265 **J-B WELD**

The world's finest cold-weld compound. It's a remarkably easy, convenient, and inexpensive alternative to welding, soldering, and brazing. One contains liquid steel / epoxy resin, and the other contains hardener. When mixed together in equal portions, a chemical reaction occurs that turns the mixture into a compound as hard and tough as steel — and with similar properties

- Bonds any combination of iron, steel, copper, aluminum, brass, bronze, pewter, porcelain, ceramic, marble, glass, PVC, ABS, concrete, fiberglass, wood, fabric, paper — just about any porous & non-porous material
- It stays pliable for about 30 minutes after mixing, sets in 4 - 6 hours, and cures fully in 15 - 24 hours
- Tensile strength: 3960 PSI
- Withstands temperatures up to 500°
- J-B Weld is packaged in two tubes

F8276 **J-B KWIK**

The same as the original J-B Weld except it stays pliable for about 2 minutes after mixing, sets in just 4 minutes, and cures fully in 4 hours. Because J-B KWIK cures so fast, it's not as strong or as heat-resistant as the original J-B WELD

- Tensile strength: 2100 PSi
- Withstands temperatures up to 300°
- J-B KWIK is packaged in two tubes

Snow & Ice Melter

This blend of sodium chloride and magnesium chloride is an efficient and affordable ice melt product. Aspen contains patented inhibitors designed to reduce impact to metal and spreading equipment. Melts ice to -7°F/-21°C

F51020 **Aspen Snow and Ice Melter**
- 20 pound poly bag

F51050 **Aspen Snow and Ice Melter**
- 50 pound poly bag

III

OREGON	Description	Product Code

Pressure Washer Pump Saver

AR64511 **Pump Saver**
- Non-aerosol version
- 16 oz. bottle

Slime Tire Sealant

Slime Tire Sealant is formulated and tested for use in all pneumatic tires. Once installed, Slime remains liquid and will not harden or dry out. As the Slime treated tire rotates, centrifugal force pushes the sealant to the tread area creating a layer of protection, repairing punctures as they occur, or treating existing punctures. Slime is not intended for use in tires losing pressure from sidewall punctures, bead leaks, damaged rims, or faulty valves. Slime is recommended as a repair only in high-speed, over-the-road tires.

- Remains liquid inside the tire, coating the tread area as the tire rotates
- Non-toxic, non-hazardous, non-flammable, non-aerosol, and water soluble
- Contains rust and corrosion inhibitors to maintain the integrity of the rim
- TPMS friendly (Note: May not install easily into tires with direct or valve mounted devices)
- Tires treated with Slime can be cleaned out with water allowing for the installation of a proper plug/patch
- Slime for tubeless tires can also be installed into tubeless bike tires
- Installs between the rim and the tire bead

Hold the bead open with two tire levers, install, and re-inflate with a fast burst of air to seat the bead to the rim. Repairs punctures up to (6 mm) using Fibro-Seal technology. What is Fibro-Seal technology? Slime utilizes a state-of-the-art blend of environmentally friendly fibers, binders, polymers and proprietary congealing agents which intertwine and clot within the puncture. This Fibro-Seal lattice, together with the viscous transportation system (the "green goo"), seeks out and tightly packs itself into the puncture, preventing and repairing flats with a flexible long-lasting plug.

SB1G **Slime Tire Sealant**
- 1-gallon jug with pump

SL07 **Slime Tire Sealant**
- 8 oz. bottle

SL09 **Slime Tire Sealant**
- 32 oz. bottle

SL11 **Slime Tire Sealant**
- 16 oz. bottle

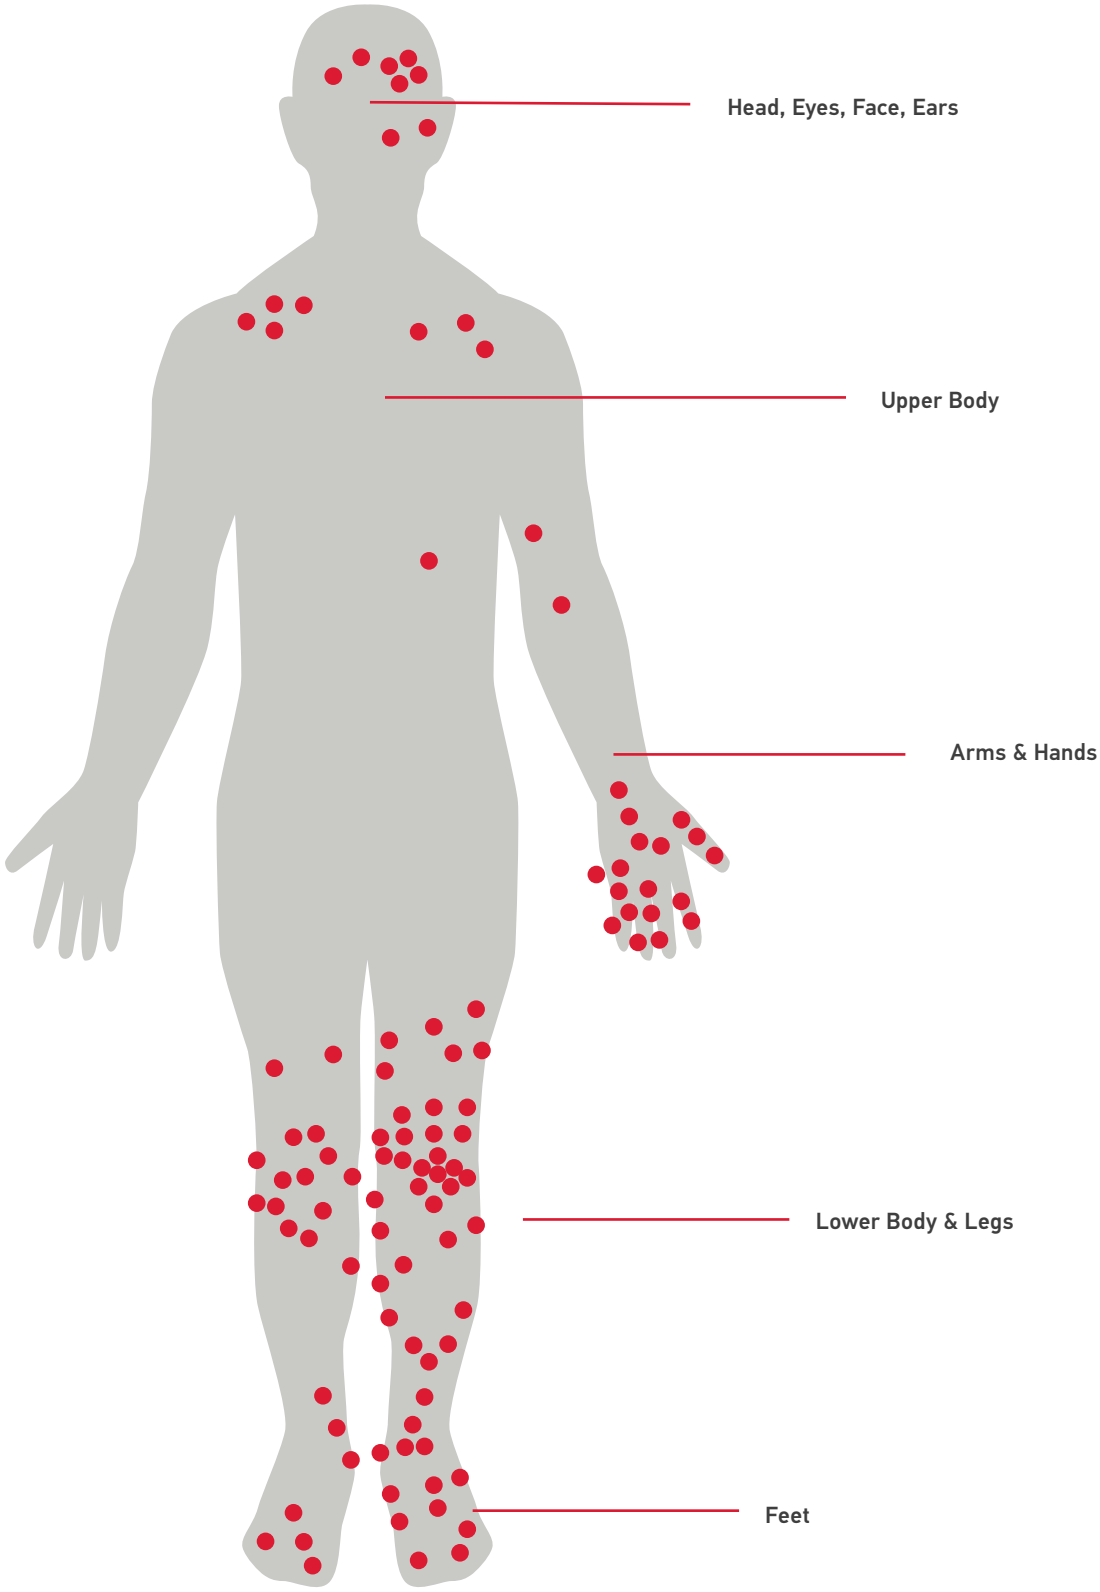
Most Common Chainsaw Injuries



Recommended Chainsaw Protective & Safety Clothing & Equipment

Head, Eyes, Face, Ears
- Safety helmet
- Ears & face protection
- Eye protection

Upper Body
- Surveyor's safety vest (non-protective)
- Premium rain shell (non-protective)
- Premium softshell rain jacket (non-protective)

Hands
- Chainsaw gloves

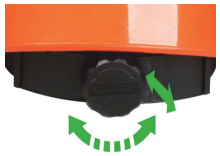
Lower Body
- Apron chaps
- Full-wrap chaps

Feet
- Rubber forestry boots
- Forestry boot insulated liner
- Premium leather boots

Safety Helmet

- High-impact & scratch resistant ABS helmet
- 20 ventilation holes & crown shape for optimum breathability
- UV-stabilized helmet shell
- Rain gutter
- Tested according to ANSI Z89.1-2003

- Four-point, easy-to-adjust harness
- Highly absorbent, removable, & washable sweatband



- Anti-slip headband
- Easy-to-use “pull-push” system for precise snug-fit

OREGON	Description	Product Code

OREGON Description Product Code

Starlite – Safety Eyewear

Unitary scratch-resistant lens has two distinct viewing areas, each with 9.75 base curvature, delivering a wider range of vision. Deep universal-fit temples provide side protection equal to that of eyewear with large sideshields.

42-139 **Starlite**
Blue mirror lens with gray frame
Oregon® logo on leg
Meets ANSI Z87.1+ safety standard
99.9% UVA & UVB protection

42-138 **Starlite**
Gray lens with gray frame
Oregon logo on leg
Meets ANSI Z87.1+ safety standard
99.9% UVA & UVB protection

42-137 **Starlite**
Clear lens with clear frame
Oregon logo on leg
Meets ANSI Z87.1+ safety standard
99.9% UVA & UVB protection

Eyewear Protection

Impact and scratch resistant lens with integrated sideshields wraps around for wide field of vision. Adjustable and racheting temples for custom fit. Molded in browguard for protection above eyes. Meets ANSI Z87.1+ standards and 99.9% UVA/UVB protection.

42-163 **Coverall Eyewear**
Covers prescription eyewear

42-135 **Clear Goggles**
Allows full vision in all directions
Fits over regular eye glasses
Meets ANSI Z87.1+ safety standard

Scorpion-Mag™ Safety Eyewear

Built in bifocal, contemporary styling, adjustable and racheting legs, soft grip nose piece, black frame with clear lens, and free "Scorpion's Tail" retainer included. Meets ANSI Z87.1+ standards and 99.9% UVA/UVB protection.

42-152 **Scorpion-Mag – Clear Safety Eyewear**
2.0 Diopter magnification

OREGON Description Product Code

Venom Head Gear with Visor

Fang-shaped Venom Visor is contoured to provide complete protection from head to chin. Tension adjustment ensures that raised visor stays in place.

42-160 **Venom Head Gear & Visor**
Three-part adjustment system
Meets ANSI Z87.1+ standards

Truair Disposable Respirator Masks

Cautions & Warnings

Attention Dealers

Oregon® urges you to read and follow all of these safety guidelines when selecting, installing, servicing or operating any outdoor power equipment. Encourage your customers to do the same.

Air Filters

CAUTION:

- Shut off engine before servicing or making any adjustments.
- Disconnect battery at negative terminal. (for electric start engines only)
- Remove and ground spark plug wire
- Refer to owner's manual and follow safety warnings

Belts

WARNING:

- Never operate equipment without original guards securely in place

CAUTION:

- Shut off engine before servicing or making any adjustments
- Disconnect battery at negative terminal. (for electric start engines only)
- Remove and ground spark plug wire
- Refer to owner's manual and follow safety warnings

Blades

WARNING:

Before servicing or removing blades

- Remove and ground spark plug wire
- Disconnect battery at negative terminal. (for electric start engines only)
- Refer to owner's manual and follow safety warnings
- Do not substitute any other bolt for the blade retaining bolt. Blades and blade retaining bolts are specially made for this application
- Proper torque must be used when tightening the blade retaining bolt; refer to owner's manual. If this safety precaution is not followed, the blade could come off during operation

While mowing

- Immediately inspect blade if abnormal vibration occurs

WARNING:

- Properly support and secure mower when replacing blade.
- To avoid possible injury, always wear proper eye and hand protection when servicing mower blade.
- Unbalanced or warped blades can cause damage to the mower and/or personal injury.
- Inspect the blade(s) and replace damaged blades before operating the mower

Brush & Grass Blades

WARNING:

- Check that cutting attachment shields are properly located and in good condition. Never remove, modify, or in any way compromise the cutting attachment shield.
- Read and follow all instructions supplied by the manufacturer of the trimmer/brushcutter.
- Rigid blades must be used only on brush cutters designed to accommodate blades. Never use a metal cutting attachment on a brushcutter without a shoulder harness, properly mounted barrier handlebar and cutting attachment shield in good condition.
- Never remove the cutting attachment shield.
- Be certain that replacement cutting attachments are fitted properly with regard to the direction of rotation, the size of the mounting bolt and the size of the arbor.
- Do not install Oregon metal blades on any brushcutter capable of spinning the blade faster than 10000 RPM.
- Check the condition of cutting attachments frequently. Always replace cutting attachments that are cracked, bent, or warped – even if such damage appears to be superficial. Never attempt to repair damaged cutting attachments by welding or bending.
- Always wear eye, face, leg and foot protection during operation.
- Keep bystanders and pets at least 50 feet away in all directions. Always clear the work area of rocks, glass, wire, nails or other foreign objects that can be picked up and thrown by the rotating cutting attachment.
- Sharpen or maintain the cutting attachment according to instructions packaged with the attachment.
- Use cutting attachments to cut only the types of material for which the attachment is designed.
- Disconnect power to electrically powered trimmer/brushcutters before performing any service.
- **Do Not install metal blades on curved shaft trimmers**.

Attention Dealers

Oregon® urges you to read and follow all of these safety guidelines when selecting, installing, servicing or operating any outdoor power equipment. Encourage your customers to do the same.

Flywheel Key

WARNING:

- Do not strike the flywheel with a hammer or hard object because the flywheel may shatter during later operation.

CAUTION:

- Remove and ground spark plug wire
- Disconnect battery at negative terminal. (for electric start engines only)
- Refer to owner's manual and follow safety warnings

Fuel Caps

WARNING:

- Never operate equipment without fuel cap in place
- Allow engine to cool before removing fuel cap

Other Fuel Related Components

WARNING:

Gasoline and its vapors are extremely flammable. Fire or explosion can cause severe burns or death.

- Never smoke when working on fuel system components
- Keep gasoline away from sparks, open flame, pilot lights, and other ignition sources
- Shut off fuel before removing the fuel filter

Spark Plug Removal

CAUTION:

- Remove and ground spark plug wire
- Disconnect battery at negative terminal. (for electric start engines only)
- Refer to owner's manual and follow safety warnings
- Allow engine to cool before removing spark plug

Throttle Cable

CAUTION:

- Wear eye protection and gloves when opening package and handling throttle cable
- Disconnect battery at negative terminal. (for electric start engines only)
- Refer to owner's manual and follow safety warnings.

Trimmer Line & Trimmer Head

WARNING:

Wear eye and hearing protection:

- Thrown objects and loud noise can cause severe eye injury and hearing loss.
- Wear eye protection meeting ANSI Z87.1 standards and ear protection when operating this unit.
- Use a full face shield when needed.

Keep bystanders away:

- Keep all bystanders, especially children and pets, at least 50 feet (15m) from the operating area.

Thrown objects and rotating cutter can cause severe injury:

- Do not operate without the cutting attachment shield in place. Keep away from the rotating cutting attachment.
- Do not install Oregon®trimmer heads on any trimmer capable of spinning the attachment faster than 10000 RPM.
- Refer to owner's manual and follow safety warnings
- Refer to trimmer line installation instructions provided with aftermarket trimmer heads.

(See Trimmer Lines & Heads section for additional Cautions and warnings specific to Trimmers & Brushcutters)

2020 New Products

OREGON	Replaces	Description	Product Code

Air Filters – Briggs & Stratton Paper Filters

30-256 796970

Air Filter – NEW
Fits 083152-0151-B1 & 5.5 Gross Torque Model: 83132-0036-B1
Height: 2-13/32", width: 2-39/64", length: 3-1/2"

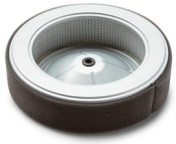
30-258 797032

Air Filter – NEW
Fits Briggs & Stratton 19H132, 19H232, and 19L132
Height: 3-3/4", width: 3-13/64", length: 5-1/4"

Air Filters – Honda Paper Filters

30-257 17210-Z6L-010

Air Filter – NEW
Fits GX630, GX660 , GX690 models
Height: 2", width: 7-1/2"



Air Filters – Husqvarna

30-259 525470602

Air Filter – NEW
Fits Husqvarna K760
Height: 2-1/2", width: 4-29/32", length: 4-1/2"

John Deere

30-229 CH18287

Air Filter – NEW
Fits John Deere 70, 190E, 290D, 310E, 310G, 310SE, 310SG, 315SE and 315SG Backhoes, 344E, 485E, 486E, 488E, 490D and 493D Forklifts, 1650, 5103, 5203, 5210, 5220, 5303, 5310, 5320, 5403, 5410, 5420, 5510, 5520, 5520N Tractors
Height: 15-1/4", width: 7-13/32"

30-230 AT20728

Air Filter – NEW
Fits John Deere 1010, 1010C, 1010D, 1020, 1030, 1120, 1130, 1520, 1530, 1630, 1630VU, 1830, 2010, 2010C, 2010D, 2020, 2030, 2040, 2120, 2130, 2240, 2440, 2630, 300, 300B, 301, 301A, 302, 302A, 400, 401, 401A, 5200, 5300, 820, 820D, 830, 830D, 840D and 920 Tractors; Kubota L2850DT, L2850DTGST, L2850F, L3250DT, L3250F, L3350DT, L3350HDT, L3350MDT, L3750, L3750DT, L3750F, L4150, L4150DT, L4150DTN, L4150F, L5450DT, L5450HDTW, M4050, M4050DT, M4050F, M4500, M4500DT and M4500F Tractors
Height: 11-13/32", width: 6-11/32"

30-233 AM108184

Air Filter – NEW
Fits models: F1145, F925, F932, F935, 755, 855 & 955.
Height: 8-1/2", width: 5"

Air Filters – Shop & Blister Packs

Shop Packs

Oregon® premium quality air filters are more profitable than ever when you stock the "Shop Packs."

- Save 10% or more compared to packaged filters
- Buy in larger quantity and save
- 5 air filters in each Shop Pack
- Oregon packaging

Blister Packs

Put the Oregon name and quality on display.

- Puts the filter out where the end user can see it
- Helps self sell
- Frees up counter and shelf space

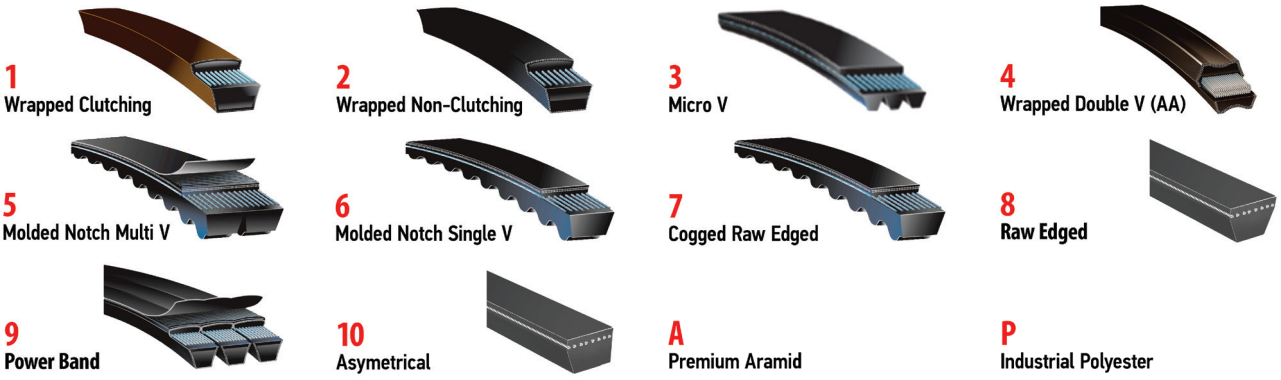
Belts by Size



For all Oregon® belts, the outside circumference (OC) is the length listed. A belt measurer, like the Oregon 75-910, can be used to determine this dimension. For belts with an OC longer than 100" or those with non-standard backs (like the Oregon 75-068), use a tape measure wrapped around the outside of the belt to determine the length.

OREGON	Length	Width	Type
75-A14	16	1/2	P
75-A15	17	1/2	P

15-923	70580	1/2" x 103"	**Premium Belt** – Blower Drive Fits 1250, 1850, 1855, 1860, 2850, 2855, 5120, 5140, 5180, 5182, 5200, 5210, 5212, 5215, & 5250 Mow`n Machine with 44" decks	7	
15-924	70581	21/32" x 41"	**Premium Belt** – Blower Drive Fits 1250, 1850, 1855, 1860, 2850, 2855, 2860, 3150, 5120, 5140, 5180, 5182, 5200, 5210, 5212, 5215, 5250, D4414, D4818, D5218, D6118, DO4418T, & DO4818 Mow`n Machine with 48" & 52" decks	7	
15-926	70983	21/32" x 94-9/16"	**Premium Belt** – Spindle Drive Fits 1860, 2150, 5180, 5182, 5200, 5210, 5215, D7221, DM7219, & DM7221 Mow`n Machine with 72" decks	7	
15-928	71429	21/32" x 62-1/4"	**Premium Belt** – Spindle Drive Fits 5180, 5182, 5200, 5210, 5212, 5215, 5250, & D4818 Mow`n Machine with 48" decks	7	
15-929	71506	21/32" x 46-1/16"	**Premium Belt** – Blower Drive Fits 1250, 1850, 1855, 1860, 2850, 2855, 2860, 3150, 5120, 5140, 5180, 5182, 5200, 5210, 5212, 5215, 5250, D4414, D4818, D5218-2, D5218-3, D5218T, D5221T, D6118T, DO4418T, & DO4818 Mow`n Machine with 61" decks	7	
15-930	71526	21/32" x 93-3/8"	**Premium Belt** – Spindle Drive Fits 5120, 5140, & DO4814 Mow`n Machine with 48" decks	7	
15-931	71579	1/2" x 37-1/4"	**Premium Belt** – Hydro Drive Fits 5120, 5140, 5160, 6140, & 6160 Mow`n Machine	7	
15-932	71616	21/32" x 93-3/8"	**Premium Belt** – Spindle Drive Fits 5120, 5140, 5180, 5200, 5210, 5215, 5250, D4414, DM4415, & DM5219 Mow`n Machine with 44" decks	7	
15-933	71838	21/32" x 52-1/8"	**Premium Belt** – Spindle Drive Fits D5218, D5221, D6118, D6121, DM5219, & DO4814 Mow`n Machine with 52" decks	7	
15-934	71879	9/16" x 54-7/16"	**Premium Belt** – Spindle Drive Fits D5218, D5221, D6118, D6121, DM4415, & DM6119 Mow`n Machine with 61" decks	7	
15-935	72818	9/16" x 64-5/8"	**Premium Belt** – Spindle Drive Fits 6170 & DO4818 Mow`n Machine with 48" decks	7	
15-936	73263	1/2" x 38"	**Premium Belt** – Hydro Drive Fits 6140, 6160, & 6170 Mow`n Machine	7	

Belts

Wright Stander

OREGON	Replaces	Size	Description	Type	Product Code
75-952	71460002	5/8" x 55-1/8"	**Premium Belt** – Deck For 52" deck	6	
75-949	71460003	5/8" x 80-1/4"	**Premium Belt** – Deck For 42" & deck drive belt fo 52", number BX71	6	
75-951	71460010	5/8" x 53-7/16"	**Premium Belt** – Deck For 48" deck, number BX50	6	
75-948	71460011	5/8" x 74"	**Premium Belt** – Deck For 36" & deck drive belt for 48", number BX71	6	
115-218	71460033	1/2" x 53"	**Belt** – Standard Belt for Mule Drive Fits Standers large & small frame		
15-056	71460064	5/8" x 64-5/16"	**Premium Belt** – Pump Drive For Stander x (SN 53014 & up) & Sentar (SN 26980 & up)	1	
15-057	71460071	5/8" x 96-5/16"	**Premium Belt** – Engine to Blade For Standers with 52" deck (SN 49046 & up), Stander x with 52" deck (SN 53014 & up), & Velke GD mowers with 32" decks (SN 32274 & up)	1	
15-055	71460123	5/8" x 78-5/16"	**Premium Belt** – Engine to Blade For Standers with 48" deck (SN 49046 & up) & Stander x with 48" deck (SN 55853 & up)	1	

Belt Measurer

75-910

- Measures belts from 14–100" in length
- Heavy-duty aluminum

Belt Rack

75-902

- 36" wood rack with (6) 5-1/2" hooks
- Adjustable rack has 16 placements for hooks

B

Tech Tip — Measure an A Cord Belt

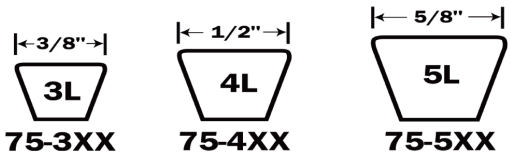
A Fiber Cord is the family name of nylons that include Kevlar®. Oregon® A Fiber Cord belts are the best quality, longest-lasting belts available in the market place.

Oregon A Fiber Cord belts are measured by the outside circumference and can easily replace an A or B belt. Simply add 2 inches to the length for "A" belts and 3 inches to the length for "B" belts.

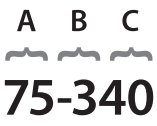
Examples
75-340 = 3/8" x 40" belt
75-468 = 1/2" x 68" belt
75-598 = 5/8" x 98" belt

Examples
A48 = 75-450
B40 = 75-543

Measuring Top Width of A Belts

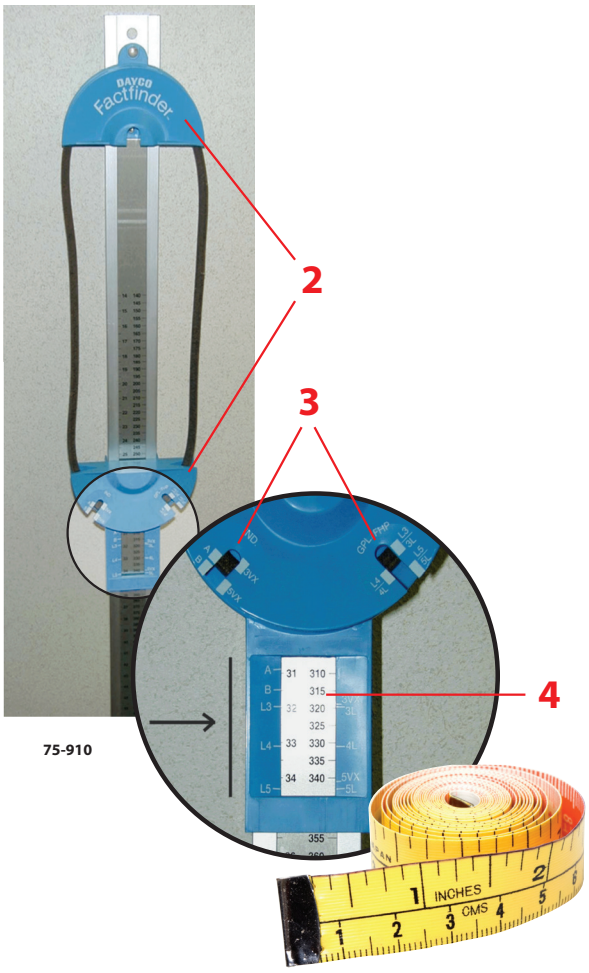


A Belt Part Numbers
Part numbers for the Premium A Fiber Cord belts are coded to save look-up time, are five digits and are determined as followed:



A. First two digits are always 75-
B. Third digit is the width of the belt
   3 = 3/8"
   4 = 1/2"
   5 = 5/8"
C. Forth and fifth digit show the length

Tech Tip — Measuring a Belt



Oregon Belt Measurer 75-910

1. Define type of belt :
   - 3L = 3/8" or 9.5 mm
   - 4L = 1/2" or 12.7 mm
   - 5L = 5/8" or 15.9 mm
2. Fit the belt over the blue plastic split pulley and pull the bottom half down tight.
3. If you are measuring an industrial belt (bulgy top), look at the left-hand slot in the half pulley.

   The size (section) of the belt is indicated by the intersection of the belt top with one of the white blocks, either A or B.

   If you have an FHP belt (flat top), the same procedure applies to the right-hand slot. The belt in the photo is a 4L belt (the section).
4. Now that you know the belt's profile (section), look at the window below the split pulley and find the section number for your belt (3L, 4L, 5L, A or B) printed in white on the left side of the window. The number opposite or closest is the length in inches of the belt you are measuring.

Cloth Tape Measure

1. Place the beginning of the cloth measuring tape anywhere on the outside of the belt
2. Wrap the tape around the complete circumference of the belt until it wraps back around to its beginning
3. Where the two meet, read the length given

B

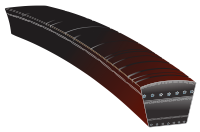
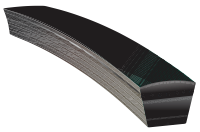
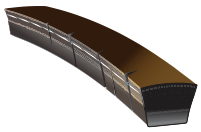
Belts – Troubleshooting



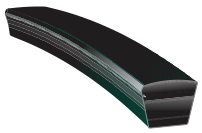
Cracking **A**



Wear on Sidewalls **B**



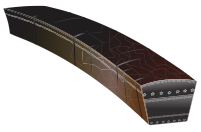
Edge Cord Failure **C**



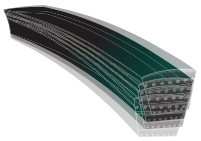
Wear on Top Corner **D**

Surface Flaking Sticky or Swollen **E**

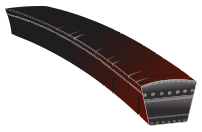
Wear on Top Surface **F**



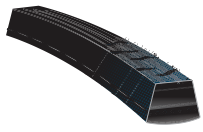
Surface Hard or Stiff **G**



Vibration **H**

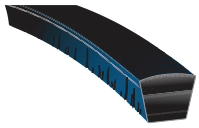


High Belt Temperature **I**

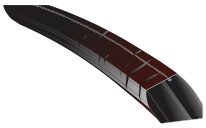


Wear on Bottom Surface **J**

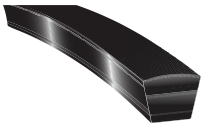
	Probable Cause	Corrective Action
A	**Cracking**	
	Sheaves too small for belt section	Use larger diameter sheaves
	Belt slip	Retension to manufacturer's recommendations
	Backside idler diameter too small	Increase backside idler to acceptable diameter
	Improper belt storage	Don't coil belt too tightly, kink, or bend. Avoid heat & direct sunlight
	Excessive hot or cold temperature	Control drive environment
B	**Wear on Sidewalls**	
	Belt slip	Retension to manufacturer's recommendations
	Sheave misalignment	Realign drive
	Worn sheaves	Replace sheaves
	Incorrect belt	Replace with correct belt size; refer to owner's manual
C	**Edge Core Failure**	
	Sheave misalignment	Check alignment & correct
	Damaged tensile member	Follow correct installation procedure; refer to owner's manual
	Worn or incorrect sheaves	Replace sheaves for correct belt/sheave match; refer to equipment manufacturer's parts manual
	Severe shock load	Inspect engine PTO clutch
D	**Wear on Top Corner**	
	Belt-to-sheave fit incorrect	Use correct belt/sheave according to manufacturer's specifications
	Belt rubbing against guard or drive structure	Remove obstruction
E	**Surface Flaking Sticky or Swollen**	
	Oil or chemical contamination	Replace belt if contaminated with oil or grease
F	**Wear on Top Surface**	
	Belt rubbing against guard	Repair or replace guard
	Damaged idler	Repair or replace idler
G	**Surface Hard or Stiff**	
	Hot drive environment	Improve ventilation to drive; ensure area is free of debris
	Belt slip	Retension to manufacturer's recommendations
H	**Unusual Vibration**	
	Incorrect belt	Use correct belt/sheave according to manufacturer's specifications
	Poor equipment structural design	Check structure for adequate strength & rigidity
	Sheave is dimensionally incorrect	Replace defective sheave
	Loose drive components	Check machine components, guards, motor mounts, motor pads, bushings, brackets & framework for adequate strength, stability & installation
I	**High Belt Temperature**	
	Hot drive environment	Improve ventilation to drive; ensure area is free of debris
	Slipping	Retension until slipping stops
J	**Wear on Bottom Surface**	
	Belt bottoming against sheave groove bottom	Use correct belt/sheave according to manufacturer's specifications
	Worn sheaves	Replace sheaves
	Debris in sheaves	Clean sheaves



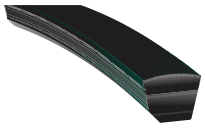
Undercord Cracking **K**



Turns Over or Comes of Drive **L**

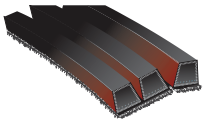


Undercord Sidewall Burn or Hardening **M**

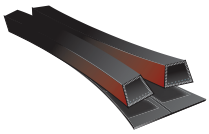


Wear on Bottom Corner **N**

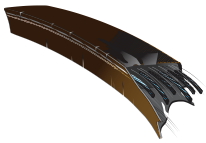
Unusual Noise **O**



Top of Tie Band Damaged **P**



Tie Band Separation **Q**



Broken Belt **R**

	Probable Cause	Corrective Action
K	**Undercord Cracking**	
	Sheaves too small for belt section	Use larger diameter sheaves
	Belt slip	Retension to manufacturer's recommendations
	Backside idler diameter too small	Increase backside idler to acceptable diameter
	Excessive hot or cold temperature	Control drive environment
	Improper belt storage	Don't coil belt too tightly, kink, or bend. Avoid heat & direct sunlight
L	**Turns Over or Comes Off Drive**	
	Shock loading or vibration	Check drive design; ensure parts are to OEM specifications
	Foreign material in grooves	Shield grooves & drive
	Sheave misalignment	Realign drive
	Worn sheave grooves	Replace sheaves
	Subminimal diameter sheave	Replace sheave with correct OEM part
M	**Sidewall Burn or Hardening**	
	Belt slip	Retension to manufacturer's recommendations
	Worn sheaves	Replace sheaves
	Under-designed drive	Redesign to manufacturer's recommendations
	Shaft movement	Repair/replace bearings or spindle assembly as necessary
N	**Wear on Bottom Corner**	
	Belt-to-sheave fit incorrect	Use correct belt/sheave match
	Worn sheaves	Replace sheaves
O	**Unusual Noise**	
	Incorrect belt for sheaves	Use correct belt size and type; verify manufacturer's part number and size
	Incorrect tension	Check belt tension & adjust
	Worn sheaves	Replace sheaves
	Debris in sheaves	Clean sheaves; improve shielding; remove rust, paint; or remove dirt from grooves
	Sheave misalignment	Realign drive
P	**Top of Tie Band Damage**	
	Interference with guard	Check & adjust guard
	Backside idler malfunction	Replace or repair backside idler
	Debris in sheaves	Clean sheaves
Q	**Tie Band Separation**	
	Improper groove spacing	Use sheaves manufactured to industry specifications
	Worn or incorrect sheaves	Replace sheaves
	Sheave misalignment	Realign drive
R	**Broken Belt**	
	Under-designed drive	Redesign to manufacturers recommendations
	Belt rolled or pried onto sheave	Use drive center distance adjustment when installing
	Object falling into drive	Provide adequate guard or drive protection
	Severe shock load	Redesign to accommodate shock load

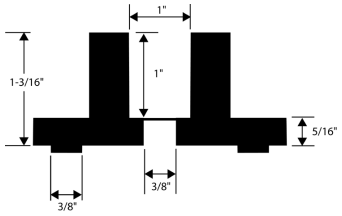
Blade Adaptors

OREGON	Replaces	Description	Product Code

AYP

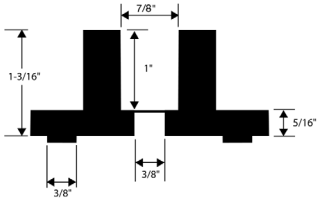
65-002* 193707, 184590, Husqvarna 532193707, Husqvarna 532184590

Blade Adapter
For walk-behind mowers built 2005 and newer
Diameter: 1"



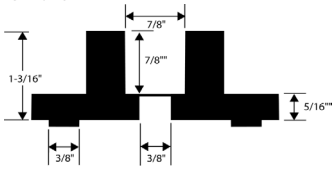
65-006* 850977

Blade Adapter
For all newer style walk-behind mowers
Depth: 1", diameter: 7/8"
POWDERED METAL



65-007* 851514

Blade Adapter
For all new-style mulching mowers
Depth: 7/8", diameter: 7/8"
POWDERED METAL



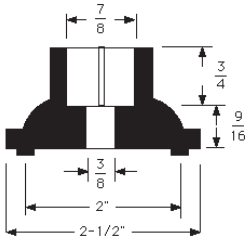
65-008 420097, Husqvarna 532420097

Blade Adaptor
Fits 21" models PR160N (2009–2010), PR625N, & XT625N, Husqvarna model 6021P

Bobcat

80-122** 71002B, Lawn Boy 146281

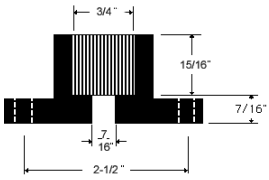
Blade Adapter
DIECAST

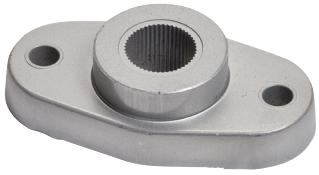


MTD

65-220* 753-0210, 748-0235, 748-0283

Blade Adapter
Splined for new style rider
Fits 30" model 796
Side holes: 5/16"
POWDERED METAL





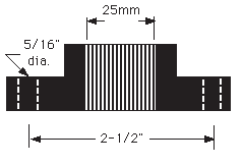
*adaptor only **kit with hardware

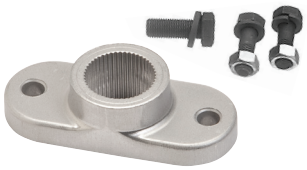
OREGON	Replaces	Description	Product Code

MTD

65-221* **80-145****
748-0300 (adapter)

Blade Adapter
Splined for riding mower
Fits riders series models (1985–1988) 300, 400, 500, 600, 700, & 800
Side hole: 5/16"
POWDERED METAL





65-222*
753-0348B

Blade Adapter
Keyed for push mowers
Side hole: 5/16", keyway: 3/16"
POWDERED METAL

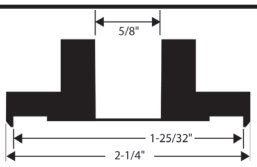
OREGON	Replaces	Description	Product Code

Murray

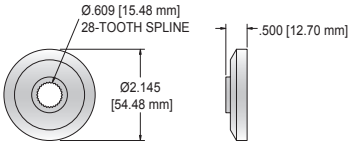
65-206* 54211, 20617

Blade Adapter
For all riding mowers with double "D" center hole
Keyway: 5/32"
POWDERED METAL



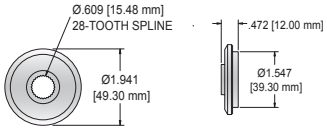
65-208* 91926, 92466

Blade Adapter – Splined
For blades with round center-hole on riding mower & lawn tractor (1990 and newer)
Use with Oregon® 82-243, 82-023, & 82-250 spindles
Diameter: 2-5/32"
Splined shaft: 5/8"
POWDERED METAL



65-204* 690411

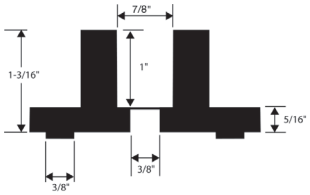
Blade Adapter
For 42", 46", & 52" rail deck frames
Use with Oregon 82-245 spindle
Diameter: 2-5/32"
Splined ID: 5/8"
POWDERED METAL

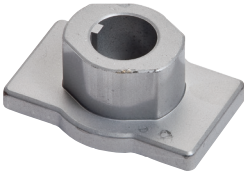


Sears

65-006 AYP 850977

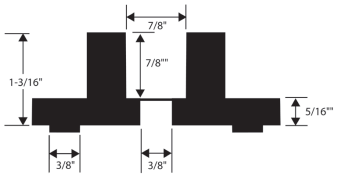
Blade Adapter
For all newer style walk-behind mowers
Depth: 1"
Diameter: 7/8"
POWDERED METAL

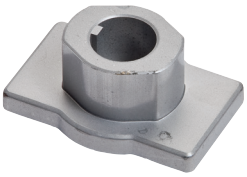




65-007 AYP 851514

Blade Adapter
For all new-style mulching mowers
Depth: 7/8"
Diameter: 7/8"
POWDERED METAL

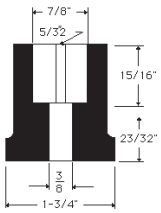




Snapper

65-229* 1-2927, 7012927

Blade Adapter
Use with Oregon 99-103, 99-107, & 99-920 blades
For steel deck walk-behind mowers
Keyway: 5/32"
POWDERED METAL



65-229

Walker

65-230* 5706

Blade Adapter
Use wth Oregon 91-910, 91-911, 91-912 91-913, & 91-914 blades

Gator® Lawn Mower Blades

The Oregon® Gator series of lawnmower blades deliver a full range of enhancements designed to boost performance and durability. The exclusive Gator Mulcher® feature on every Gator blade provides outstanding bagging and discharge efficiency, saving you time and hassle.

G3™ Engineered with the core Gator mulching features that make them a great choice for normal and abrasive conditions.

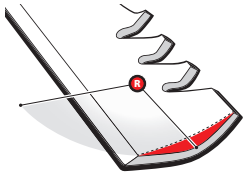
— G3 blades may include additional features and/or other dimensions than listed below.

G5™ An optimum combination for a wide range of mower units. Features a high-lift contour as well as two additional, premium features to improve performance and retain blade sharpness.

G6® Heavy-duty blades designed for commercial applications and to withstand punishing conditions, while offering the full-range of features that make Gator series blades unique.

SPECIFICATIONS

	Width	Thickness	Air Lift*
G6	3.00" 76.2 mm	0.250" 6.35 mm	1.00" 25.4 mm
G5	3.00" 76.2 mm	≤ 0.203" ≤ 5.156 mm	1.00" 25.4 mm
G3	≤ 2.50" ≤ 63.5 mm	≤ 0.203" ≤ 5.156 mm	0.75" / 1.00" 19.05 / 25.4 mm



Radius-cut end

All Gator blades feature progressive geometry to maintain maximum cutting length throughout the life of the blade.

* tops of Gator teeth extend 1/4" more than the air-lift height listed

Oregon® mower blades are created using manufacturing processes that combine the latest technology with a comprehensive range of quality control standards. These processes and standards are designed to provide Oregon blades with the consistency and longevity that professionals demand and homeowners prefer.

QUALITY CONTROL

- Oregon blades not only meet specifications, Oregon blades often are the specification
- Oregon consistently delivers quality mower blades through established manufacturing standards for 26 characteristics – look for the Certified Quality label on Oregon blades.

COMPUTER CONTROLLED STRAIGHTENING

- Superior straightness and consistency
- Cleaner cut, especially on multi-blade decks
- Reduced vibration

SELECTION

- Find a full range of replacement blades for most residential and commercial mowers at OregonProducts.com or in this catalog.

FEATURES

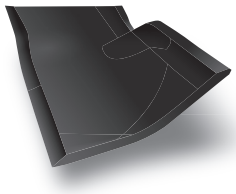
Superior Side Discharge & Bagging	Superior Mulching	Increased Cutting	Preserves Cutting Edge	Superior Longevity
				High-Lift	Gator Mulcher®	X-Tended Cutting Length™	Fusion®	Thicker & Wider
★	★	★	★	★
★	★	★	★	☆
★	★	☆	☆	☆
The aggressive blade angle increases air flow to push debris up-and-out for superior bagging or side discharge.	Cleaner, more efficient cutting performance can eliminate the need to bag, saving time and hassle.	Up to twice the cutting length optimizes the cutting efficiency with each revolution.	Tungsten carbide is "fused" into the blade – creating an ultra-hard layer at the cutting edge and increasing the time between sharpening.	Greater width and thickness extends blade life and allows for longer lifting arch to improve bagging and mulching.

B

Lawn Mower Blades

100-Series Blades

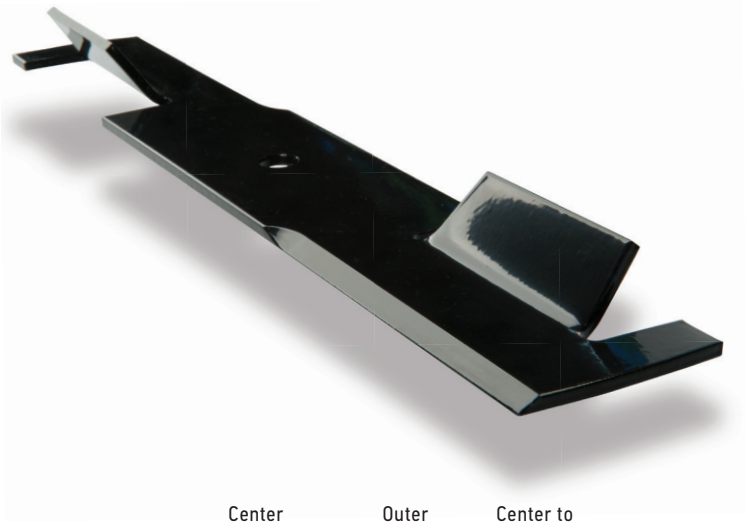
Ultra X-Tended Cutting Edge™
- Double bevel technology
- Reduces overall blade noise by up to 1.5 decibels
- Maximum mulching length



Made From US Boron Steel
- Perfect balance between durability & ductility
- Rockwell 43–48 HRc

Superior Flatness and Straightness
- Clean cut for manicured look

Optimum Packaging
- Labeling includes OEM & aftermarket cross references



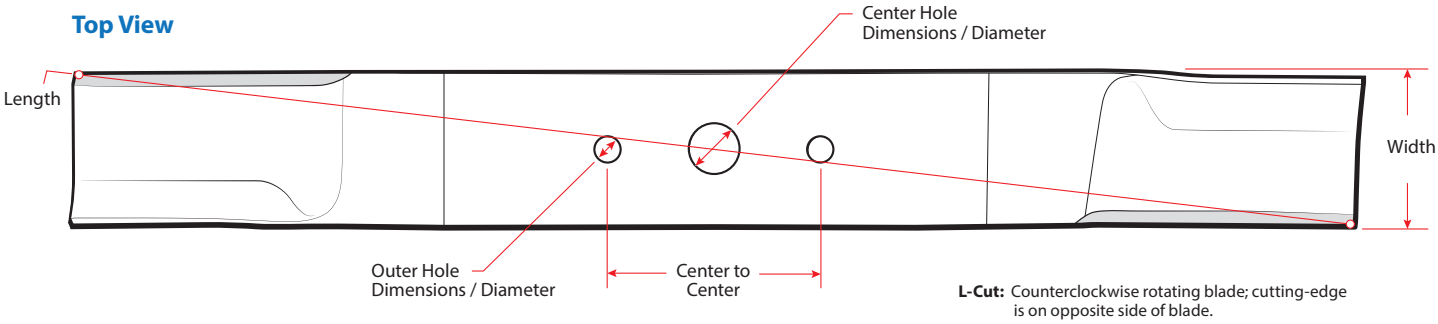
Sand Blades

Heavy Duty for Abrasive Conditions
- 2-to-3 times the life of a standard Oregon® blade when used in sandy and abrasive soil conditions
- Currently available for select 16-1/2", 18", & 21" Scag applications only

OREGON	Length	Center Hole	Outer Hole	Center to Center	Width	Thickness	Offset	Air Lift	L-Cut	Type
Scag										
99-500	16-1/2	5/8			3	0.203	0	1-3/16		
99-501	18	5/8			3	0.203	0	1-3/16		
99-502	21	5/8			3	0.203	0	1-3/16		

Common Blade Measurements

Top View



L-Cut: Counterclockwise rotating blade; cutting-edge is on opposite side of blade.

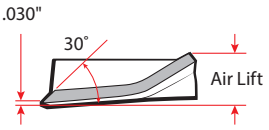
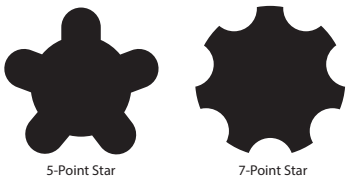
Right-End View

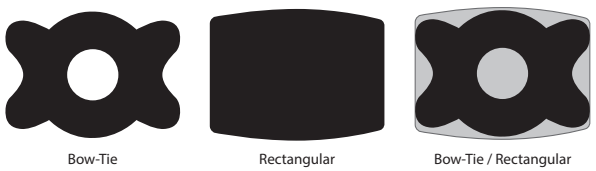


Blade Arbor Hole Types

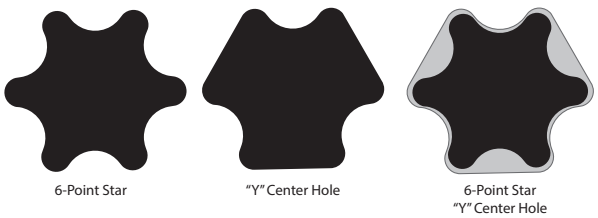
5 or 7-Point Star
Center holes may be 5 or 7-point star shaped.



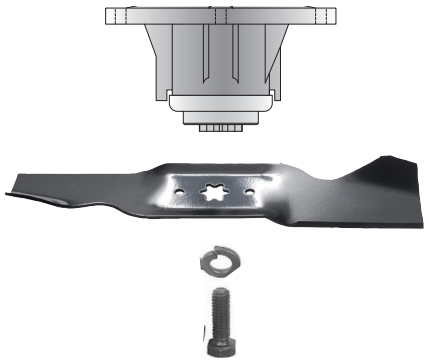
Square or Rectangular
The MTD built blades on many walk-behind lawn mowers have a "bow-tie" hole. In this case the Oregon replacement blade will have a rectangular center hole which will fit on the bow-tie pattern on the blade adapter.



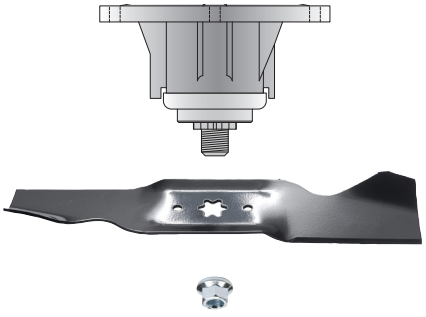
MTD Blades
The MTD built blades (Bolens, Cub Cadet, Troy-Bilt, White, Yard Machine and Yardman) may have a 6-point star. Oregon replacement blades will have a "Y" shaped center hole which will fit exactly on the 6-point star on the blade spindle.



The two sizes of the 6-point star.
If your blade spindle has a bolt and lock washer that holds the blade to the machine, you would use the 11/16" star or "Y" blade



If your blade is secured with a large flange nut, then you would use the 5/8" star or "Y" blade



Blades by Length

Complete Carburetors

50-603 Walbro WYJ-192

Carburetor
Fits Echo SRM2601 brushcutter

50-607 Walbro WYL-19

Carburetor
Fits Shindaiwa S230 brushcutter

50-619 Zama C1U-K52
Echo 125200-13312
Zama C1U-K54
Echo 125200-49030

Carburetor
Fits Echo models SRM2100, GT2000, GT2100, ST2000SB, PAS, & PDSR

50-620 Zama C1U-K54
Echo 125200-13123

Carburetor
Fits Echo model TC2100

50-621 Zama RB-K66A
Echo A02100380

Carburetor
Rotary Barrel
Fits Echo models GT200, GT201, SRM200, SRM201, SRM230, SRM231, HC160, HC180, & HC200

⚠ Tygon fuel lines, Oregon fuel lines, and primer bulbs are compatible with up to 10% Ethanol blend fuels unless otherwise stated. Using Ethanol blends higher than 10% may speed deterioration and cause leakage.

Oregon® Fuel Line

- Oregon Fuel Line is a specially formulated gas and oil vinyl tubing — made for use with lawnmowers, chainsaws, and snowmobiles
- Maintains air tight seal on fittings — even in extreme temperatures
- Translucent material resists swelling or hardening
- Compare to Tygon®

Hydrostatic Drive System — Wheel Motors

27-500

Exmark 1-523328
Exmark 103-6988
Parker TF0240US081AADD

Wheel Motor
Replaces Parker wheel motor
Fits Lazer Z & Lazer Z HP
serial 440, 000 to 509, 999

27-501

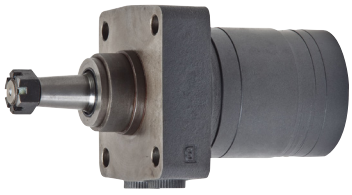
Exmark 1-603718
Parker TE0230FS250AAFA
Parker TE0230FS250AADD

Wheel Motor
Replaces Parker wheel motor
Fits Turf Tracer, Tracer XP, & Viking

27-503

Parker TE0230US250AA
Encore 453068

Wheel Motor
Replaces Parker wheel motor
Fits Encore walk-behinds, Encore Prowler
Front Cut, Toro, & Husqvarna



27-502

Parker TF0240LS080AAFB
Parker TF0240LS080AAKY
Scag 482639
Scag 481529
Scag 4159280
Hustler 602382

Wheel Motor
Fits Scag Turf Tiger, Tiger Cub, Wildcat, SCR, & SMST,
Bobcat / Bunton / Ryan Procat, Predator, Bunton Missile,
Bunton Torpedo & other models, & Hustler X-One

27-504

Hydro-Gear HGM-15E-3138
Scag 483190
Hustler 600922
Ferris 5100407

Wheel Motor
Replaces Hydro-Gear wheel motor.
Fits Scag Tiger Cub, Turf Tiger, Wildcat, Z Cat
Ferris IS1500ZX, IS200Z (15IN3/REV - LH), & Hustler

Universal

60-400 — Murray 42877, Murray 42093, Murray 42096, Noma/AMF 57353, Noma/AMF 53415

Throttle Control Cable Assembly
Positive detent in stop & fast position, 1/4" bolt mounting hole, proper travel for B & S and Tecumseh automatic choke engines, and all plastic, low friction conduit with galvanized inner wire eliminates corrosion for smoother running
Conduit size: 3/16", conduit length: 60", inner wire: .054", wire travel: 1-3/8"

514366 — **Blister Pack** - 1 of 60-400

60-408 — Snapper 7-6065

Throttle Control Cable Assembly
Positive action control, deluxe model using heavy gauge metal, replaces mounting bracket and lever, sure-grip T-knob, universal style for center or side mounting with hole for 1/4" bolt
Conduit length: 51", inner wire: .054", inner wire length: 53", wire travel: 1-1/2"

60-409

Throttle Control Cable Assembly
Positive action control, deluxe model using heavy gauge metal mounting bracket and lever, sure-grip T-knob, for center or side mounting with hole for 1/4" bolt
Conduit size: 3/16", conduit length: 69", inner wire: .054", inner wire length: 71"

60-226

Throttle Control Cable Assembly
Positive action control, z-bend, no detents
Mounting hole spacing: 2", conduit size: 3/16", conduit length: 26-1/4", Inner wire: .054", inner wire length: 32", wire travel: 1-5/8"

60-210

Throttle Control Cable Assembly
Plain end – no z-bend
Conduit size: 3/16", conduit length: 72", inner wire: .060", wire travel: 1-7/8"

60-209

Throttle Control Cable Assembly
Plain end – no z-bend
Conduit size: 3/16", conduit length: 54", inner wire: .060", wire travel: 1-3/8"

60-365

Throttle Control Cable Assembly
Negative action control – reversible
For either 3/4" or 7/8" tubing, slotted mounting for 1-13/16" to 2", spring washer and center mount for 1/4" bolt, detents front and rear
Conduit size: 3/16", conduit length: 48", inner wire: .060"

60-046

Throttle Control Cable Assembly
Right-hand version
Conduit size: 3/16", conduit length: 48", inner wire dia.: .060"

C

OREGON	Replaces	Description	Product Code

Universal

60-036

Throttle Control Cable Assembly
Left-hand version
Positive action control, for most popular for panel mounting on riding mowers, tractors, and self-propelled walk-behinds

60-106

Throttle Control Cable Assembly
Positive action control, steel control with aluminum cover plate
Suggested mounting: panel or bolt thru center
Conduit size: 3/16", conduit length: 48", inner wire dia.: .060"

60-160

Throttle Control Cable Assembly
Extra long wire and conduit for use on walk-behind mowers with front throttle controls, all steel construction
Conduit size: 3/16", conduit length: 66", inner wire length: 71"

60-860

Throttle Control Cable Assembly
Same as Oregon® 60-160 but with 48" inner wire
Conduit size: 3/16", conduit length: 43-1/2", inner wire length: 48",
wire travel: 1-1/2"

AMF/Dynamark/Noma

46-330 301503

Zone Safety Control Cable
Safety control, blade engagement for walk-behind mowers, 1/4" eyelet on one end, z-bend on the other end
Conduit length: 23", inner wire length: 56"

AYP

60-004 700417

Throttle Control Cable Assembly
20" and 22" side and rear discharge, Z-bend
Conduit size: 3/16", inner wire length: 49-1/2"

46-322 146323

Drive Control Cable
Self-propelled control for 22" self-propelled mower, flexible inner wire with spring on end, Z-bend on spring
Conduit length: 56"

46-325 130861

Zone Safety Control Cable
Zone control cable for 22" walk-behind push mower model PP751, die cast z-bend on each end
Conduit length: 52", cable length: 59-3/16"

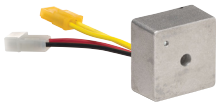
Voltage Regulators

33-320-0
Briggs & Stratton 295924
Delco 1118988
Jacobsen 107927
John Deere AM30078
Lauson 32089
Tecumseh 32089

Voltage Regulator
For starter generators

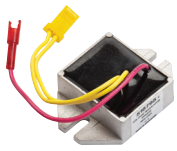
33-247
Briggs & Stratton 397809

Voltage Regulator
For quad circuit 8, 10, 13, or 16 amp charging systems
Fits series engines 252700, 253700, 280700, 281700, 404400, & 422700



33-402
Briggs & Stratton 691185
Briggs & Stratton 394890
Briggs & Stratton 797375
Briggs & Stratton 393374

Voltage Regulator
For 18–20 HP engines with 10, 13, 14, & 16 amp charging systems



33-417
Briggs & Stratton 491546
Briggs & Stratton 691188
Briggs & Stratton 794360

Voltage Regulator
For 5 & 9 amp charging systems
Fits 256400, 280700, 351447, 351777, & 42A700 series engines

33-418
Briggs & Stratton 493219

Voltage Regulator
For 16 amp dual-output charging systems (with no charge indicator light), 8-20 HP engines
Fits 303700 series engines

33-249
Grasshopper 185530
Kubota 15531-64601

Voltage Regulator
For equipment with permanent magnet alternators with a “no charge” indicator
Fits Grasshopper models 1822D, 718D, 721D, & 721G

33-253
John Deere M802471

Voltage Regulator
Fits compact utility tractor models 650 & 750

33-248
John Deere AM101406

Voltage Regulator
Fits lawn tractor models 330, 332, & 322, skid-steer loader models 375 & 3375

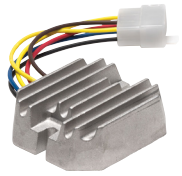
Voltage Regulators

33-246
John Deere AM126304
John Deere M70121
John Deere M97348

Voltage Regulator
For Gator utility vehicles with 15 or 20 amp charging systems
Fits lawn & garden tractor models 108, 111, 111H, 112L, 130, 160, 165, 170, 175, 180, 185, 240, 245, 260, 265, 285, 320, 325, 345, 355D, 415, 425, 455, F510, F525, F735, GT242, GT262, GT275, GX345, GX355, LX172, LX176, LX277, LX279, X475, X478, X485, X495, X575, X585, X595, X700, X720, X728, & X729, ATM models 600, 622, & 626, diesel golf equipment model 2243, material transporter models 600, 622, & 626, skid-steer loader models 375 & 3375, Greens mowers models 2500 & 2500A–E



33-407
Kawasaki 21066-2056
John Deere M70121

Voltage Regulator
Fits Kawasaki models FB460, FC400, FC420, & FC540, 13, 15, & 17 amp charging system on engines to 18 HP, John Deere models 1300, 160, 165, 170, 172, 175, 176, 180, 185, 186, 240, 242, 245, & others with 15 amp charging systems

---

33-419
Kohler 12-403-01

Voltage Regulator
Fits CV11, CV12.5, CV13, CV14, CV15, & CV18 model engines
For commerical walk-behind mowers with Kohler engine, electric clutch, rope starter, and no battery

---

33-400
Kohler 41-403-06
Kohler 237335
John Deere AM37200

Voltage Regulator
For 8 thru 24 HP engines with 15 amp alternator
Fits Kohler engine model K181, K241, K301, K321, K482, K532, & K582 “L” pattern with two top terminals and one bottom

---

33-401
Kohler 25-755-03

Voltage Regulator
Fits models M8 thru M20, MV16 thru MV20, CH5, CH6, CH11 thru CH15, & CV11 thru CV15
For 8 thru 24 HP engines, 15 amp alternator in-line terminals, 3 in a row

---

33-411
Onan 191-1748
Onan 191-2106
Onan 191-2277

Voltage Regulator
For 16-20 HP Onan engines
Fits John Deere models 318-420 with Onan engines

Gasket Scraper

OREGON	Description	Product Code
42-446-0	**Wide Blade Gasket Scraper** For gasket removal, nickel chrome plated, “Insulite” plastic handle Length: 11"	

OREGON Description Product Code

Fuel Stabilizer

4205M **Fuel Stabilizer**
Stabilizes fuel and keeps it fresh
Previously 42-912-1
Keeps gum and varnish from developing
Use in any 2-cycle, 4-cycle, gas or diesel engine fuel systems
Promotes easy starts after storage
Convenient easy measure, easy pour bottle
8 oz. bottle, 12 per carton

Mix:
1 oz. Fuel Stabilizer to 2-1/2 gallons gasoline (entire contents of 8oz. bottle will treat 20 gallons of gasoline).

Ignition Coils

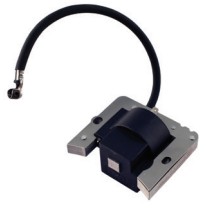
33-343 Tecumseh 35135A, Tecumseh 35135, Tecumseh 35135B
Ignition Coil
Fits TVM, TVXL, 170-220, OVXL120, HM70 thru HM100, & OHM-OHSK120
For 7 HP thru 12 HP, medium frame engines

33-363 Tecumseh 30560A
Ignition Coil
For 3-10 HP engines
Fits LAV, V, H, HS, VM series, & most point ignition engines

33-150 Tecumseh 37137, Tecumseh 36344, Tecumseh 36344A
Ignition Coil
Fits models OHV 110, OHV125, OHV130, OHV135, OHV140, OHV150, OHV165, OHV170, OHV175, & OHV180



Spark Plug Boots/Terminal

33-213 Husqvarna 501 485 402
Spark Plug Boot
45° angle
Fits brushcutter models 232, 235, 322, & 325

33-204 Husqvarna 501-485-402
Spark Plug Boot
Fits chainsaw models 340, 345, 346, 350, & 351
Protects plug from moisture, 90 degrees, eliminates shock, positive connection

33-200 NGK VBOF 8032 45
Spark Plug Boot
45° angle
For overhead valve engines

33-208 Homelite A55373-A
Spark Plug Boot with Spring
5 mm for trimmers & chainsaws

33-215 Honda 30700-ZE1-000, Honda 30700-ZE1-013
Spark Plug Boot
Fits GX11–GX390

33-216 Honda 30700-ZJ1-841, Honda 30700-ZJ1-003
Spark Plug Boot
Fits GX120, GX610, GX620, GX670, GXV610, & GXV620

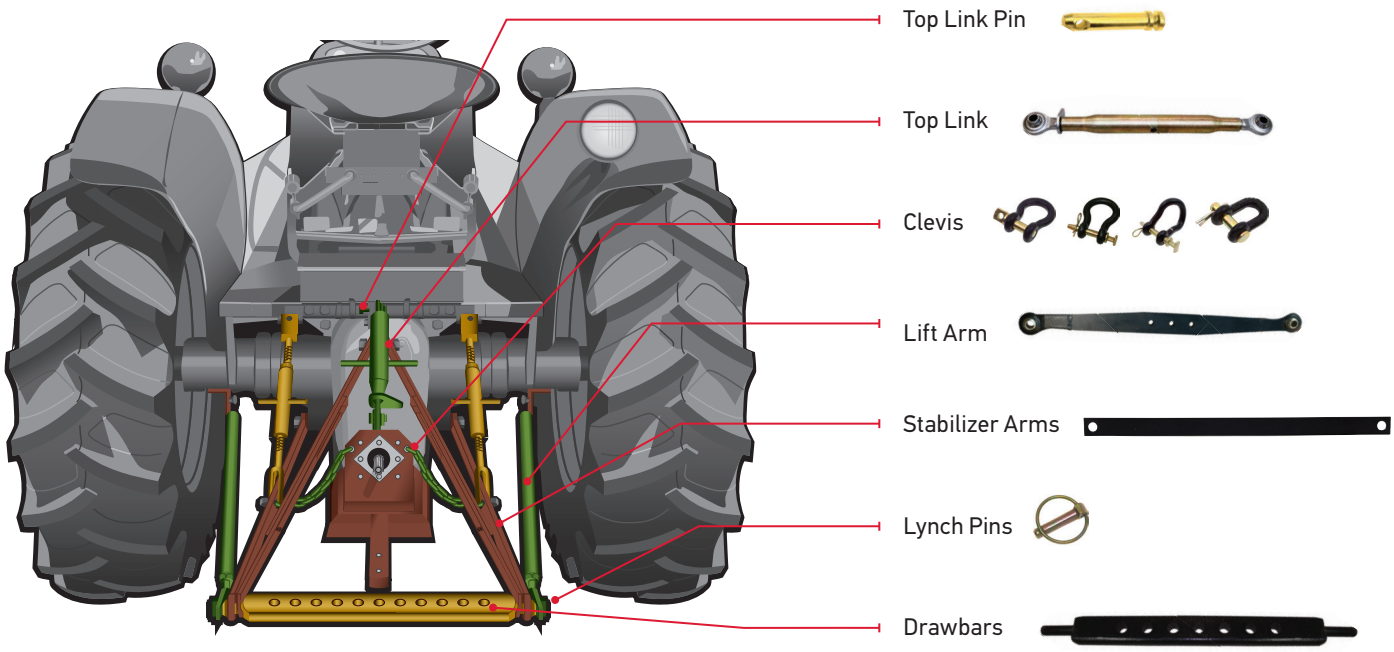
The Three-Point Hitch System



Introduction

A typical tractor three-point hitch system is standard on almost all farm tractors today. The basic function of the system is the attachment and adjustment of agricultural implements. The three primary parts of the system are the top link and two lower lift arms as shown in gold and brown in the illustration above. Special pins are used to fasten the implement at these three points: top link pins and draw pins (lift arm pins). Adjustment of one or all of these components allows the tractor operator to raise, lower or tilt an implement. The three-point linkage parts described in this catalog are built to standard specifications set by the American Society of Argicultural Engineers (ASAE) described in the table on the right.

Category 1, 2, 3, and 4

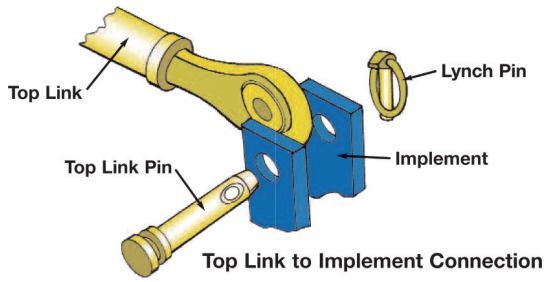
Categories are used to classify tractors by drawbar horsepower. The table below gives the dimensions and the horsepower ratings that are associated with these three categories.

Maximum Drawbar Horsepower	Top Link Pin Dia.	Pull/Draw Pin Dia.	Lift Arm Spacing
Cat. 0 - up to 20	5/8"	5/8"	20"
Cat. 1- up to 45	3/4"	7/8"	26"
Cat. 2- 40 to 100	1"	1–1/8"	32"
Cat. 3- 80 to 225	1–1/4"	1–7/16"	38"
Cat. 4- 135 to 300	1–3/4"	2"	46"

Top Link Connection

Top link pins are always unthreaded and are held in place by either a lynch pin, or in some cases, a large “R” clip pin. See below. Top links and top link pins vary in length, but their respective ball socket holes and pin diameters are standardized by horsepower category.

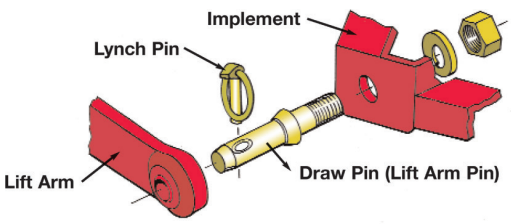
Top Link Connection



Top Link to Implement Connection

Lift Arm Connection

Most lift arm pins are threaded on the end that bolts to the implement bracket. The unthreaded end with the cross hole accommodates the ball socket of the lift arm. The lift arm is secured on the pin with a lynch pin or large “R” clip pin. See below. Lift arms and lift arm pins vary in length, but their respective ball socket holes and pin diameters are standardized by horsepower category.



Lift Arm to Implement Connection

Maintenance Kits – New

Engine Maintenance Kits cover a range of top lawn mowers, providing exactly what your customer needs, when they need it.

NO HASSLE. NO WORRY. NO QUESTIONS.

M

Oregon® Engine Maintenance Kits provide everything your customer needs for an seasonal tune up. Trust that you can get back into the yard sooner with a grab-and-go solution containing premium parts and delivering consistent performance. All parts are engineered to meet OEM quality and are guaranteed to make annual tune ups easier, offering the replacement parts needed to care for your engine, including oil, fuel stabilizer, spark plugs, air filters, oil filters, and fuel filters.

Grab-and-Go
Spend less time wondering which parts to choose, and more time on your equipment.

Fit-Up You Can Trust
Oregon replacement parts guaranteed to fit your engine and proven to thrive in the field.

Premium Parts and Oil
Carefully selected parts crafted into every kit giving your customers confidence in their choice

Consistent Performance
Oregon replacement parts deliver the performance you need, at the cost your customers want.

Oil Filters

Metal Shell

Relief Valve Assembly
Relief valve opens when necessary to provide engine with oil under all conditions

Perforated Steel Core
Allows full flow while giving rigid support

Anti-Drain Back Valve
Anti-drain back valve prevents oil from draining out of the filter during engine shutdown

Metal End Cap
Metal end caps and thermo setting adhesive provide positive seals

Resin Impregnated
Paper filter medium
Cured resin impregnated paper removes harmful foreign particle

Metal End Cap
Metal end caps and thermo setting adhesive provide positive seals

Lid Assembly
Lid assembly is roll seamed to the shell which provides a leak-tight assembly

Engine Oil Filters

83-280
Briggs & Stratton 5076D
Briggs & Stratton 695396
Briggs & Stratton 696854

Oil Filter
Extended life version of 492932 (Oregon 83-013)
HT: 2-1/4", OD: 3", seal OD: 2-13/16"
Mounting thread: 3/4"-16, micron: 27
Relief pressure: 8–11 PSI
Anti-drain back valve: yes

83-030
Briggs & Stratton 795990

Oil Filter
Fits 121Q72, 121S72, 121S75, 121S77, 12Q972, 12S972, & 12S975
HT: 2-3/8", OD: 2", seal OD: 1-3/4"

83-029
Generac 070185D

Oil Filter
For Generac engines.
HT: 2-7/8", OD: 2-5/8", seal OD: 2-7/8"
Mounting thread: 3/4"-16
Micron: 27, relief pressure: 8–11 PSI
Anti-drain back valve: yes

83-000
Honda 15400-PFB-014
Honda 15400-PFB-004
Honda 15400-PJ7-015
Honda 15400-PM3-004

Oil Filter
For many Honda water-cooled engines
HT: 2-1/2", OD: 2-1/2", seal OD: 2-13/16"
Mounting thread: M20 x 1.5
Micron: 27, relief pressure: 8–11 PSI
Anti-drain back valve: yes

Gator® SpeedLoad™

Trimmer Head & Line System

FAST, EASY, DURABLE

Gator SpeedLoad is Oregon's exclusive and revolutionary cutting system for string trimmers. Comprised of a durable plastic head and self-contained trimmer line disk, Gator SpeedLoad makes reloading line quick and easy in less than 20 seconds.

FAST, EASY, DURABLE

OregonProducts.com/GSL

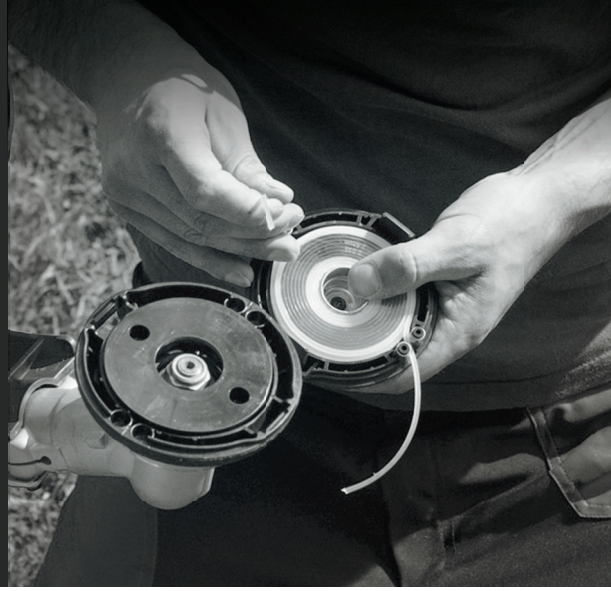
Why Gator® SpeedLoad™

Traditional string trimmer, trimmer lines and heads are ***sources of frustration.***

A survey made in May 2015 with 300 professionals and 300 homeowners has indicated that more than 70% of string trimmer users are confronted with problems when dealing with string trimmer accessories.

Gator SpeedLoad makes the frustration associated with reloading string trimmer heads a thing of the past with pre-wound, self-contained disks that simply pop into place.

Using Gator SpeedLoad means ***no winding and no hassle***.



Gator SpeedLoad heads are available in 2 different package types to offer you flexibility.

RETAIL PACKAGING

The two smaller heads are in a clamshell while the large head is in a cardboard box.

24-200

24-250

24-500

DEALER PACKAGING

Meant for dealerships and online sales. The two heads will be available in economy cardboard boxes.

24-200-B

24-250-B

Dealer boxes come in a displayable shipper that folds into an attractive counter display box and holds 6 heads per shipper.

Gator® SpeedLoad™

Load in less than 20 seconds

Lasts up to twice as long

Tested & approved by the largest US landscaping company

UNIVERSAL
Fits most gas brushcutters & trimmers

PLASTIC HEAD
Improved toughness,
extremely resistant to wear & shocks

NO LOOSE PARTS
Eliminates the hassle and expense of replacing lost parts

DISK SHAPED LINE
Each disk represents a full load
No need to deal with messy spools anymore
Fits inside of a pocket and easy-to-carry
Small size means less inventory space
Reduced packaging

HEAT-TREATED DISK
Twice the resistance of standard line

SIDE TAPS
Easy to open, no tools needed

TAP AND GO
Advance the line while trimming

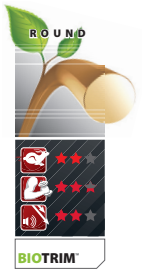
BioTrim™ Trimmer Line

- Oxo-biodegradable material offers quick decomposition compared to standard Oregon® trimmer lines
- Performs similar to Oregon Gatorline™ products with comparable applications
- Recyclable material used for packaging components

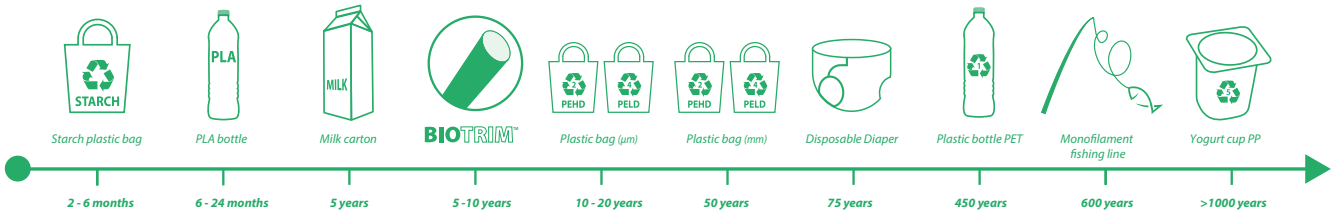


OREGON	Package Type	Footage	Product Code
.080" Gauge			
559046	50' Donut	50' (15 m)	
559050	1 lb. Donut	413' (126 m)	
.095" Gauge			
559047	50' Donut	50' (15 m)	
559051	1 lb. Donut	285' (87 m)	

Oxo -Biodegradability* is a three-fold process:

1. Photo-oxidation: The line is fragmented by UV light from the sun over a period of 3 years.
2. Thermo-oxidation: Heat continues the fragmentation on the soil.
3. Bio-assimilation: Finally, micro-organisms in the earth consume the remaining elements. The whole process takes between 5 and 10 years (depending on climatic conditions), after which no trace of the line remains. The line will oxo-biodegrade only when in contact with the soil. It remains completely intact and in perfect condition when stored.

Degradability Scale:



* OXO-Biodegradability certified by "Le Centre National d'Evaluation de Photo protection" C.N.E.P. – University Blaise Pascal, Clermont-Ferrand, FRANCE. Test protocol C.N.E.P. – SEESIB compliant with BS 8472:2011

T

Platinum Gatorline™

Platinum Gatorline solves many of the problems that aggravate users of traditional trimmer line. An armored exterior – more resistant to breakage than standard line – shields a highly flexible co-polymer core, providing outstanding durability. Platinum Gatorline is also engineered to resist welding up to 498° F (259° C) – much higher than standard line.

Features
- Consistent line diameter
- Armored exterior
- Flexible core
- SuperTwist®

Benefits
- Compatible with most trimmer head systems
- High resistance to abrasion, breakage and welding
- Resistant to cracking and breaking
- Less resistance, engine drag, vibration and noise compared with traditional, round nylon lines

Important Trimmer Line Information

Any monofilament trimmer line can lose moisture over time or become brittle, especially if subjected to heat and sunlight. To reduce brittleness, Oregon® strongly recommends that line be submerged in water for 24 hours.

T

Trimmer Line & Heads

FlexiBlade™ Trimmer Line

FlexiBlade is a revolution in trimmer technology, a patented cutting system with the power to sever weed stalks up to 3/4" in diameter with ease. The extreme cutting force of FlexiBlade for cutting weeds and heavy grass comes from its serrated edges. The serrations act like the teeth of a saw, bringing multiple cutting surfaces into contact with the vegetation being cut. FlexiBlade is made from a proven high-strength reinforced composite material for long-wearing durability.

- Leaves a cleaner cut in grass
- Cuts through dense weeds and berry vines
- Cuts fast, even in heavy cutting conditions
- More cutting power than trimmer line
- Quieter than trimmer line
- Safer than steel weed blades

NOTE: FlexiBlade is designed to cut weeds, vines and grass. Avoid contact with concrete, rocks and wood. The sharp teeth can damage trees, walls, and fences. The .099" and .105" diameters can be used in most manual-feed trimmer heads. FlexiBlade is not recommended for most "bump feed" trimmers.

Important Trimmer Line Information
Any monofilament trimmer line can lose moisture over time or become brittle, especially if subjected to heat and sunlight. To reduce brittleness, Oregon® strongly recommends that line be submerged in water for 24 hours.

OREGON	Replaces	Description	Product Code

Trimmer Line Cutter

21-000	Universal	**Trimmer Line Cutter** Safe and simple to use. Simply bend the line at the point you want to cut and push into the tool.	

Lightning Load™ Bump & Feed Head Trimmer Heads

Lightning Load bump and feed trimmer heads for straight-shaft trimmers:

- Quickly replace trimmer line through eyelets without opening head
- Spool divider prevents line tangle
- Available in either 4-1/4" or 5" diameter sizes

T

Trimmer Line & Heads

Similar to Speed-Feed® Heads, 2-Line

Easy line loading takes 30 seconds or less. No disassembly required. Simply slide line through head until half of amount to be added is on each side of the head, grasp the easy grip collar and wind line in. Rugged semi-matic head is designed for medium to heavy-duty applications. Inner wall reduces debris inside the head and large durable eyelets increase line life. Line tensioning system with split spool reduces vibration. Part numbers 55-294 & 55-265 mount on most straight-shaft trimmers using the included adaptors similar to Speed-Feed.

Jet-Fit™ Trimmer Heads

An easy-to-load fixed-line head designed for use with FlexiBlade™. These heads also work with all types and sizes of trimmer line, and fit the majority of counterclockwise-turning trimmers. Jet-Fit heads mount on trimmers using the trimmer's blade bolt or nut and one of the basic adapter washers included (8mm, 10mm, 12mm, 15mm) or the reduction-ring adapter for trimmers requiring a 20 mm arbor. The adaptors packaged with Jet-Fit heads also include several others for fit-up to trimmers having different mounting requirements.

NOTE: Jet-Fit heads are attached using the trimmer's blade bolt or nut mounting bolts are not packaged with Jet-Fit heads. In Canada, Jet-Fit heads have been replaced with Flexihead™ trimmer heads:

- Oregon® 55-403 is Oregon 55-407 in Canada
- Oregon 55-404 is Oregon 55-408 in Canada

55-403 **2-Line Aluminum Jet-Fit Trimmer Head**
Use on trimmers > 25cc

OREGON	Description	Product Code
55-485	Pawl & Spring Kit 4 pieces: 2 springs & 2 pawls	
55-488	Glide Cone	

Kwik Loader® Trimmer Heads

55-406-0 **Jet Fit™ Express Trimmer Head**
Adaptors, bolts and nuts included to fit most trimmers
The Oregon® Jet-Fit Express head features square eyelets making it an excellent choice for use with FlexiBlade™. Easy loading and unloading, just push to load and pull to unload. Square eyelets hold FlexiBlade securely, and at the right angle for maximum cutting force.
Can be used with all sizes and shapes of line
Packaged in clamshells for easy display and easy sales

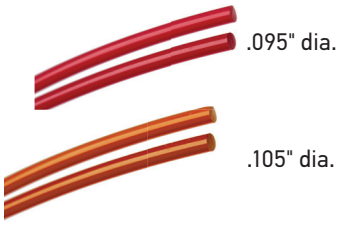
19-037	24-pack of 12" line, .095" diameter	
19-038	24-pack of 12" line, .105" diameter	



Fixed Line Head

This heavy-duty commercial design offers easy line changes, without the need for disassembly or tools. Die-cast aluminum head mounts using one adaptor and the trimmer's blade bolt or nut. Uses one 16" trimmer line. Line capacity: .080", .095", .130", & .155". Includes replaceable plastic glide plate.

NOTE: Use .155" line on straight-shaft trimmers with engines 31cc and larger.

OREGON	Description	Adaptors Included	Product Code
55-191	Die-cast aluminum Fixed-line trimmer head Ships with .130" line	Included for most trimmers	
55-194	Glide Cone For 55-191		

T

WARNING: High-speed cutting tools present risk of serious injury to operators or bystanders from thrown objects or from contact with rotating cutting attachments. Read and follow all instructions below for proper fitting and for safe and proper use of blades and trimmer heads.

Attention Dealers

OREGON® URGES YOU TO READ AND FOLLOW ALL OF THESE SAFETY GUIDELINES WHEN SELECTING, INSTALLING, SERVICING OR OPERATING ANY CUTTING ATTACHMENTS FOR TRIMMERS OR BRUSHCUTTERS. ENCOURAGE YOUR CUSTOMERS TO DO THE SAME.

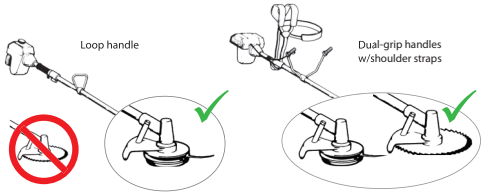
The application charts on the following pages are based on the best information available to Oregon at the time of printing. We take care that listed applications are accurate, but it is your responsibility to assure that Oregon cutting attachments are correctly and appropriately fitted to equipment you service. Some trimmers and brushcutters offer more than one cutting-attachment shield. Be sure to use the appropriate shield for the cutting attachment installed. Inadequate shielding can expose operators and bystanders to the risk of serious injury.

Important safety and maintenance information is often printed on Oregon packaging. When installing new cutting attachments, do not diskard such packaging — give it to your customer.

Trimmer/Brushcutter Safety Instructions

Check that cutting-attachment shields are properly located and in good condition. Never remove, modify or in any way compromise the cutting-attachment shield to accommodate a cutting attachment, or for any other reason. The shield protects against inadvertent contact with the cutting attachment and reduces the risk of the operator and bystanders being struck by objects that may be picked up and thrown violently by the rotating tool. **Read and follow all instructions supplied by the manufacturer of the trimmer/brushcutter.** Manufacturers' instructions include important additional information regarding safe use and proper maintenance procedures for their products.

Rigid blades must be used only on brushcutters designed to accommodate blades. Never use a metal cutting attachment on a brushcutter without a shoulder harness, properly mounted barrier handlebar and cutting-attachment shield in good condition. Never remove the cutting-attachment shield. These features are designed to minimize the risk of inadvertent contact with the cutting blade, reduce the risk of injury to the operator and bystanders from thrown objects and to aid in control of the brushcutter. Contact with rigid blades can result in severe bodily injury.



Be certain that replacement cutting attachments are fitted properly with regard to the direction of rotation, the size of the mounting bolt and the size of the arbor. Improperly mounted attachments can damage the machine or work loose and be thrown off, causing injury to the operator or bystanders. Do not mount any attachment on any trimmer or brushcutter without a solid, secure fit of all parts.

Do not install Oregon trimmer heads on any trimmer capable of spinning the attachment faster than 10,000 RPM. And do not install Oregon metal blades on any brushcutter capable of spinning the blade faster than 10,000 RPM. Speeds higher than these may cause the cutting attachment to break and fly apart, especially if they become damaged in use, with pieces possibly striking and injuring the operator or bystanders.

Check the condition of cutting attachments frequently. Always replace cutting attachments that are cracked, bent, or warped—even if such damage appears to be superficial. Never attempt to repair damaged cutting attachments by welding or bending. There is a risk that damaged cutting attachments will fly apart, with pieces possibly striking and injuring the operator or bystanders.

Always wear eye, face, ear, hand, leg, and foot protection during operation. These precautions reduce the risk of injury from noise or from material that may be thrown by the cutting attachment. Do not wear shorts or short-sleeved shirts. Wear safety glasses or similar eye protection.

Keep bystanders and pets at least 50 feet (15m) away in all directions. Always clear the work area of rocks, glass, wire, nails, or other foreign objects that can be picked up and thrown by the rotating cutting attachment. Trimmers and brushcutters can violently throw loose objects, or uncontrollably thrust away from objects they contact but cannot cut. Keep bystanders away.

Sharpen or maintain the cutting attachment according to instructions packaged with the attachment. A dull tool is more difficult to use. Failure to sharpen, or incorrect sharpening of metal blades, can lead to cracks that may result in breakage, exposing the operator and bystanders to the risk of serious personal injury.

Use cutting attachments to cut only the types of material for which the attachment is designed. If used improperly, cutting attachments may become damaged and may break, increasing the risk of serious personal injury to the operator or bystanders.

Diskonnect power to the trimmer/brushcutter before performing any service. There is always a risk that the cutting attachment will inadvertently be started if the machine is under power.

Do not install metal blades on curved-shaft trimmers.

For safety reasons, metal blades should not be attached to straight or curved-shaft trimmers with a **loop-handle**. Use only nylon-line heads on these trimmers.

Dual-grip handle bar type trimmers equipped with shoulder straps and proper cutting-attachment shields can accept either metal blades or nylon-line heads.

WARNING: Improperly installed trimmer attachments can create a risk of personal injury to the trimmer operator or bystanders. Improperly installed attachments can work loose and be thrown off the trimmer. In some cases, mounting bolts may not securely fit all intended trimmer models, for example: there may be a difference in the size of the bolt's counterbore versus the counterbore on the trimmer. Do not install any attachment on any trimmer without a solid, secure fit of all parts.
ATTENTION DEALERS: Install heads only on trimmers that are within the size range (cc displacement or horsepower) for which the head is intended. Performance will suffer if the type of head and the size of trimmer are not properly matched. Read and follow all of the Important Safety Information.

WARNING: Improperly installed trimmer attachments can create a risk of personal injury to the trimmer operator or bystanders. Improperly installed attachments can work loose and be thrown off the trimmer. In some cases, mounting bolts may not securely fit all intended trimmer models, for example: there may be a difference in the size of the bolt's counterbore versus the counterbore on the trimmer. Do not install any attachment on any trimmer without a solid, secure fit of all parts.
ATTENTION DEALERS: Install heads only on trimmers that are within the size range (cc displacement or horsepower) for which the head is intended. Performance will suffer if the type of head and the size of trimmer are not properly matched. Read and follow all of the Important Safety Information.

WARNING: Improperly installed trimmer attachments can create a risk of personal injury to the trimmer operator or bystanders. Improperly installed attachments can work loose and be thrown off the trimmer. In some cases, mounting bolts may not securely fit all intended trimmer models, for example: there may be a difference in the size of the bolt's counterbore versus the counterbore on the trimmer. Do not install any attachment on any trimmer without a solid, secure fit of all parts.
ATTENTION DEALERS: Install heads only on trimmers that are within the size range (cc displacement or horsepower) for which the head is intended. Performance will suffer if the type of head and the size of trimmer are not properly matched. Read and follow all of the Important Safety Information.

F = Female • **M** = Male • **LH** = Left-hand • **RH** = Right-hand • **CB** = Counterbore

WARNING: Improperly installed trimmer attachments can create a risk of personal injury to the trimmer operator or bystanders. Improperly installed attachments can work loose and be thrown off the trimmer. In some cases, mounting bolts may not securely fit all intended trimmer models, for example: there may be a difference in the size of the bolt's counterbore versus the counterbore on the trimmer. Do not install any attachment on any trimmer without a solid, secure fit of all parts.
ATTENTION DEALERS: Install heads only on trimmers that are within the size range (cc displacement or horsepower) for which the head is intended. Performance will suffer if the type of head and the size of trimmer are not properly matched. Read and follow all of the Important Safety Information.

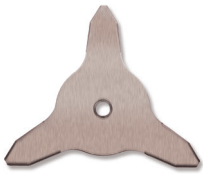
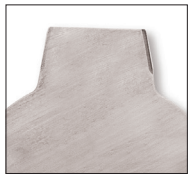
Trimmers - Brush Cutter Blades

Grass & Brush Blades

- Made of Swedish steel to exceed international standards for durability and safety.
- Ground edge can be easily re-sharpened with standard saw chain files.
- Grass and brush blades include a 20 mm reducer bushing for easy mounting on .75" arbors.
- 3 and 4 tooth blades are reversible.





All Oregon® grass-and-brush blades and clearing-saw blades are rated to 13,000 RPM and they are so stamped. However, Oregon recommends that these blades SHOULD NOT be installed on any brushcutter capable of spinning the blade faster than 10,000 RPM.

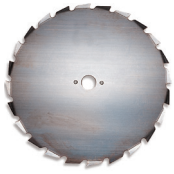
3-Tooth Grass & Brush Blades

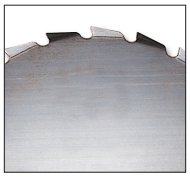
- Patented design
- Creates airlift to remove debries out of the way of the cutter
- Self-sharpening cutting edge
- Reduces engine drag

OREGON	Blade Dia.	Hole Dia.	Bushing	Thickness	Teeth	Product Code
41-938	10"	1"	20 mm	4 mm	3	
41-939	12"	1"	20 mm	4 mm	3	

Clearing Saw Blades

- Made of Swedish steel to exceed international standards for durability and safety
- Ground edge can be easily re-sharpened with standard saw chain files





All Oregon grass-and-brush blades and clearing-saw blades are rated to 13,000 RPM and they are so stamped. However, Oregon recommends that these blades SHOULD NOT be installed on any brush cutter capable of spinning the blade faster than 10,000 RPM

The Oregon® Customer Satisfaction Policy

Oregon Limited Warranty – Replacement Parts*
At Oregon, our goal is help you get the job done right with outstanding products that perform to your full satisfaction.
Oregon | Blount, Inc. warrants its products to be free from defects in materials and workmanship for as long as it is owned by the original retail purchaser.

If for any reason, you are not satisfied with our products, please let us know. Our contact information is listed below.

LIABILITY UNDER THIS WARRANTY IS LIMITED TO REPLACEMENT PARTS AT THE OPTION OF YOUR OREGON DISTRIBUTOR AND OREGON. PLEASE CONTACT YOUR OREGON DISTRIBUTOR OR US DIRECTLY. OREGON PRODUCTS ARE NOT WARRANTED AGAINST NORMAL WEAR AND TEAR, USER ABUSE, IMPROPER MAINTENANCE OR IMPROPER REPAIR.

REPLACEMENT OF DEFECTIVE PRODUCT IS THE EXCLUSIVE REMEDY UNDER THIS WARRANTY AND ANY APPLICABLE IMPLIED WARRANTY. THE REPLACEMENT WILL BE UNDERTAKEN AS SOON AS REASONABLY POSSIBLE AFTER RECEIPT OF THE DEFECTIVE PRODUCT. TO THE EXTENT PERMITTED BY LAW, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE APPLICABLE TO THIS PRODUCT IS LIMITED TO THE DURATION AND SCOPE OF THIS EXPRESS WARRANTY. OREGON SHALL NOT BE LIABLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS OR DO NOT ALLOW THE EXCLUSION OF CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU. THIS WARRANTY GIVES THE ORIGINAL OWNER SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS WHICH VARY FROM STATE TO STATE.

You Have Additional OEM Warranty Protection
If an original equipment manufacturer (OEM) declines to honor their written warranty solely because you purchased and used Oregon replacement parts in the OEMs product, please read on.

Oregon will allow you to substitute the rights and remedies provided to you under the OEMs written warranty for this express limited warranty. Here's how it works: Send us a written confirmation — from the OEM — that states that the OEM has refused to honor the OEM written warranty solely because you purchased and used Oregon replacement parts in the OEMs product. We are here to help.

Oregon 120V Professional Series Limited Warranty
Oregon offers the original purchaser a two (2) year limited warranty for 120V Professional Series products for which they will be the end user, and a ninety (90) day limited warranty for products purchased to rent to other end users. The Oregon 120V Professional Series limited warranty covers the following products: BL120VX-NA Backpack Blower, ST120VX-NA String Trimmer, EHT120VX-NA Hedge Trimmer, EG120VX-NA Edger, BX975-UV Battery, BX650-UV Battery, C1600-NA Charger, CD01120VX-NA Battery-to-Tool Cable, BPBX0R01-UV Backpack, and BPBXSY01-UV Backpack. During the warranty period, Blount will replace or, at its option, repair for the original purchaser only, free of charge, any product or part which is found upon examination by Blount to be defective in material and/or workmanship. Always refer to the specific warranty for coverage details.

Oregon 40V MAX Cordless Tool System Limited Warranty
Oregon offers the original purchaser a limited warranty. All Oregon Cordless 40V MAX Tools and Chargers are covered by a three (3) year limited warranty unless used for commercial purposes. Oregon Cordless 40V MAX Battery Packs are covered by a two (2) year limited warranty unless used for commercial purposes. During the warranty period, Blount will replace or, at its option, repair for the original purchaser only, free of charge, any product or part which is found upon examination by Blount to be defective in material and/or workmanship. Always refer to the specific warranty for coverage details.

Oregon CS1500 Chain Saw 2-Year Limited Warranty
Oregon offers the original purchaser a limited warranty. Oregon warrants all Oregon CS1500 Chain Saws for a period of two (2) years for personal use. This warranty is one (1) year for units that have been rented, or used for commercial or industrial use. During the warranty period, Blount will replace or, at its option, repair for the original purchaser only, free of charge, any product or part which is found upon examination by Blount to be defective in material and/or workmanship. Always refer to the specific warranty for coverage details.

Oregon Log Splitter Limited Warranty
Oregon offers the original purchaser a limited warranty. Oregon warrants all Oregon branded Log Splitters in the following manner: All steel components are warranted for (3) years. Hydraulics are warranted for (1) year. Log splitter engines are warranted by the specific manufacturer as rated by the manufacturer. During the warranty period, Blount will replace or, at its option, repair for the original purchaser only, free of charge, any product or part which is found upon examination by Blount to be defective in material and/or workmanship. Always refer to the specific warranty for coverage details.

You Can Reach Us Several Ways
We're here to take your calls between 7:30 a.m. and 4:00 p.m. (Pacific Time) Monday through Friday.
Our phone number is 800-223-5168. Or, write to us at: Technical Services Department, Oregon, Blount, Inc., P.O. Box 22127, Portland, Oregon 97269-2127. You can also visit our website at OregonProducts.com. Use the "Technical Information" or "Technical Services" links.

* In this catalog, the Oregon Limited Warranty covers all Oregon products except Oregon Cordless Tool System products, Oregon 120V Professional Series products, Oregon Log Splitter products, and the Oregon CS1500 chain saw product. Product exceptions are warranted under separate warranties.
